Introduction

Apple Swap is an instant cryptocurrency exchange for limitless swaps. Our service is free from registration and does not store user's funds on the platform.

What is Cryptocurrency

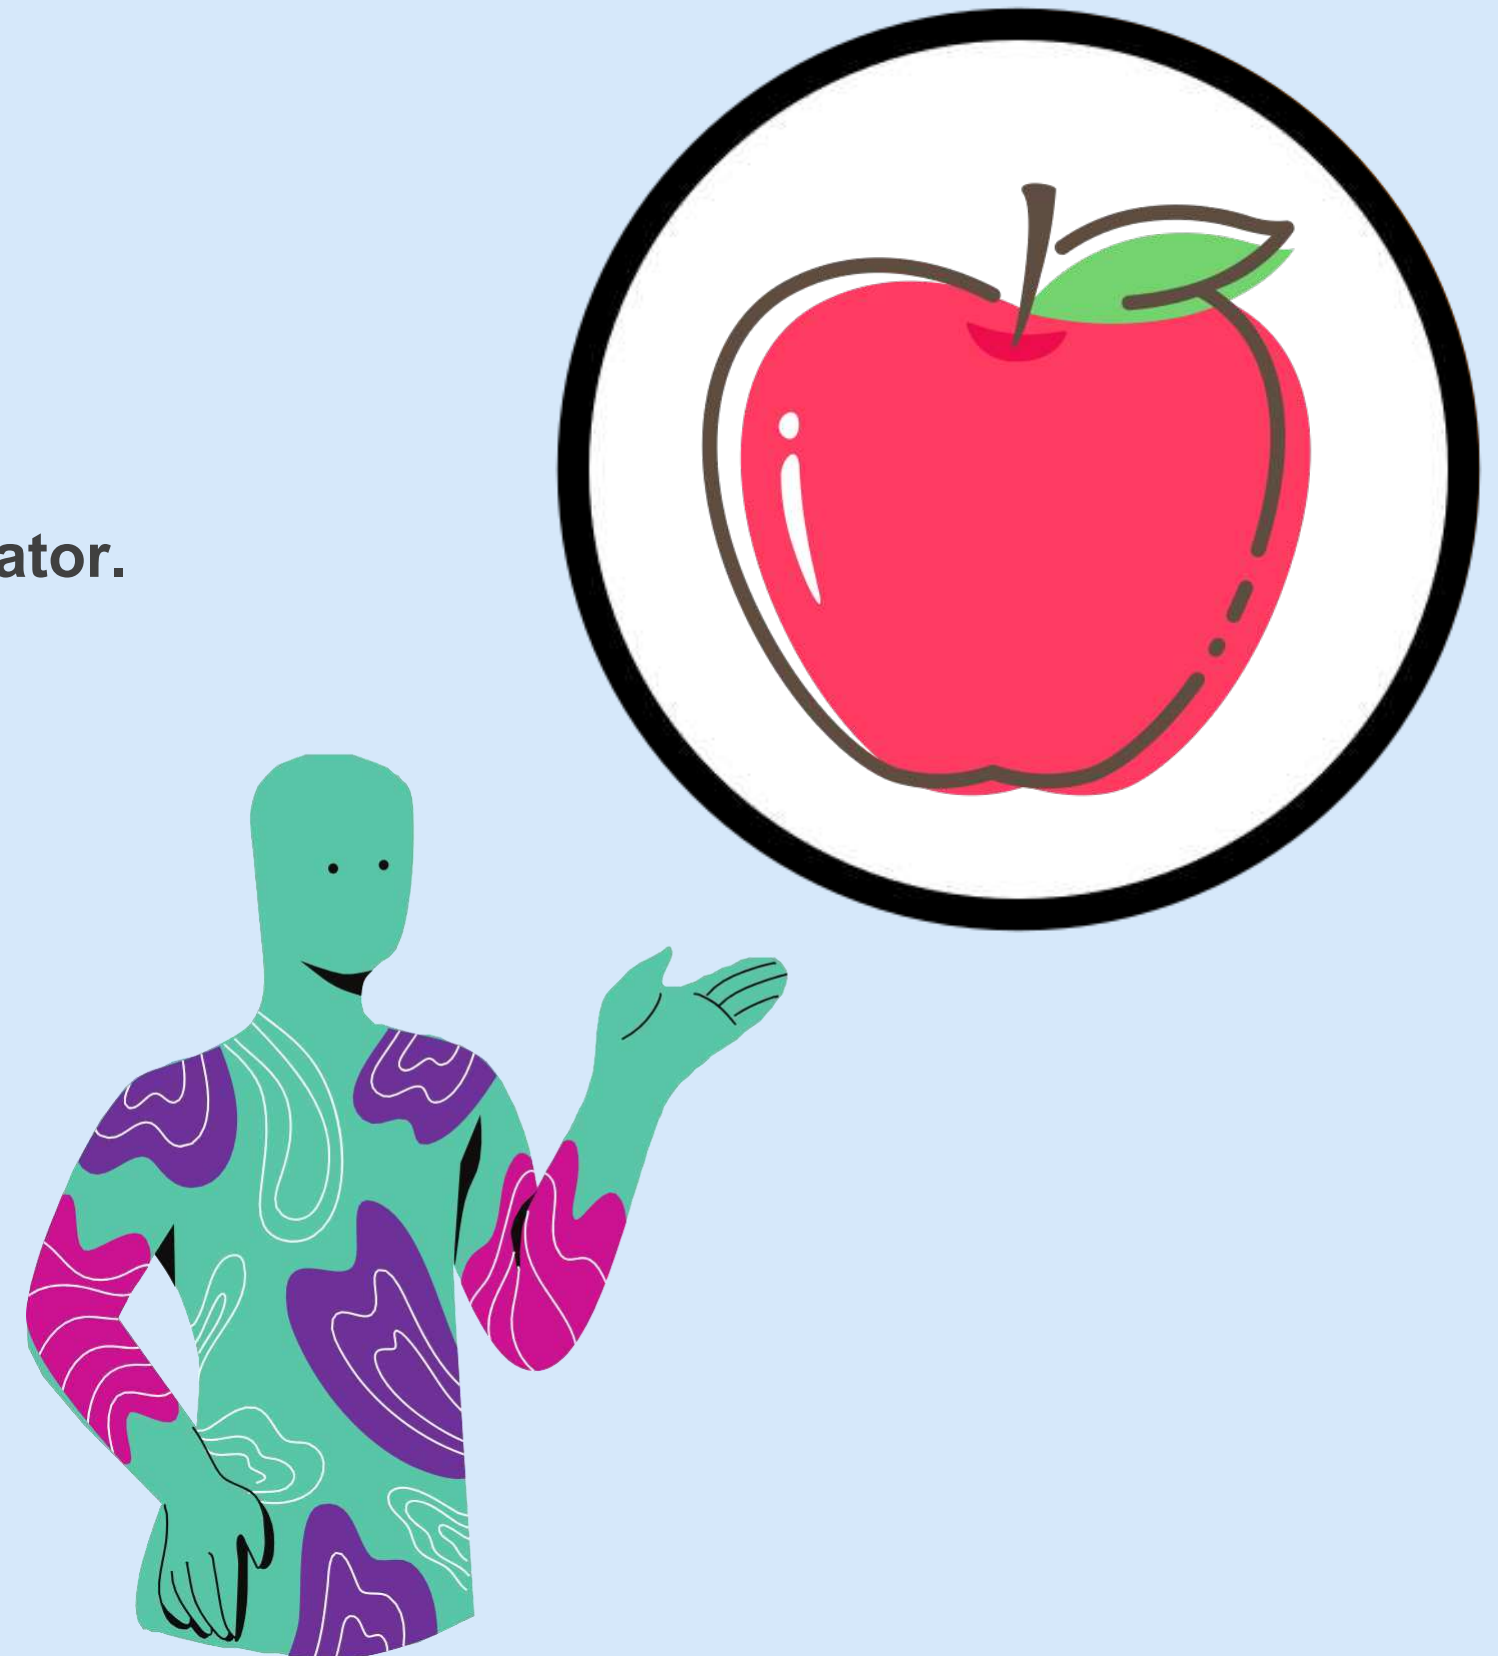

Cryptocurrency is a form of payment that can be exchanged online for goods and services. Many companies have issued their own currencies, often called tokens, and these can be traded specifically for the good or service that the company provides. Think of them as you would arcade tokens or casino chips. You'll need to exchange real currency for the cryptocurrency to access the good or service.

Cryptocurrencies work using a technology called blockchain. Blockchain is a decentralized technology spread across many computers that manages and records transactions. Part of the appeal of this technology is its security.

Apple Swap overview

Apple Swap is an instant cryptocurrency exchange aggregator.

Our platform allows customers to surf through all the swap offers collected from major crypto exchanges just in one place. We strive to simplify the exchange process as much as possible, making more available for fast and registration-free swaps with the greatest rates on the market

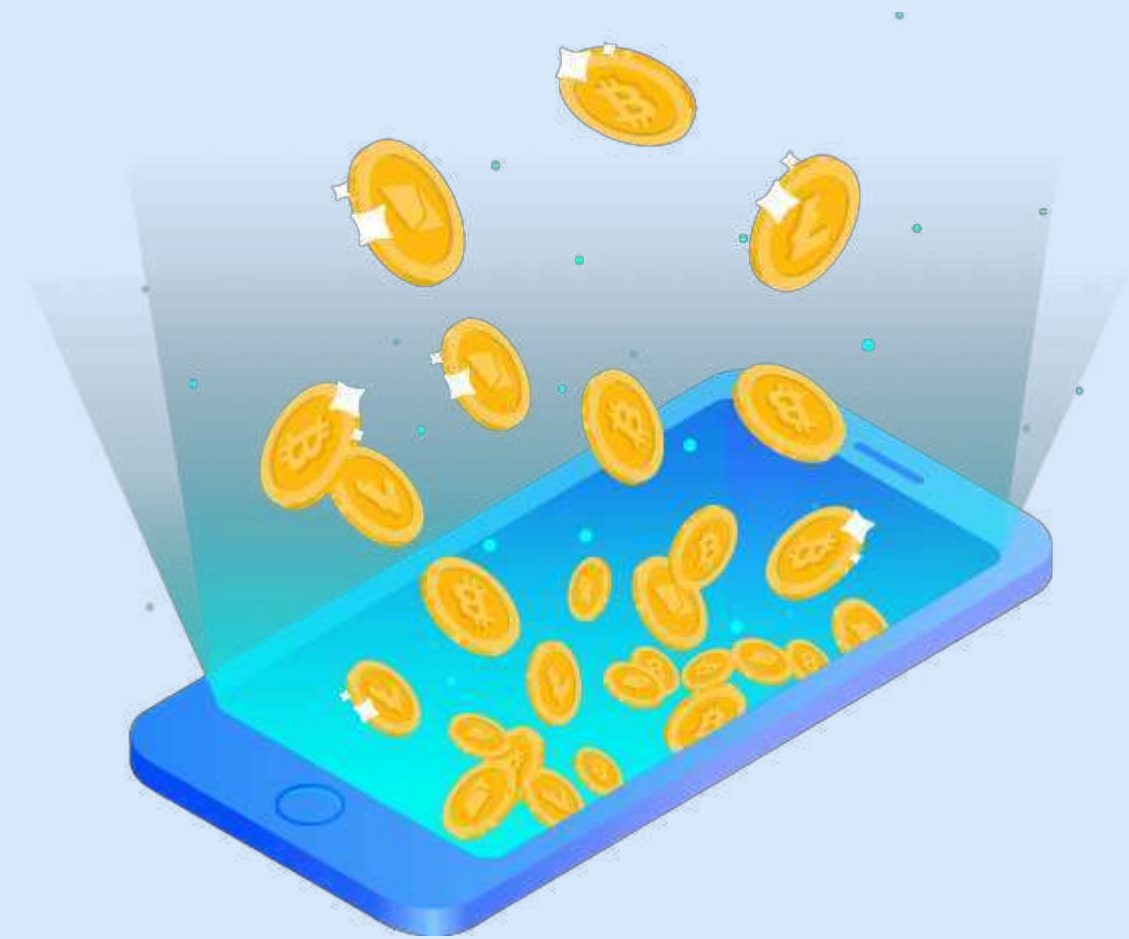

Our mission

Our number one priority is to save your time. The most precious thing we have. You have no need to search the rates through different platforms and services comparing their terms and fees anymore. We do that for you with no extra fee!

Absolute Privacy & Security

Apple Swap aggregates the swap offers from major crypto exchanges on the market, then arranges the deals in order by the best rate, and shows the data in its interface. It produces swaps without charging its customers with an extra fee.

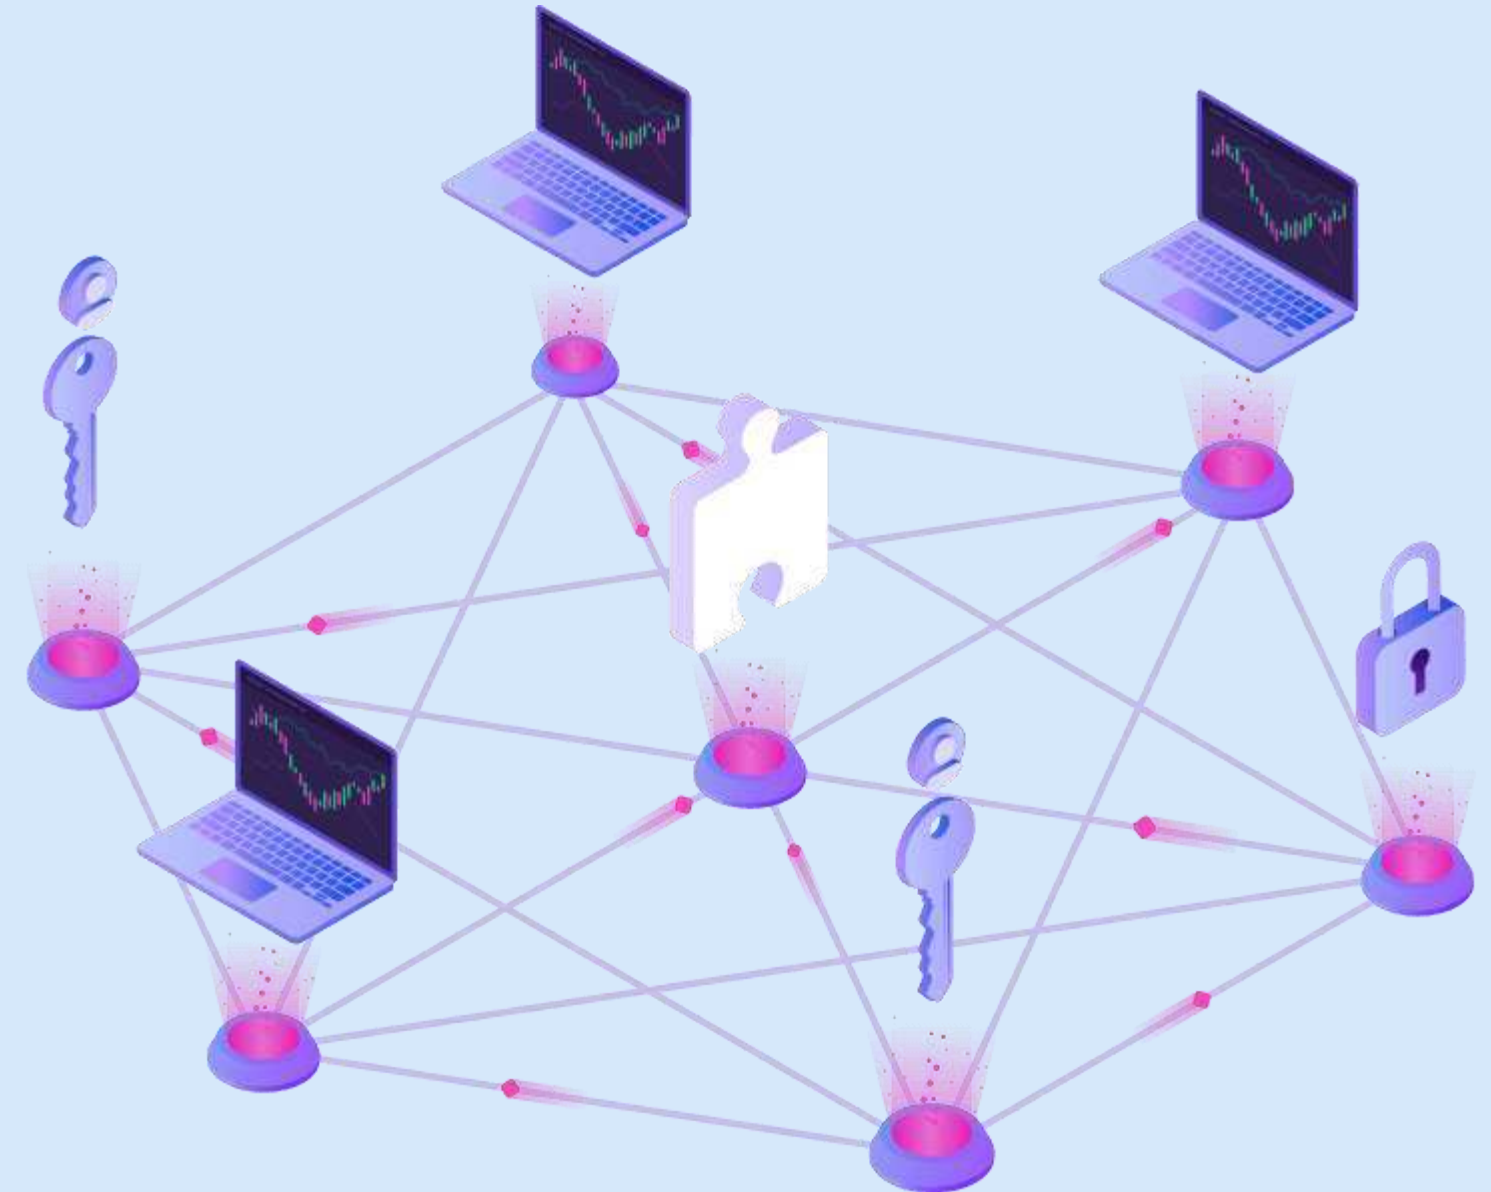

Keeping Track of Every Market Movement

You are updated with what's going on right now in this vibrant crypto industry by market-watch tools integrated into the App.

Why choosing us?

Sign-ups free
Fixed and floating rates
No limits
24/7 support
Affiliate program
