Please be fully informed about the dangers and expenses of trading assets on the financial markets (digital or otherwise).

INVESTMENT RISKS

Trading cryptocurrencies have a high-risk level and is not suited for all investors. You should carefully evaluate your investing goals, level of expertise, and risk appetite before opting to trade cryptocurrencies, tokens, or any other digital asset.

INTRODUCTION

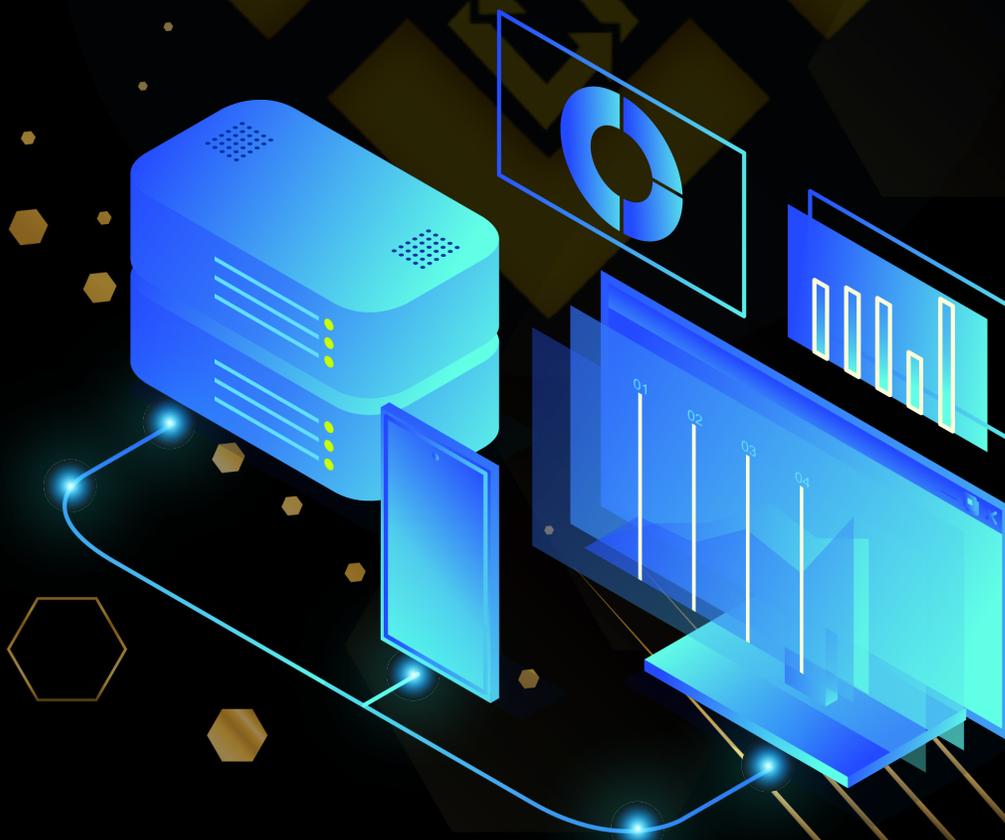

BNBBACK Token is a decentralized BEP20 community-driven token, to bring the unique thrust system code deploying on binance smart chain for the first time to bring passive feature income hardcoded into our contract to top until it reaches a threshold. This factor implies that users or the project's team built on the Binance Smart Chain network will be extremely safe and rewarding on the spot for long-term holders. The best part is that the tax system is part of the thrust system. It is a platform that values our astronaut's monetary investments and time, as evidenced by its tagline, " More in Return". By keeping our word, we hope to fulfill our promise to make your investment-worthy.

VISION

The best recognizable effect, we feel, is when members enter the market and decide to remain. It will be overwhelming for novices to the decentralized organic framework. We emphasize cultivating a stage that will construct an emblematic astronauts' adventure experience while additionally giving decentralized and passive income features that will entice newcomers to stay, whether as dealers or stage customers. We recognize that, by enabling this environment, we must also support the current vertical model's reasonableness. Our foundation intends to be risk free by providing a secure or trustworthy environment. Our vision is to assist those in need who have faced domestic violence or have been victims or targets of it, as well as those who are mentally or physically constrained or interrogated.

BENEFITS

Our platform intends to provide the following benefits to our investors:

•REDUCE TURBULENCE

•REWARD THE HOLDERS

•AVOID MARKET
MANIPULATION

•FULLY FLEXIBLE

•PROTECTING THE
HOLDERS FROM WHALE
MANIPULATION

•DRASTICALLY REDUCE
PRICE VOLATILITY

•SAFE AND SECURE

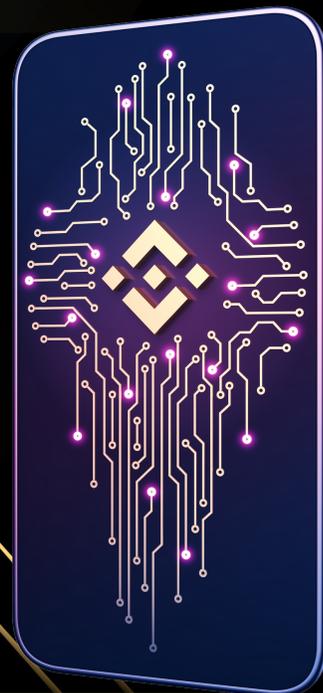

OUR WORKING PROTOCOLS

BINANCE SMART CHAIN:

Binance is one of the most well-known cryptocurrency blockchain in the industry right now. Binance has created Binance Chain, a blockchain network with a variety of features. Binance Chain was designed specifically for use with the Binance DEX. Its goal was to speed up transactions to binance. Smart Chain (BSC) is a blockchain network that allows smart contract-based applications to be executed. The following are some advantages of the Binance Smart Chain:

- Low transaction fees of as little as one cent
- Cross-chain Defi techniques that improve Defi interoperability
- High performance with a network capable of producing a block every 3 seconds
- Cross-chain Defi mechanisms that increase Defi interoperability
- A supportive Binance ecosystem that funds and bootstraps many Defi projects

HOW OUR ECOSYSTEM WORKS? - OUR THRUST SYSTEM FEATURES

HOW OUR ECOSYSTEM WORKS?- OUR THRUST SYSTEM FEATURES

STATIC BNBBACK REWARDS

Static rewards, also known as reflection, attempt to address issues with mining rewards. The amount of trading volume at any given time is directly related to the number of rewards. This system will provide holders or consumers with a more equitable, fair, and exciting experience. We want to present a platform for participants to earn passive income. Along with empowering crypto fanatics all around the world, they will earn 5% of every transaction.

Exchange charges from trading orders are shipped off the BNB award with the most noteworthy ROI. We need to introduce a mat free stage for clients so there will be no cases required. BNB is sent consequently to holders like clockwork. To build your profit, you essentially share with your loved ones regarding this coin. The more foothold it gets the more BNB you acquire. Hold tight close to your \$BNBBACK and watch your wallet develop.

TOKEN LOCK AND LIQUIDITY LOCK:

Every trade contributes towards auto-generating liquidity that goes into multiple pools used by exchanges. If liquidity is unlocked, the token developers can engage in the famed "rug pull." Like almost all other coins, a percentage of all buy & sell orders contributes toward automatically generating further liquidity on PancakeSwap V2. Our Platform offers our users a liquidity-locked system by locking 2% of the supply for one year. Liquidity is locked by delivering liquidity pool (LP) tokens to a time-lock smart contract and relinquishing ownership for a set length of time. Developers cannot recover funds from the liquidity pool unless they own LP tokens. This gives investors assurance that the token developers will not abscond with the liquidity funds. It is now standard practice for all token creators, which distinguishes a fake currency from a legitimate one.

HOW OUR ECOSYSTEM WORKS?- OUR THRUST SYSTEM FEATURES

MARKETING AND BUYBACK

One of our mission is to bring reforms to the platform from time to time and not just leave the platform development after launching it for public use. It is the reason that we are not offering total supply to the buyer but also setting aside a certain % for developmental purposes of the platform for updating it and also to expand our community on a greater level for fulfilling the marketing strategies we have planned.

The BNBACK token has a buyback feature in which 3% of BNBACK tokens are buyback to maintain the stability of our platform. This part of the tax % is for both marketing and buyback features on our platform. The primary distinction between stock buybacks and cryptocurrency buybacks is that the latter is executed and guaranteed automatically

PASSIVE INCOME SYSTEM

The very first PASSIVE INCOME calculation takes important elements of each plunge and holds on to purchase up the edge point until the cutoff is reached. This element gives a remarkable and imaginative state of procuring easy revenue This is the very first kind of code at any point sent on Binance Smart Chain and its new component will undoubtedly make this coin publicity previously unheard of.

HOW OUR ECOSYSTEM WORKS?- OUR THRUST SYSTEM FEATURES

MAKING REVOLUTION

We are here to make an upheaval, to deal with what's significant, and to arrive at new statures. We support the thought of making costs go up of \$BNBBACK, the assessment will consequently increment and abatement relying on its foothold. Yet, have confidence, with the THRUST include assisting the market with evaluating to arrive at levels unrivaled by some other. This guarantees the achievement of the coin and forestalls cutting down the cost of the coin.

SLIPPAGE TOLERANCE?

Slippage tolerance is the amount of price slippage that you will accept for a trade. When you set slippage tolerance, you specify how many tokens you will accept if the price rises or falls. The BNBBACK token's slippage tolerance is set at 9-10%.
