

The background is a vibrant, stylized illustration of a medieval fantasy world. In the center, a large, ornate castle with multiple towers and blue conical roofs sits atop a hill. The sky is a deep blue with scattered white clouds and a few birds. In the foreground, several knights in full plate armor and red capes are engaged in combat on a grassy field. One knight in the immediate foreground is seen from the back, looking towards the battle. To the right, a large wooden siege engine, possibly a catapult or ballista, is shown firing a flaming projectile. The overall scene is one of intense action and epic scale.

CryptoGladiator

Whitepaper V2.0

Play-to-Earn

Crypto Gladiator is the RPG trading game where anyone can earn tokens through skilled gameplay. Players can combat, collect and occupy land to maximize passive income.

Gladiator

All gladiators are divided into 5 levels according to their scarcity, each combat allows up to five gladiators to participate

Combat

Upgrade gladiators by getting more exp in unlocked game levels

Recruit

CGD are used to recruit gladiators, orange gladiators are rarest

Market

Trade equipment or gladiators without any limit to earn interest

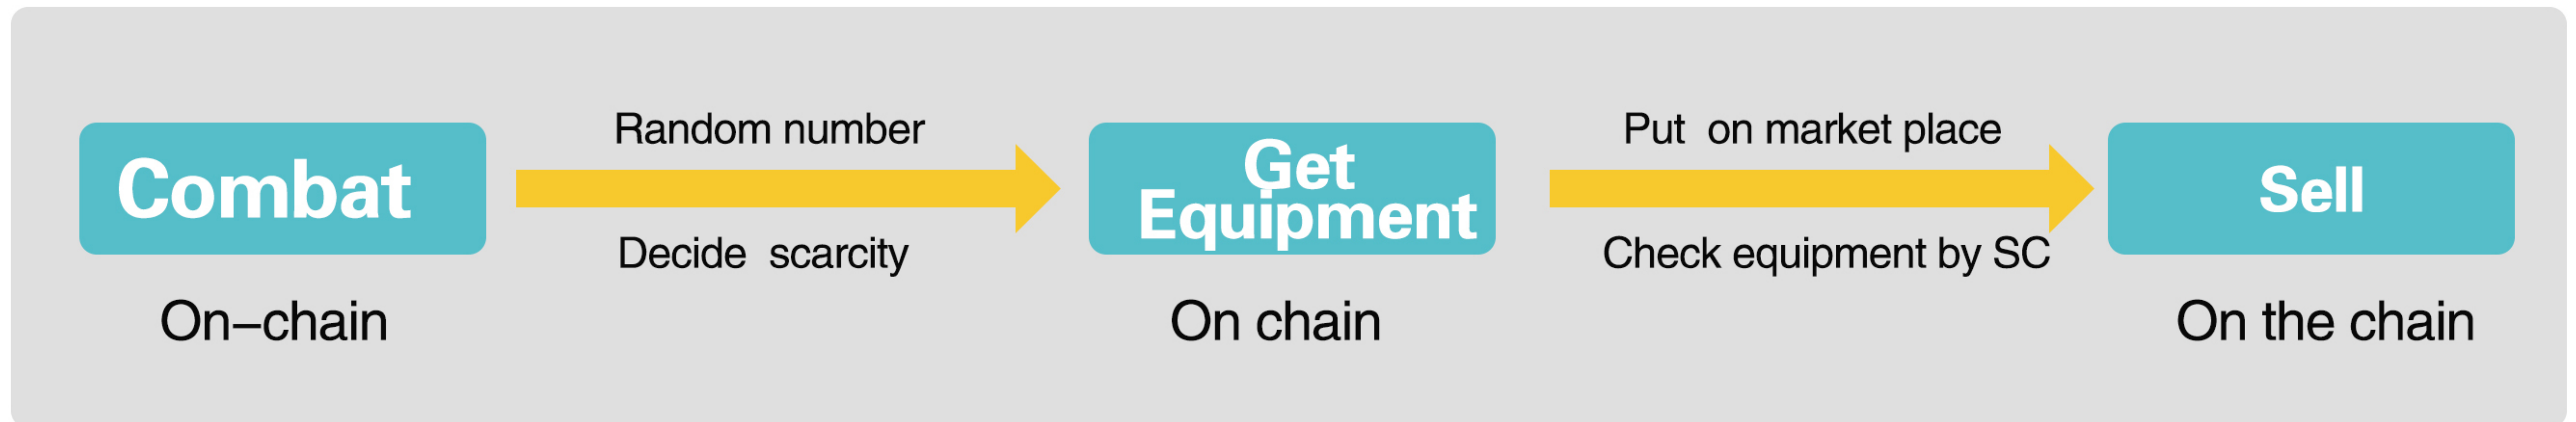

Land

Occupy enemy's land to continuously generate game assets, the winner takes all

Game On-chain

In game industry, developers can be manipulative by arbitrary issuance of resources for considerable revenue in short-term, which caused damage to users' assets

Crypto Gladiator is a fully on-chain game. The process of generating all gladiators, equipment, tokens etc. can be transparently traced back. It is impossible to be tampered or cheated, enabling all the game items to be real assets

NFT Equipment

Every gladiator and equipment can be transferred to multiple blockchains as NFT with uniqueness, the attributes along with them are generated randomly

Uniqueness

In order to ensure the value of each gladiator or equipment, the way to get them is relatively difficult

Scarcity

Players need CGS to start Endless combat to get advanced equipment at the end, since it requires CGS, the scarcity and value of equipment is guaranteed

Cross-chain

With the cross-chain deployment and the development of ecosystem, each NFT can be available on multiple chains, making all the assets more circulating

Proprietary Game Side Chain

Crypto Gladiator adopted the proprietary side chain to make sure players have the best user experience.

High performance

The proprietary side chain makes the response of the contracts faster with lower trans fee

Easy Integration

The game side chain share the same underlying tech architecture, meaning it is able to be integrated with any other chains easily

Scalability

Without the limit of TPS on other chains, players can have the best experience without worrying about the congestion or high gas fee

Transparency

All processes are fully transparent, api and block explorer will be available

Stability

Due to immature tech architecture and token economy, most public chains are encountering problems of congestion which could result in the malfunction of DApp built on it. The side chain will separate the management of game and the performance of public chains to ensure the stability

Training

Upgrade

Gladiator can be up to 70 levels, more attributes will be unlocked during each upgrade

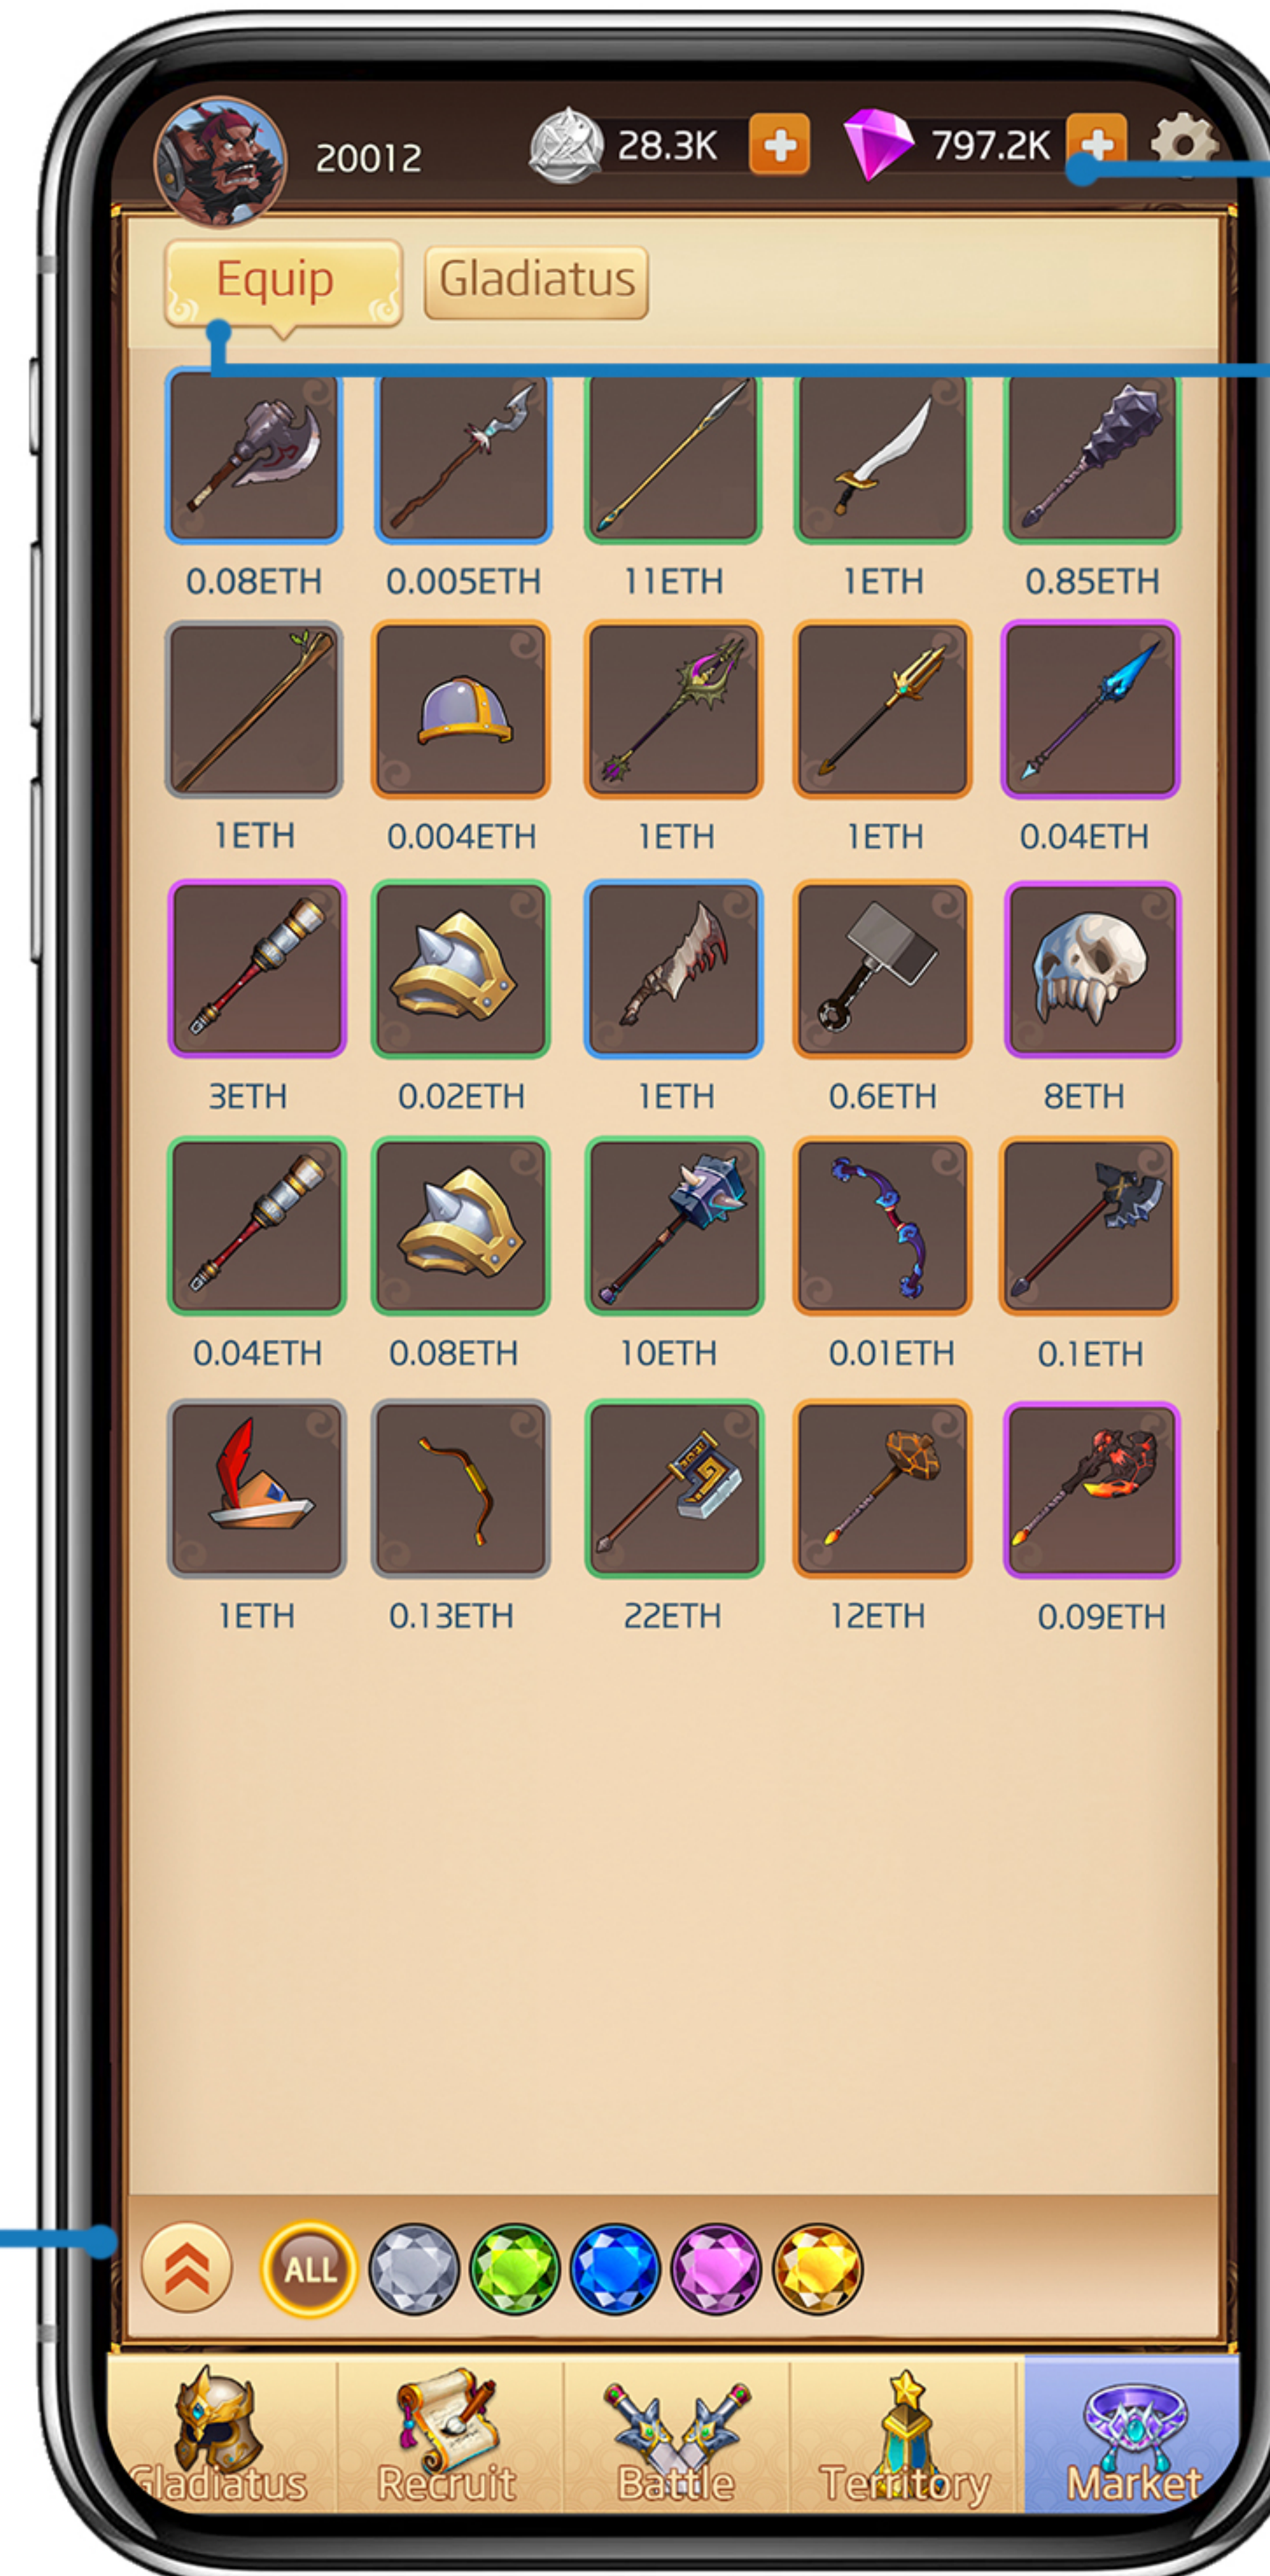

Attack: The damage that it causes, can be reduced by the defense

Defense: Reduce damage caused by attack

HP: Gladiator will be killed after HP hits 0

Levels

Different color of CGD means different levels of gladiators or equipment

CGD

Can be used to recruit or upgrade gladiators, obtained by completing daily tasks or inviting friends

Equipment

Each gladiator can be equipped with weapons, armors or accessories to improve their attributes

About Gladiators

Equipment

Each gladiator has weapons and armors which are also divided into 5 levels, the higher the level is, more attributes will be equipped

Weapons

Weapons can increase attack power, advanced weapons carry special attributes for additional skills, improving the combat effectiveness

Attribute

Each gladiator has at least one attribute, which helps with the performance in the combat

About NFT

Hundreds of equipment are provided, all of them are divided into 5 levels — **NORMAL**, **ADVANCED**, **SCARCE**, **ELITE**, **LEGENDARY**. More equipment will be created for better combat experience.

weapons

Gauntlet

Shield

Belt

Cuish

About Equipment

Weapons

one-handed, two-handed, ranged, polearm, only one-handed weapons can be equipped with shield

Equipment

helmet, armors, scapula, gauntlet, cuish, belt, each equipment has special attributes to strengthen combat effectiveness

Attributes

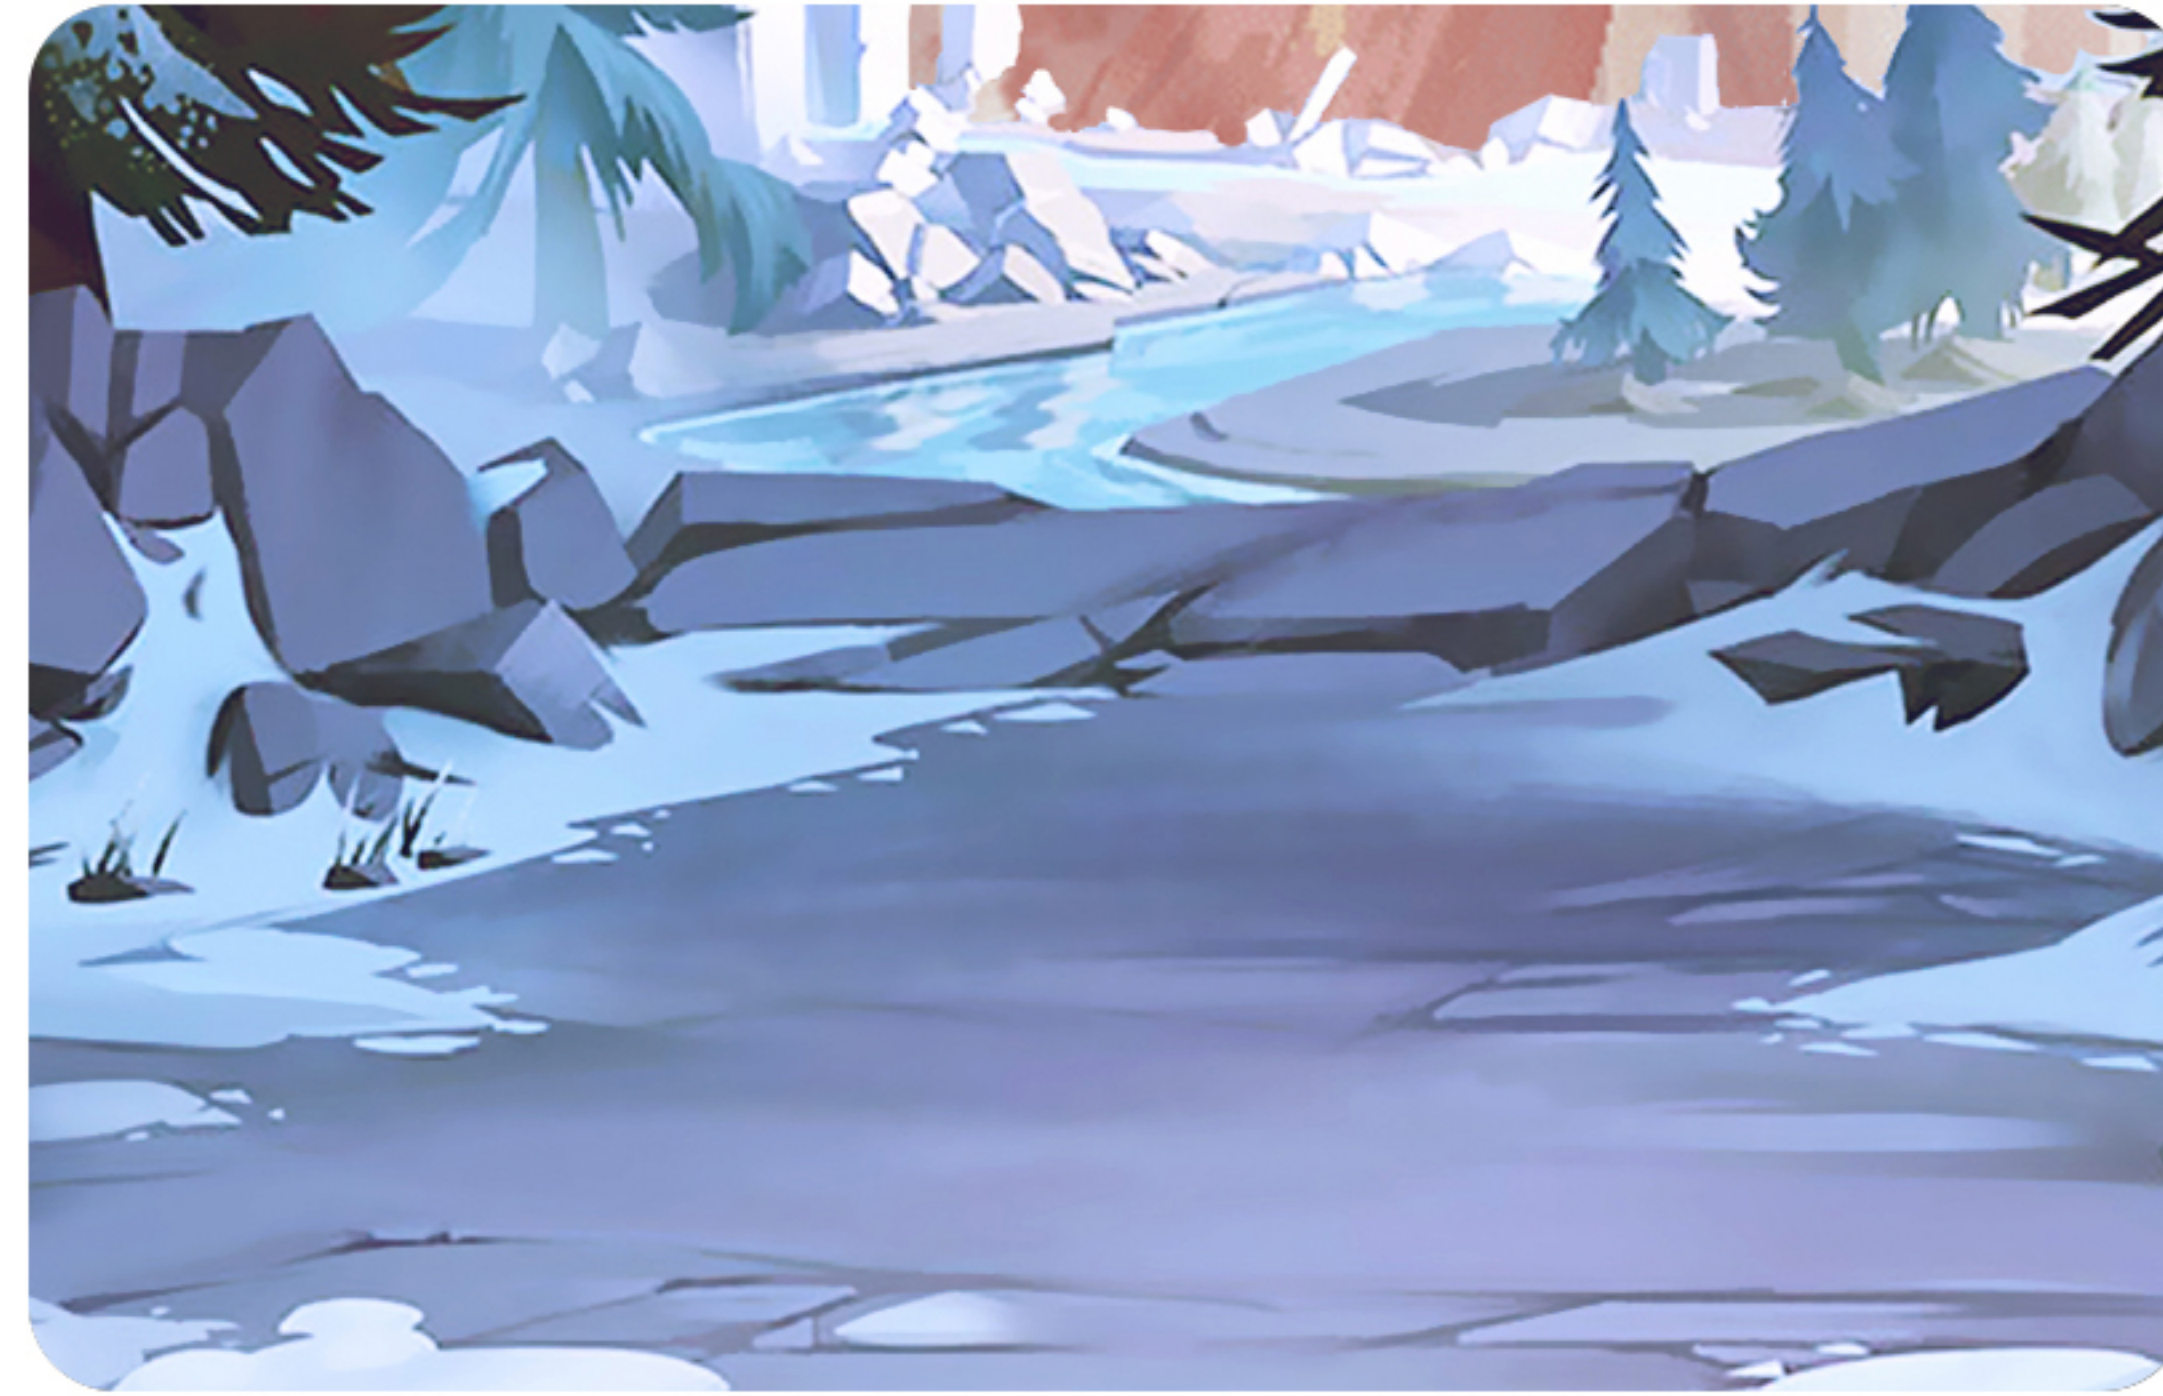

Attributes are related to the scarcity of equipment, more attributes are available if the equipment are more scarce

Cross-chain

Equipment can be created on-chain at anytime

Combat Fields

2 types of combat fields have been available so far, there would be more combat fields unlocked as players move up to higher level

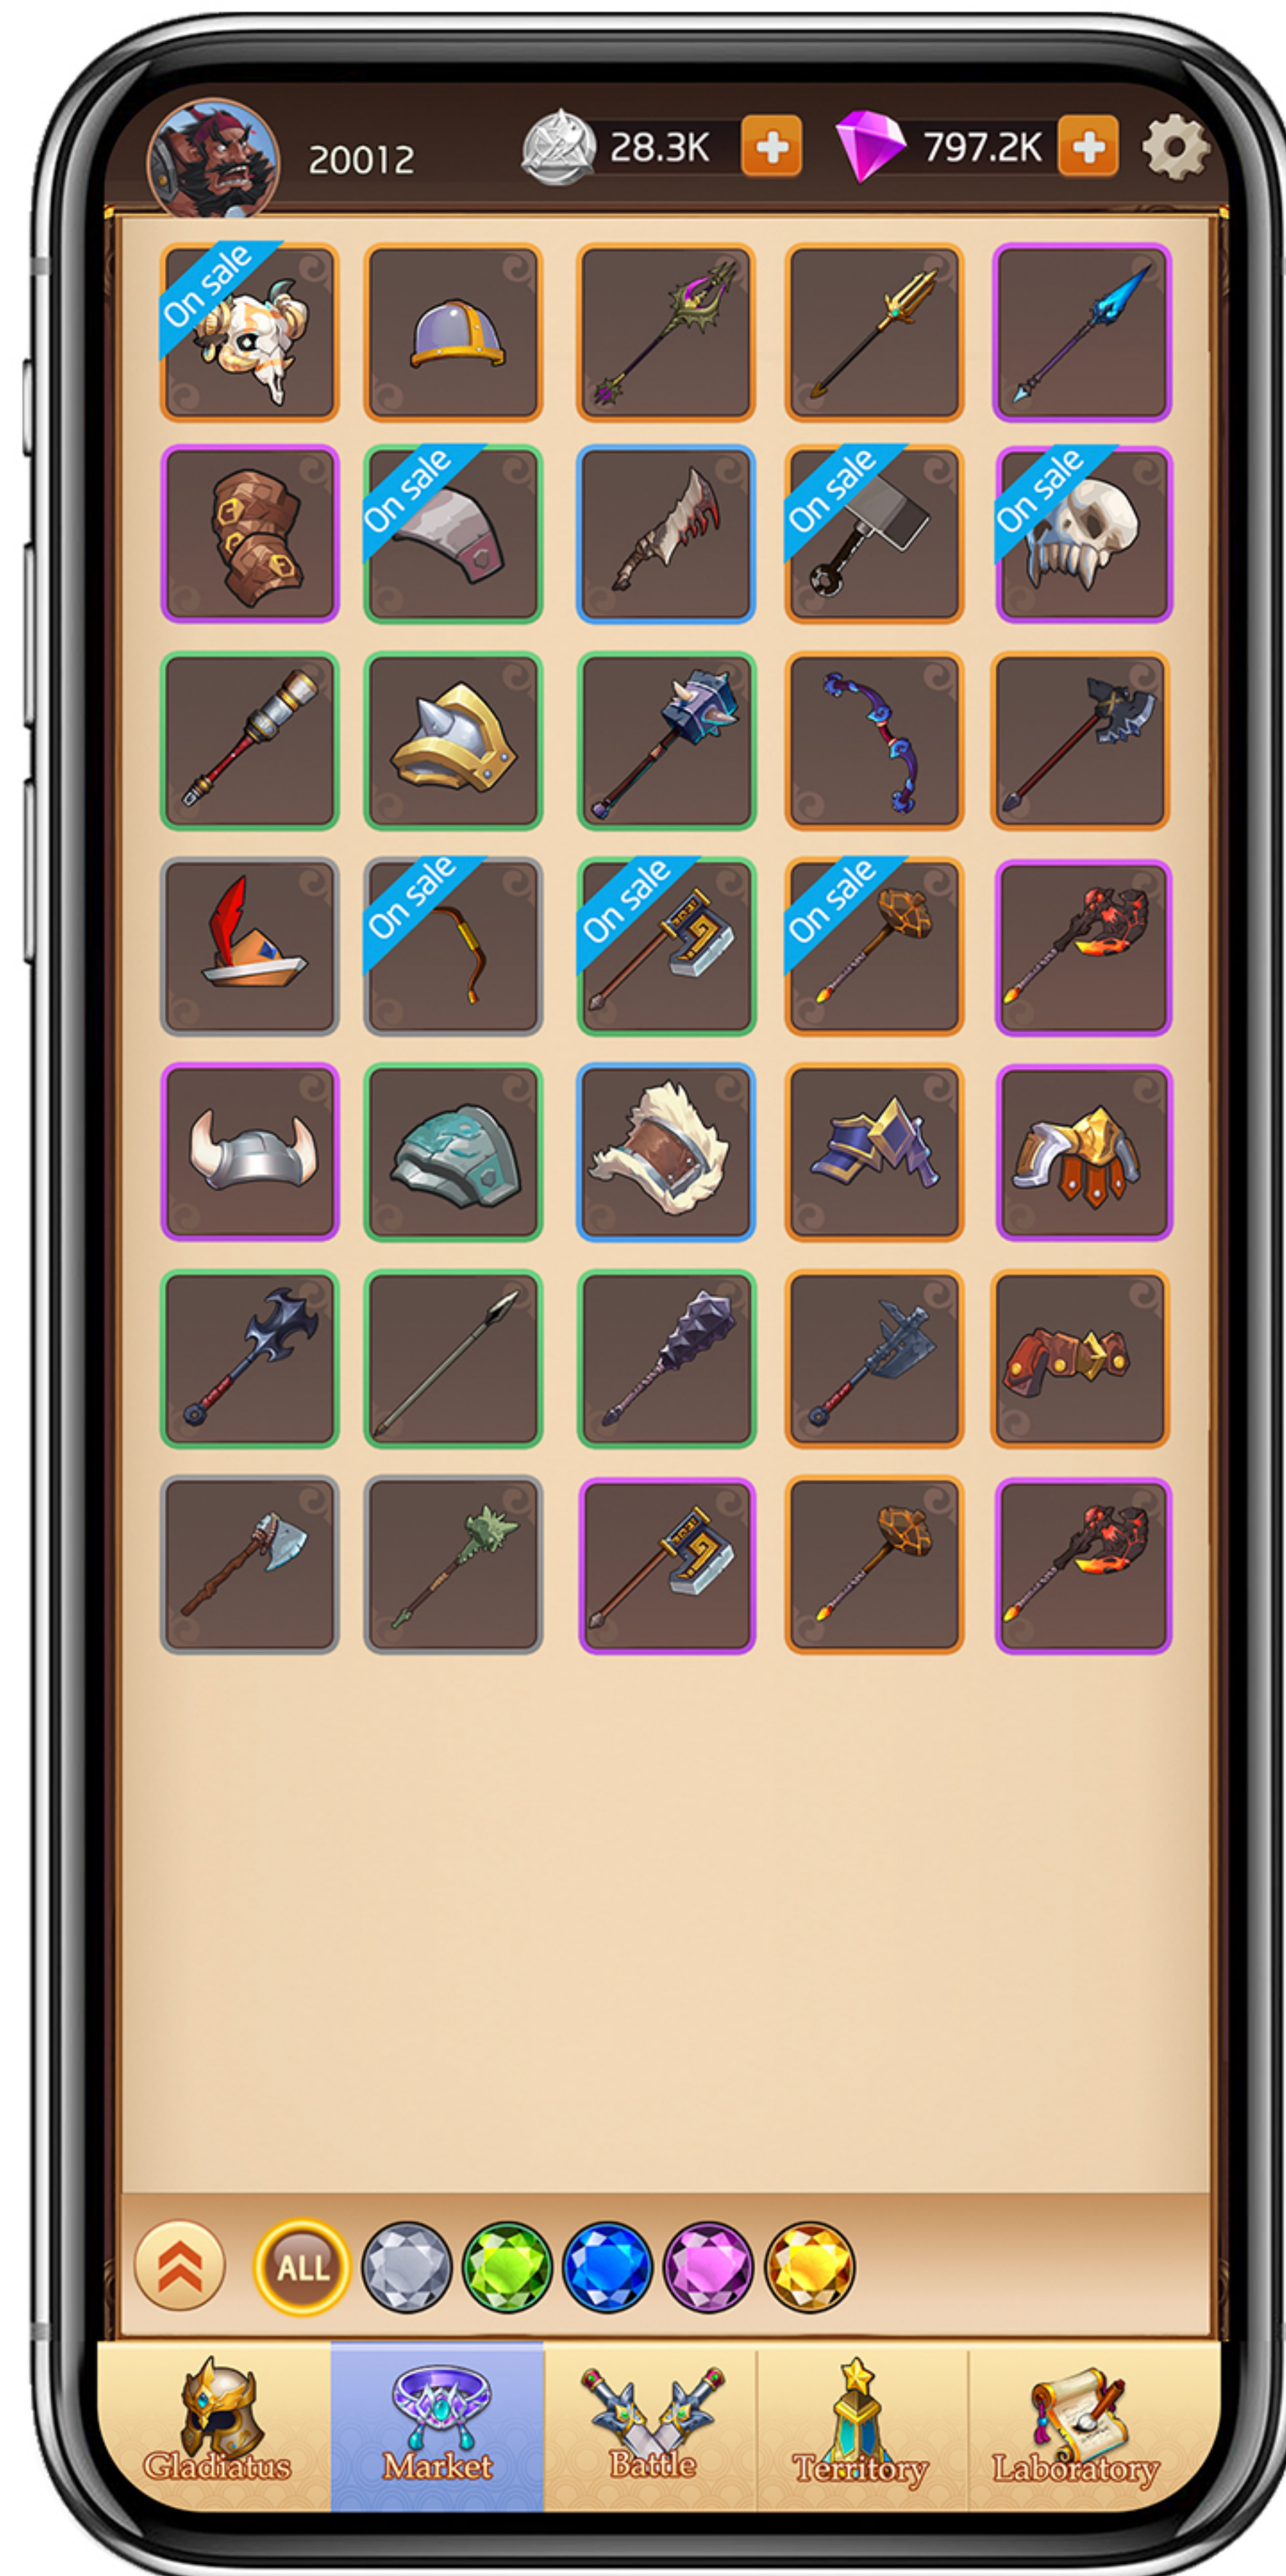

- Players are able to gain exp and basic equipment by exploring unlocked combat fields, more exp are accessible when level up
- Scarce equipment have been offered in endless levels, it's more possible to get scarce equipment as levels move up

High-interest Land

Earn continuous profits by occupying the land Players can occupy enemy' s land to be theirs
Other players can combat for the land as well More lands represent more profits

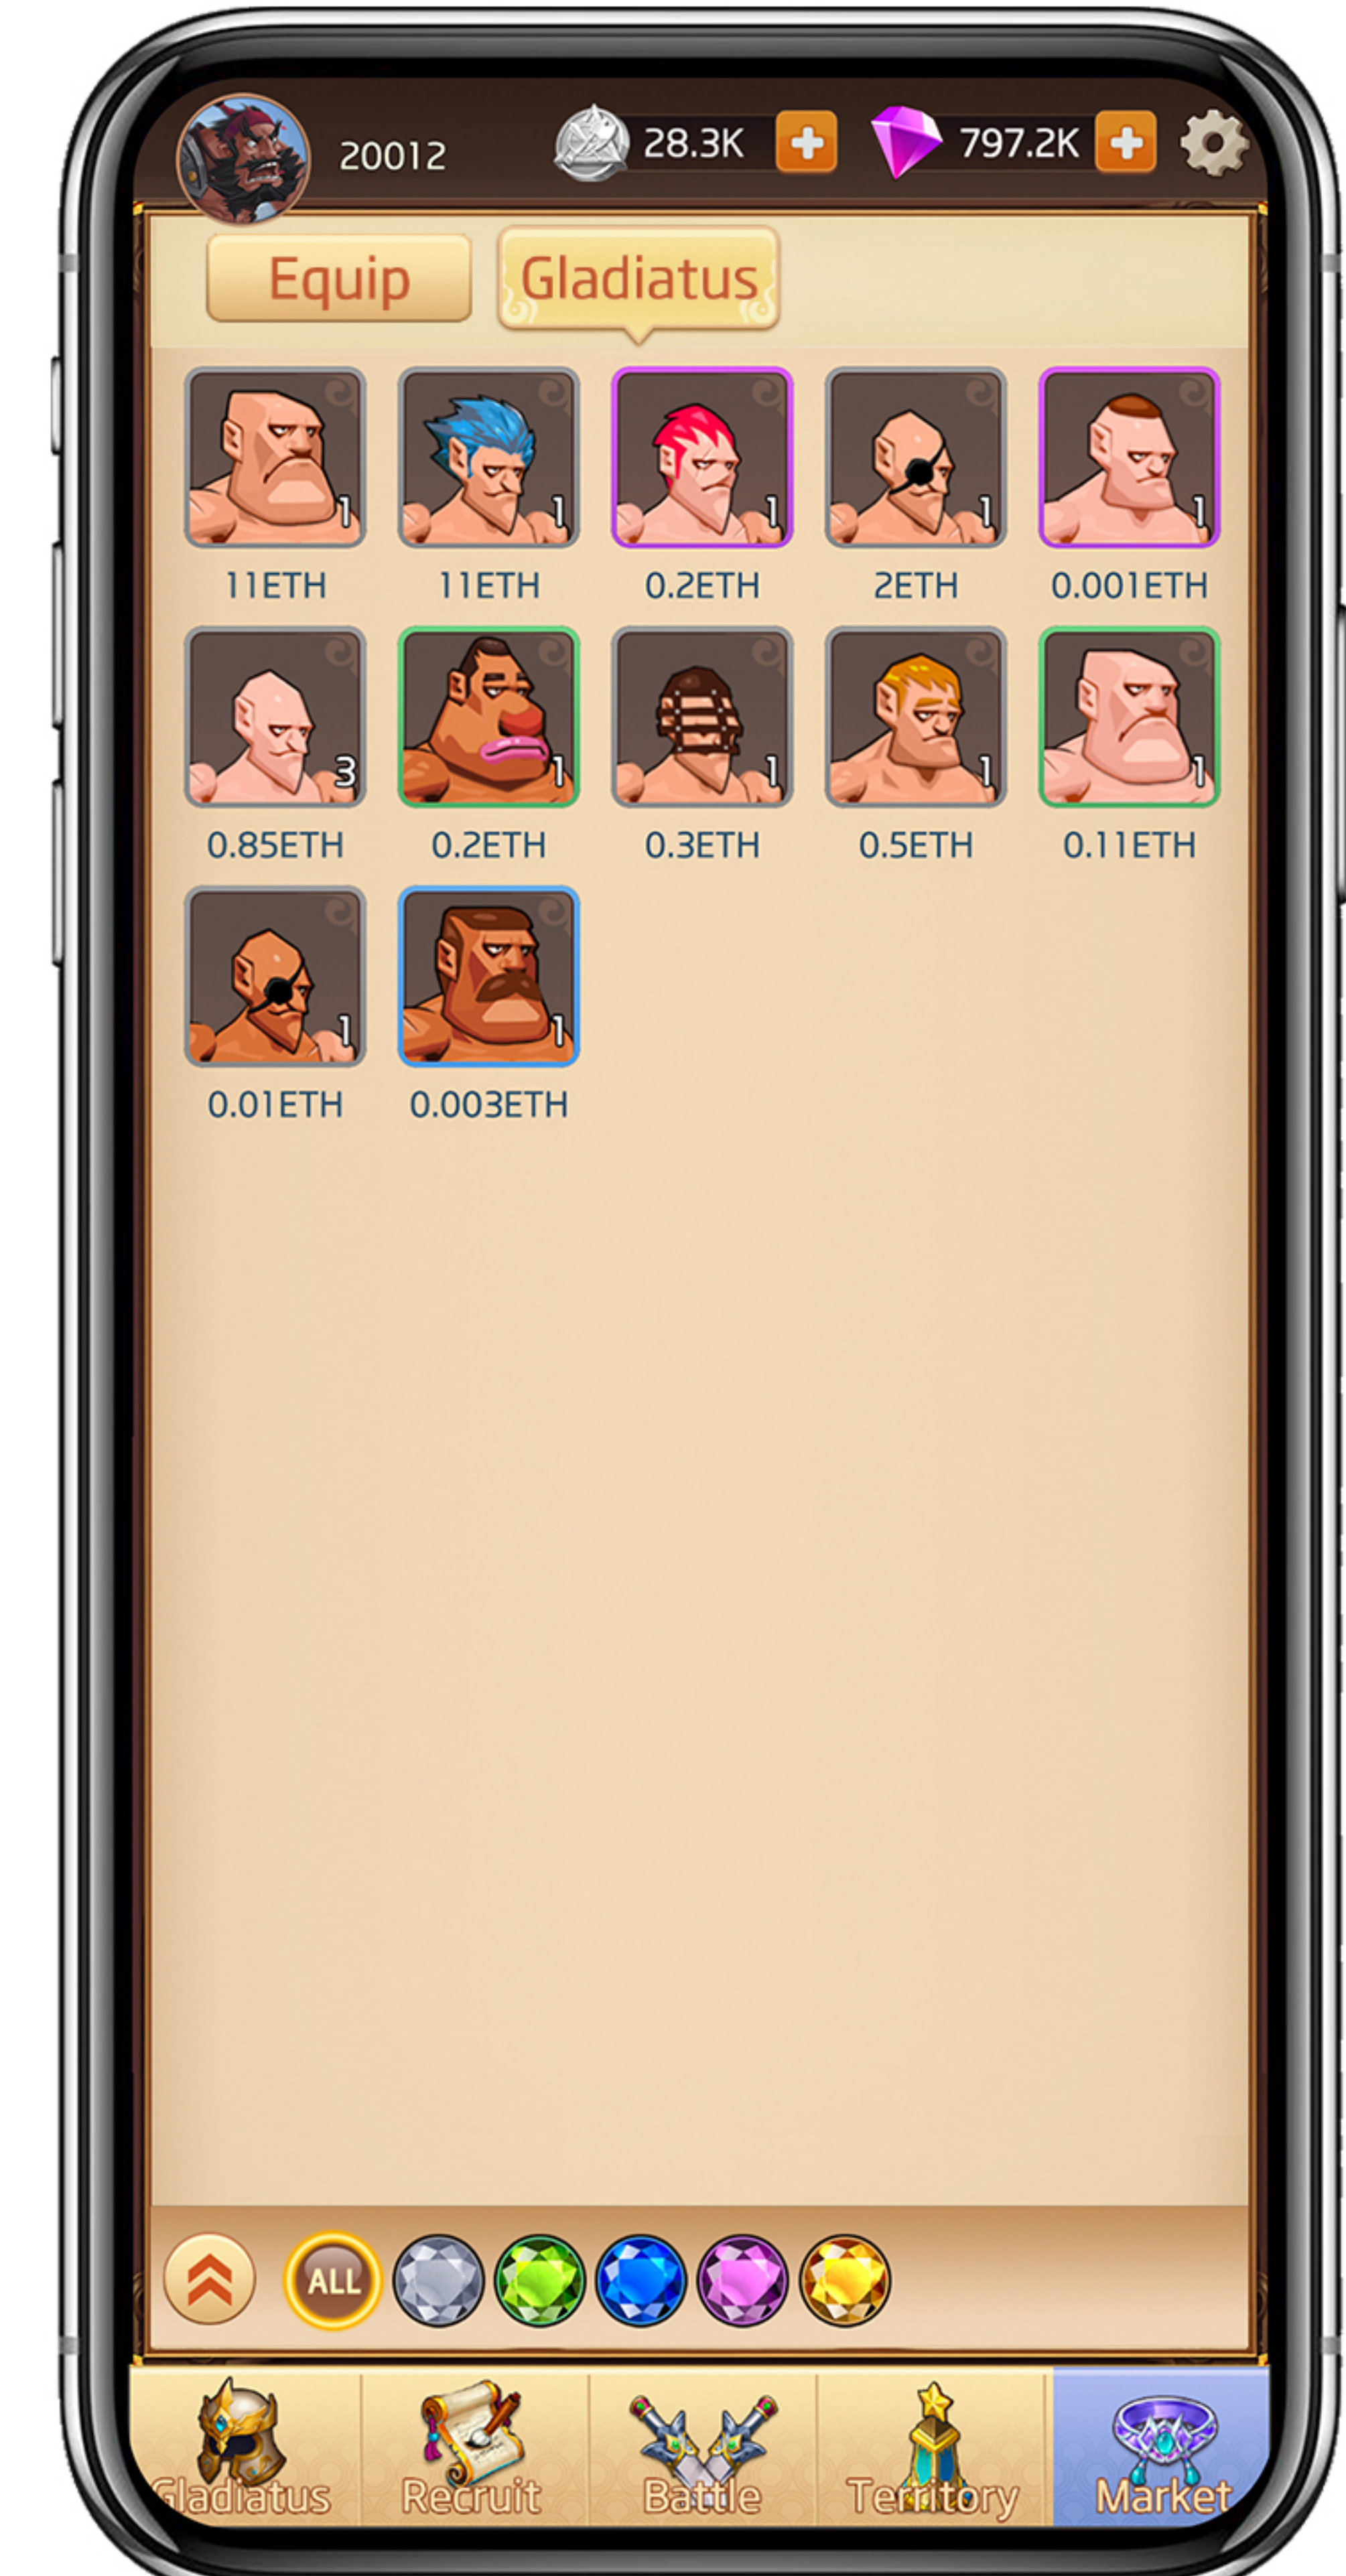

Market Place

Fully On-chain

All equipment, gladiators can be freely traded and circulated on market place as NFT assets

Unlike traditional games, players are able to trade through smart contract, all transaction are recorded **On-Chain**, which is completely transparent and secure

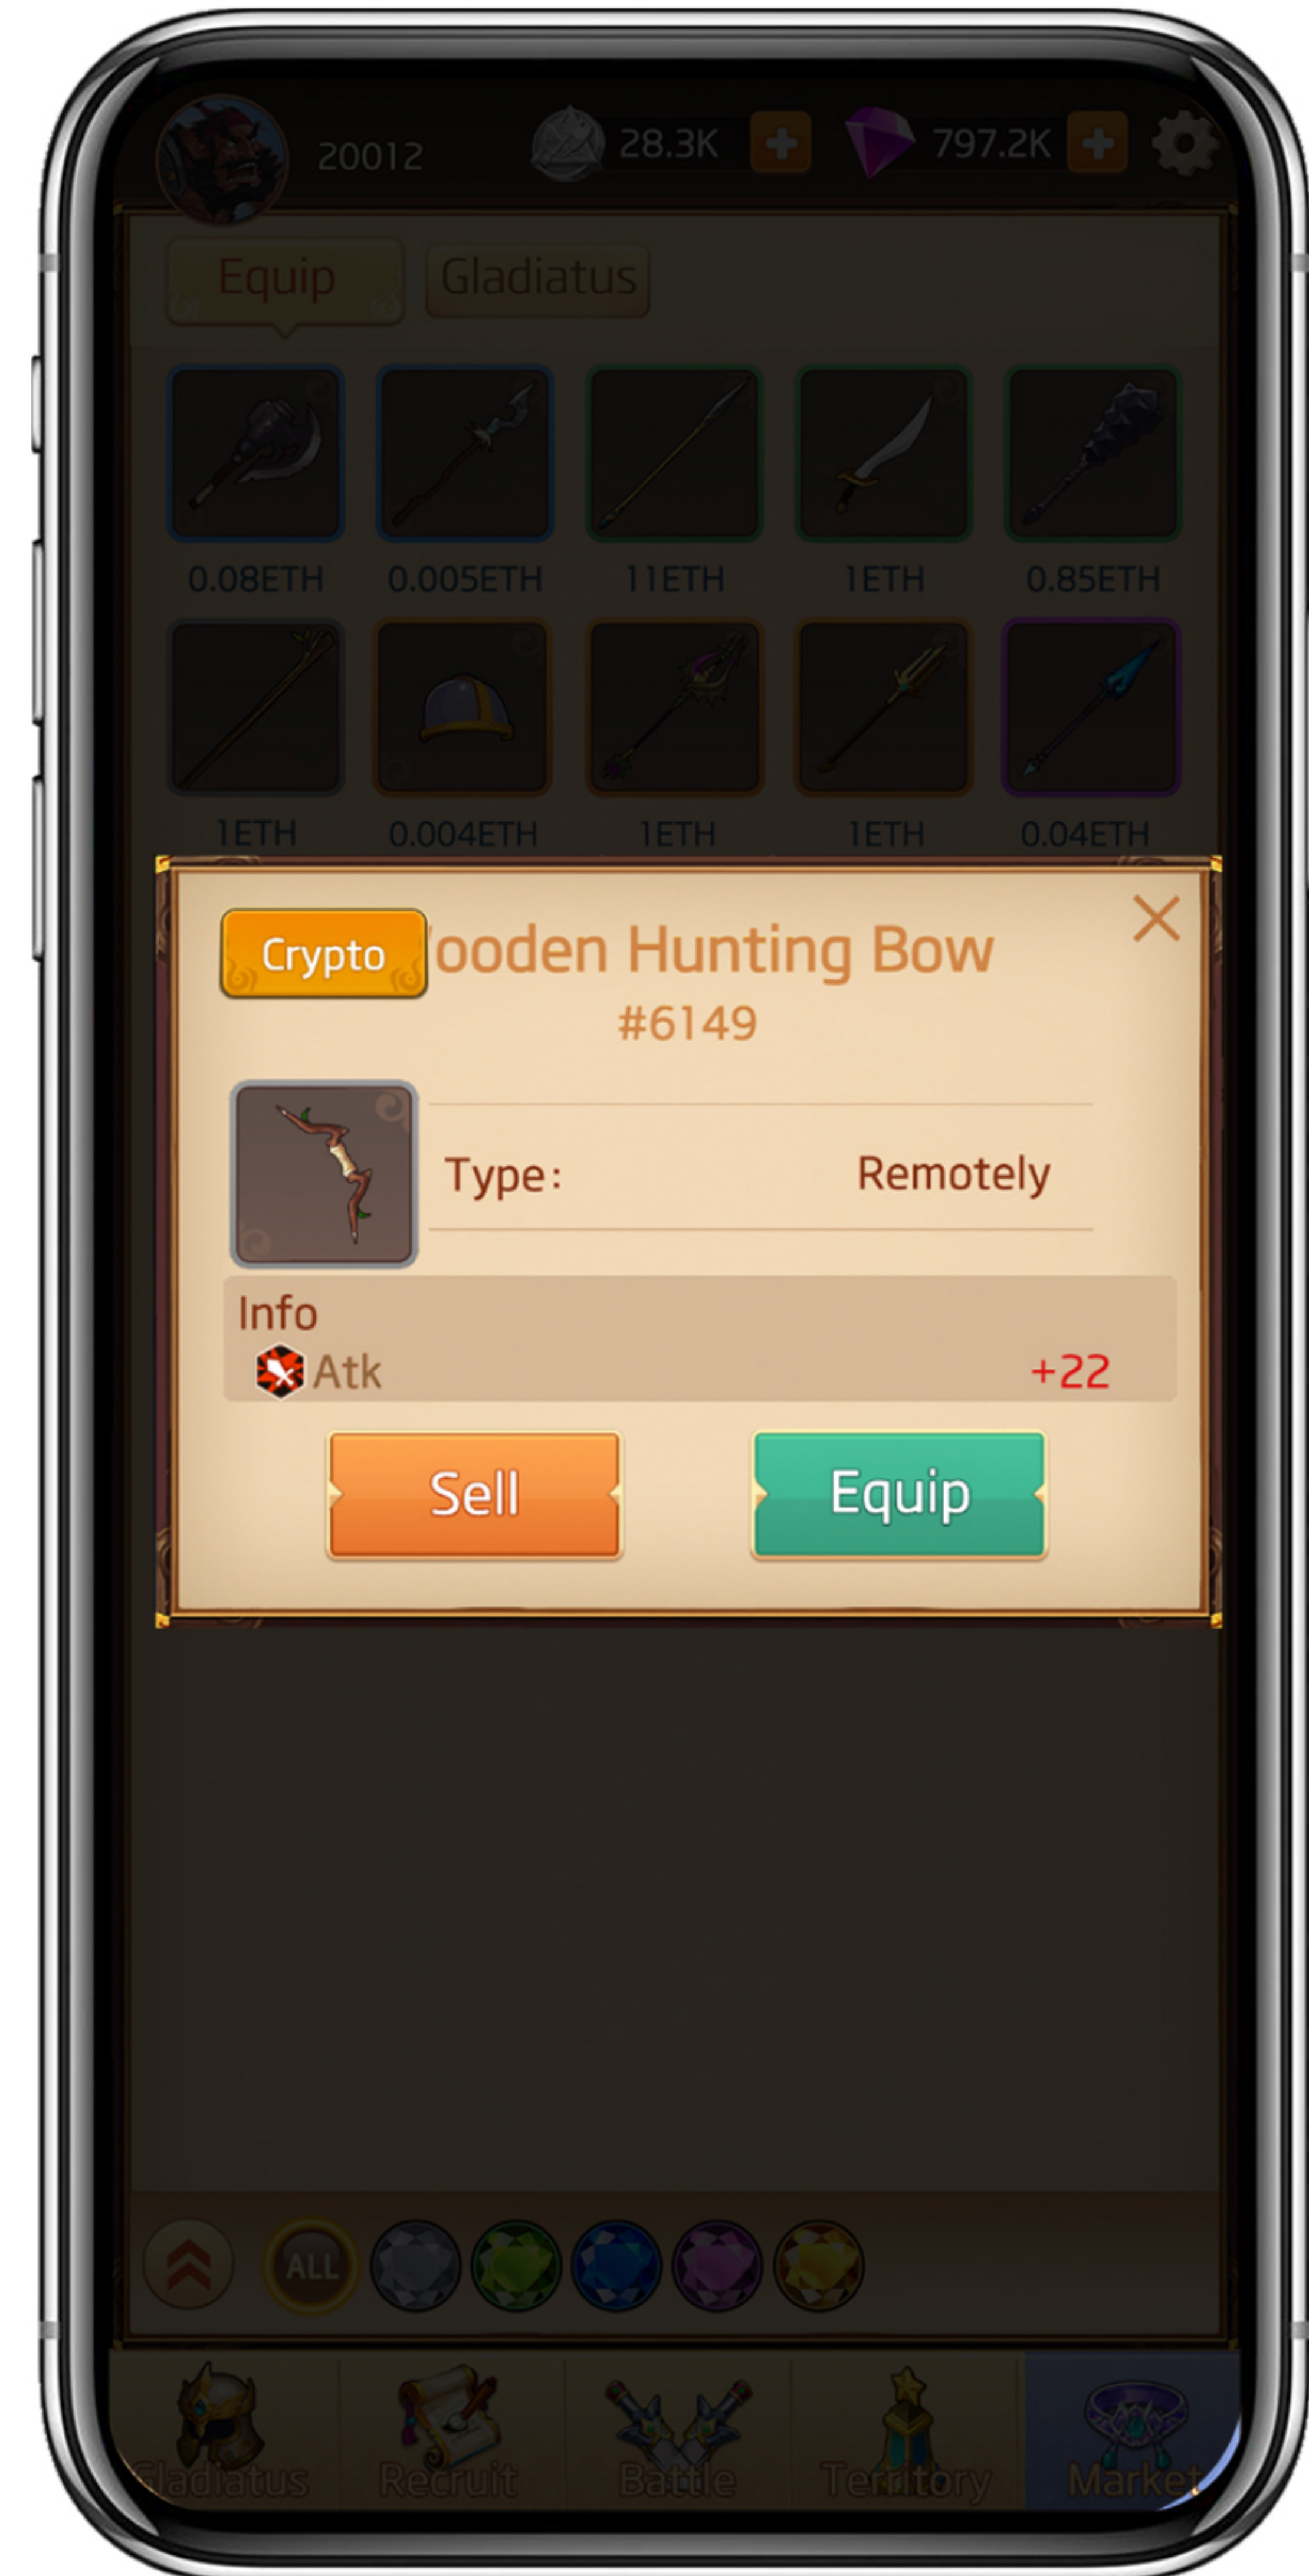

Features

All items are created as NFTs with **Uniqueness** and **Scarcity**, multi-platforms are available in different chains

Exquisite combat fields make the game **Entertaining**, more scenarios attract more users to participate

Market place is available to trade **Gladiators** and **Equipment**

Token Economy

CGD & CGS Token System

CGD

Crypto Gladiator Diamond  (CGD) The supply depends on users, CGD are generated by completing daily tasks, combat and other missions. Certain scenarios, eg. selecting combat fields or gladiators require CGD

CGS

Crypto Gladiator Shard  (CGS) Total supply is 3100M, mostly used to start endless combat for advanced equipment part of income (CGS) generated in game to team will be locked

CGD Token

CGD tokens are circulated in game, can be transferred or purchased to buy scarce equipment

Get CGD

Players can get CGD by logging in, to earn more, they have to complete daily tasks

Referral reward

Refer to friends, earn more CGD as rewards by completing tasks together

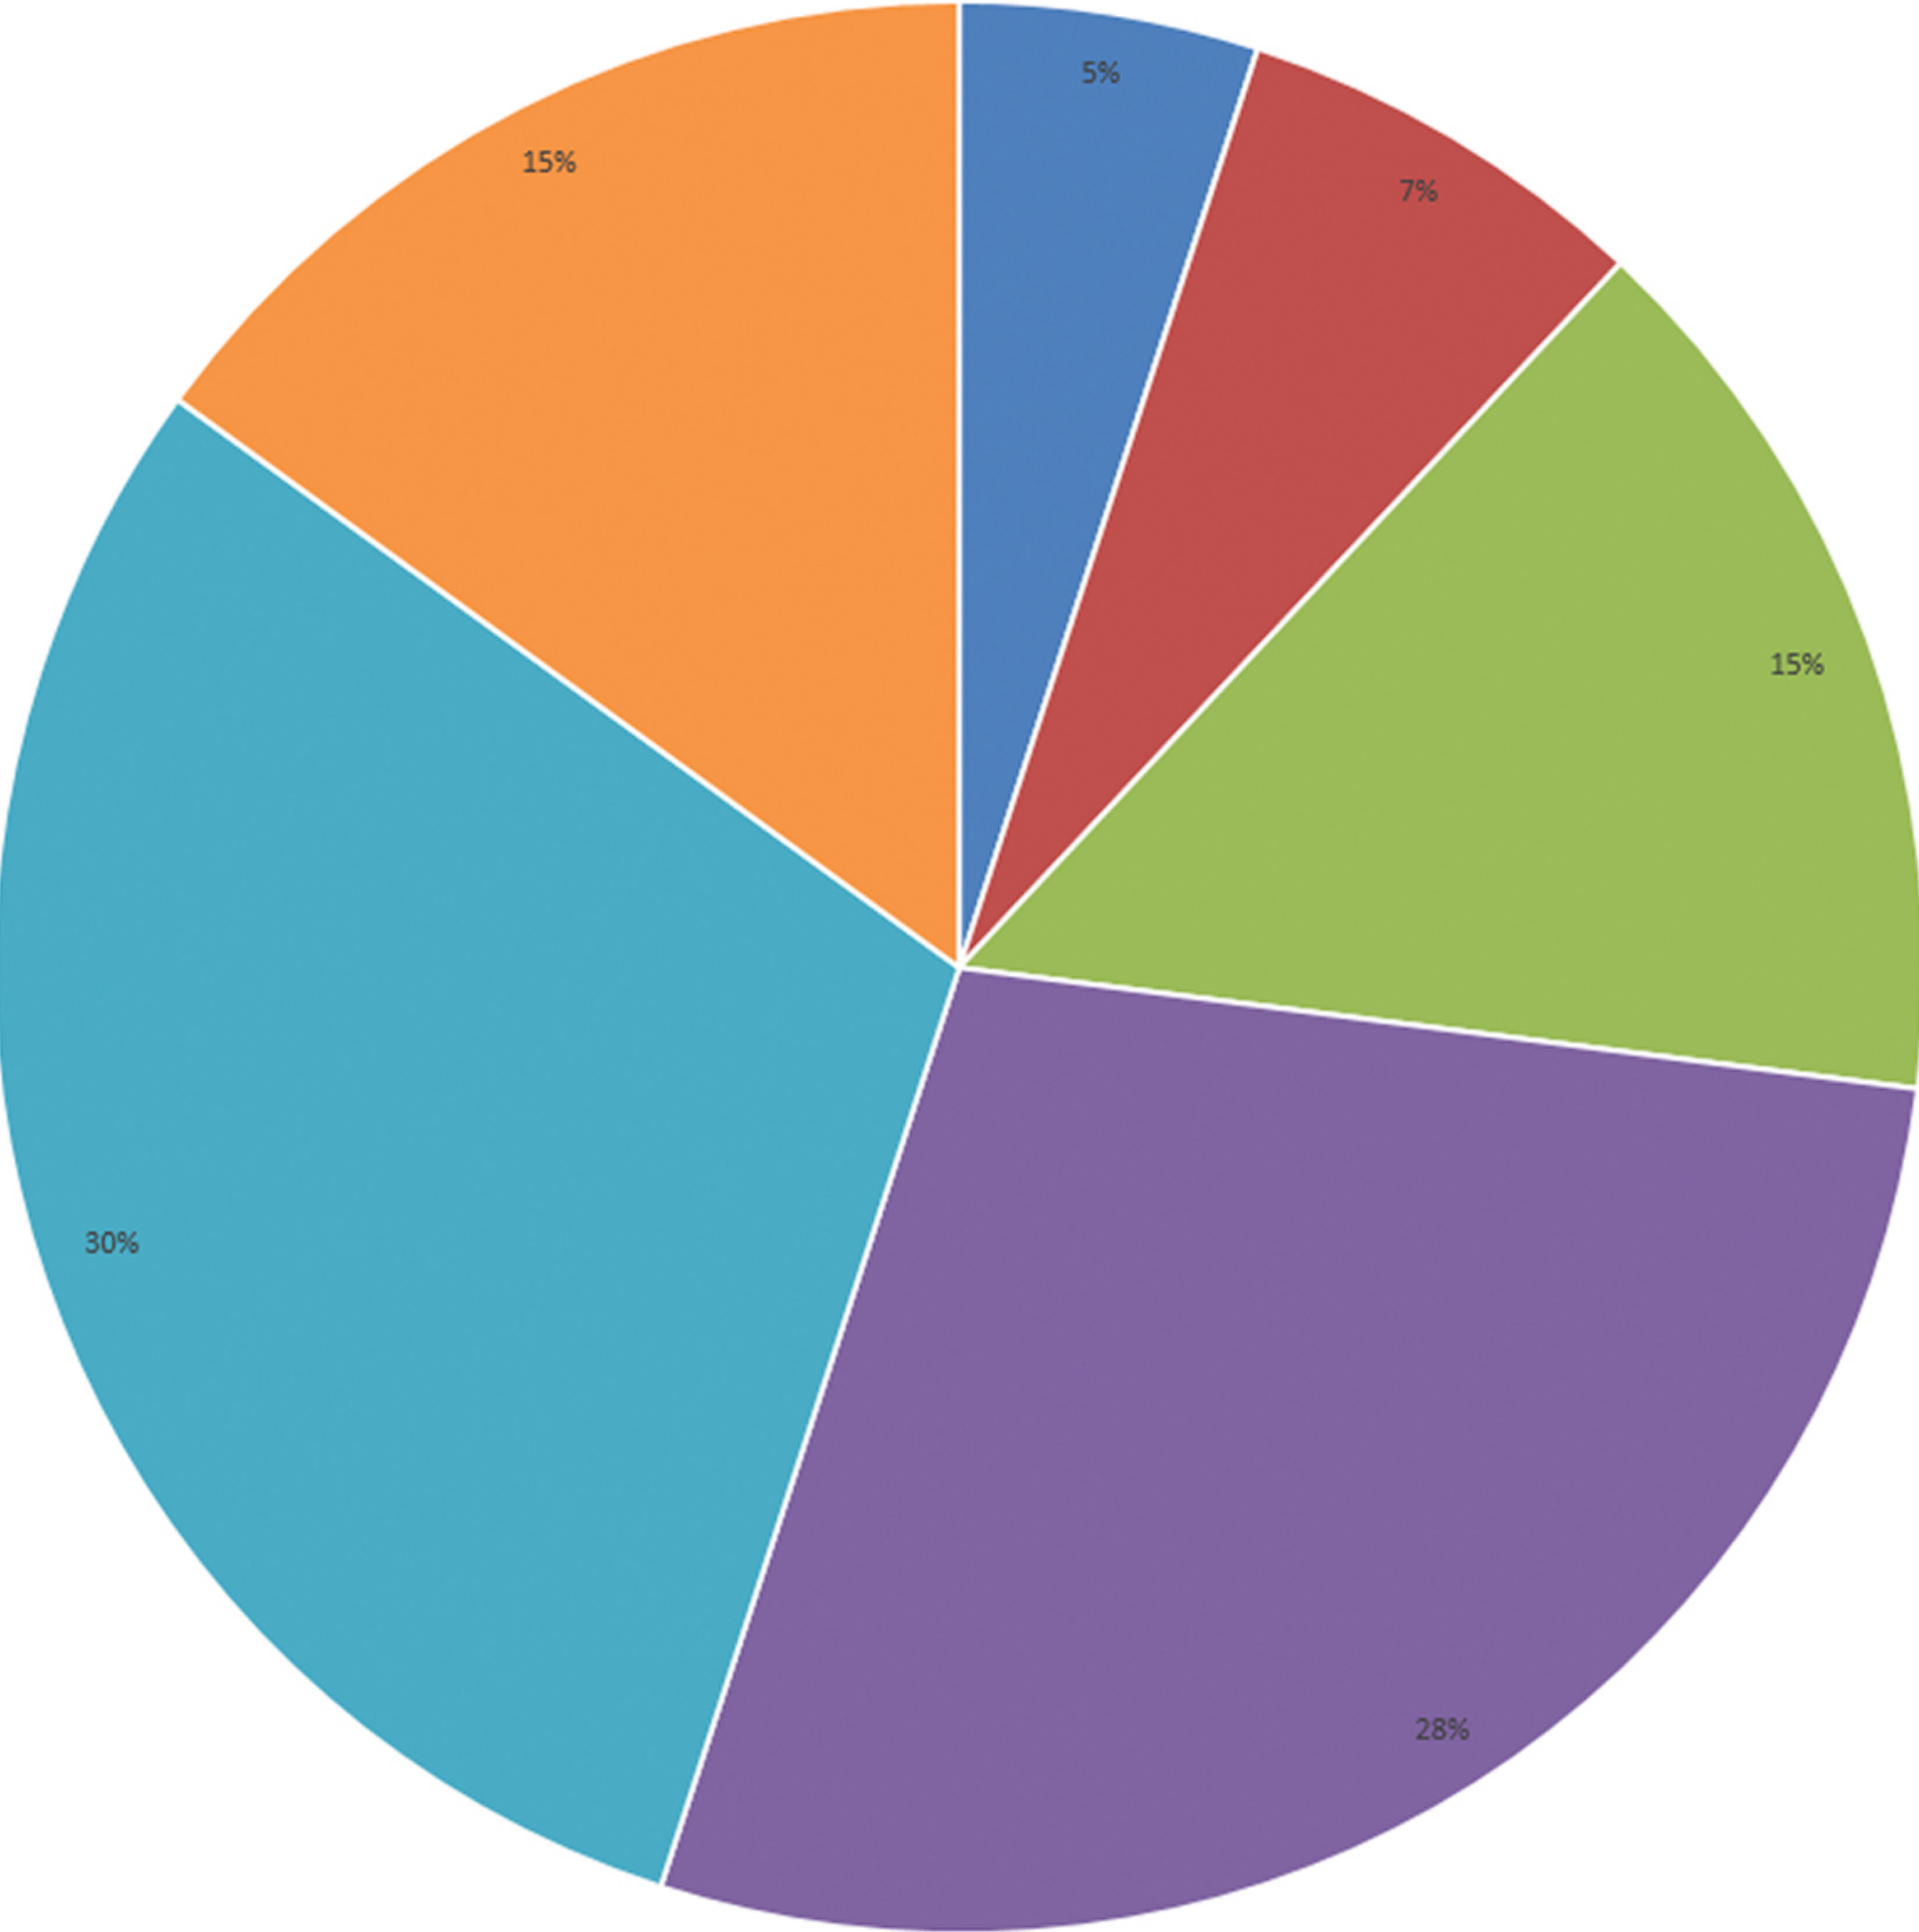

CGD Utility

CGD offers the chance to get gladiators to combat

Upgrade gladiators with more combat effectiveness by paying CGD

Use CGD to combat for lands, which makes continuous profits possible after the victory

Distribution & Release

5% Early investor released in 3 years

7% Marketing & Operation released in 3 years

15% Team released in 3 years

28% Eco Fund released in 5 years

30% Game Reward of which 50% is released in 1 year, another 50% will be linearly released

15% Staking of which 50% is released in 1 year, another 50% will be linearly released

Eco fund will be used to build a better ecosystem and incubate more IP games, making NFT assets more circulating. Players are able to get reward at early stage to upgrade gladiators, equipment and expand land, CGS will be distributed as reward to the land owners

Roadmap

Crypto Gladiator gameplay is still actively developed and will keep releasing and updating in phases coming

2021 Q3
Official launch

2021 Q4

Land NFT
Generate gladiators & equipment on SC
On-chain & Open-sourced

2022 Q1
Migrate to side chain

2022 Q2
CGS Staking

2022 Q3
CGS Governance

2022 Q4– Early 2023
CGS Eco building
More IP games
More scenarios
