Binance Multi-Chain Capital

Litepaper

Revision 1 (4 February 2022)

1. Project overview

Binance Multi-Chain Capital can be described as being a Defi 3.0 solution.

What we do is bring capital back to holders through investments in L1 blockchains FaaS (Farming as a Service) projects. By partnering with the hottest up and coming, new projects we gain an advantage over the average trader who finds the project after marketing has begun. We aim to provide knowledge and know-how to up-and-coming developers. We focus our market research on trends to stay one step ahead of the competition.

The current trend of gaming and metaverse projects is all fine and dandy, but the question we ask is what's next?
- We make this easy by answering you to save you the research. ZK rollups will be the next biggest cycle in the crypto markets. We will be a step ahead and bring the biggest profits back to loyal holders.

We must give credit to MCC (Multi-Chain Capital) as they started this with their brilliant idea. We however share none of the same code. We only took their initial idea and have expanded upon it whilst creating a code from scratch to harness it.
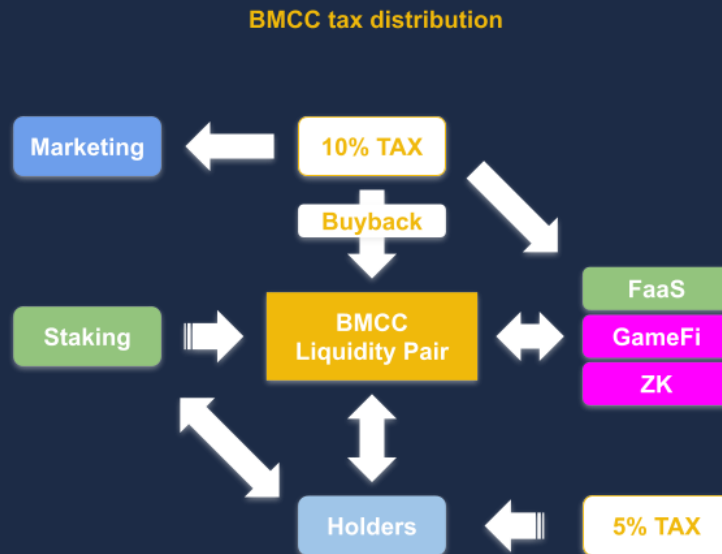

Our business model:
1. FaaS Operations:
   1.1. Scans the FaaS landscape for the strongest yields investments.
   1.2. Speaks to the team behind projects to determine whether investment is safe and secure.
   1.3. Invests the BNB from Dev wallet into projects and sells the returns which is converted into LP to raise liquidity.
2. GameFi Operations:
   2.1. Scans the Gaming landscape for the latest innovative projects that have bright ideas and wish to launch projects.
   2.2. Conduct a thorough background check on the team involved, speak to them about the project and get general consensus.
   2.3. Invest as a strategic partner and utilize profits to buy into yield farms and auto-compounding vaults.

We have a few more bright ideas that will become a mainstay in reducing sell pressure. We have to keep this held tightly lipped before the ideas are copied.

2. Project features

- 15% tax distributed to:
  - Development, FaaS, Buybacks - 5%
  - Reflection to BMCC holders - 5%
  - Marketing - 5%

BMCC tax distribution

- Farming with FaaS wallet:
  - Investing in most profitable projects across different chains. Profit is returned to the project Liquidity Pair, available for use to all the holders.
  - Partnership with profitable projects. Profit is returned to the project Liquidity Pair, available for use to all the holders.
  - Partial direct buybacks from taxed amounts. Tokens purchased from the BMCC pair and returned to the project Liquidity Pair, available for use to all the holders.

- Reflection to BMCC holders:
  - Each holder receives part of 5% from each transaction proportionally to their total token balance.

- Marketing:
  - 5% of the taxed amount accumulated in the marketing wallet. Funds are used for project promotion in different ways, including but not limited to advertisement networks, social channels, influencers, documentation and design materials.

3. Roadmap

- Q4 2021
  - First Buyback
    - Buybacks using part of FaaS fees to increase token price and liquidity.
  - Dashboard version 0.1
    - First version of dashboard to represent the concept.
  - Contract Audit
  - Dashboard charts and reporting
  - New website design
    - Change main website design.
  - FaaS initiation
    - Initiate FaaS operations.
- Q1 2022
  - Dashboard version 0.2 SoW
    - Scope of work for Dashboard version 0.2.
  - Coingecko
    - Listing application.
  - Coinmarketcap
    - Listing application.
  - Team expansion
    - Frontend and Backend developer based on priorities.
    - Data & AI engineer
  - Private Sales
    - TBD
  - Dashboard version 0.2
    - Complete initial scope of functional features.
  - Staking
    - Stake BMCC tokens to gain rewards.
  - Whitepaper
  - GameFi Strategic partner
    - Provide expertise and marketing to up-and-coming gaming projects. Which will enable us to get tokens in presale which would then go into our treasury.
- Q2 2022
  - Dashboard version 1.0
    - Complete secondary scope of functional features and release first fully working version of dashboard.
  - Expand FaaS network coverage
    - Additional networks (Matic, AVAX).
  - Launchpad
    - Deploy first version of BMCC launchpad.
  - BMCC network bridge
    - Create bridge from BSC network to other networks

4. Software development

- BMCC smart contract:
  - Audit:
    - Smart contracts contain low severity issues and owner privileges (renounced)!

- BMCC website:
  - New responsive design TBD

- BMCC Dashboard (initial SoW):
  - Header
    - Binance Multi-Chain Capital (link to main website)
    - Dark/Lite mode
      - Switching between light and dark mode style
    - Notifications
    - Wallet Connect
      - Connects BSC wallet
        - Metamask
        - WalletConnect
  - Overview
    - BMCC chart
      - 4 hours per point
    - Token metrics
    - Dev wallet balance, chart
    - Marketing wallet balance, chart
    - Buyback history
  - News
  - Navigation:
    - My wallet
      - BMCC swap
      - Reflection tracker
      - APR tracking
    - Pools
      - TBD
    - Governance
    - TBD
    - Staking
      - BMCC token staking
    - P2E
      - TBD
    - Documentation
      - Project overview
