## Overview

*„Without the need for a third-party intermediary, money can be secured, and transactions can be done easily.“*

Bear in mind this famous and well-known quotation by Satoshi Nakamoto.

Easy Exchange Pro is an Online exchange platform facilitating the trade of VFA (Virtual Financial Assets) where you can trade numerous cryptocurrencies in a simple yet professional way. This whitepaper introduces the initial offering of a new utility token, GABUR Tokens, whereby such token will be used on Easy exchange pro as well as exchange platforms.

Furthermore, having products designed for trading as other platforms do, we will pave our way towards strengthening financial freedoms all while being transparent and law abiding. We are trying to come up with innovative ideas that shall help people enjoy the benefits of the revolution arising from the wide spread digital currencies, which will sooner or later become ubiquitous for business and the economy.

## Introduction

We have conducted several surveys in different countries where the figures proved that a significant sample of users is initially frustrated by the complexities faced in the platform's environment. Therefore, we figured out the need to simplify the environment of the platform and categorize topics to facilitate the use of such platforms by the new users. We have also figured out the necessity to keep them updated and organized training sessions to keep them on track. Financial freedoms had their hand-tied up due to many factors threatening their unleashing including but not limited to, banking restrictions, uncertainty about regulations, time consuming banking operations, difficulties faced while buying or selling digital currencies with Fiat, the poor banking system in underdeveloped countries, and the high withdrawal fees. Accordingly, 60 countries approximately around the world lack access to enjoy the benefits resulting from digital currencies, which may be a significant obstacle restricting the expansion of financial freedom.

We have got right what you need! We offer you the Easy Card solution, a card you can purchase in cash from your nearest Broker. Through this card, you can deposit GABUR tokens directly into your wallet on Easy Exchange pro without having to go to the bank or use a credit card.

In addition, we also support both, public and private corporations, in purchasing, investing, trading, or settling any payment for business purposes in GABUR or other currencies through Easy Card Desk. As the market value of digital currencies is growing, so shall we! We realized the need to build up the right platform that is easily accessed by all the people all around the world. That being said, with the absence of the right environment for public access comes an ever-widening gap for financial exploitation enthusiasts.

We are grateful and appreciative of the fact that so many of our customers share the same purpose as ours and have continuously supported us through the time of private sale and public sale. This platform shares our vision for the future of digital assets and we welcome our new users, or should we say family members, to join us as achieve mutual growth.

## Our team

Easy exchange pro was built with features to differentiate us from our competitors, but its greatest strength lies in the team behind it. Easy exchange pro's team has been in the finance, banking, Blockchain, and exchange industry for many years. we have accumulated a large network of partners in this space in numerous countries.

## Transactions Problems

- Time-consuming banking operations as international interbank transactions require 1–3 days to be completed;
- Poor support in buying and selling cryptocurrencies with fiat;
- Inadequate banking services in some countries due to the lack of proper international banking connections;
- Restrictive banking laws in some countries;
- Restrictive laws preventing people from accessing digital currencies through third parties;
- Not having a credit/debit card prevents the purchase of cryptocurrencies; When buying a digital currency with Fiat, part of your money will be settled for the fees of transaction or conversion.

## Solutions and advantages

- Direct deposit of cryptocurrency into the user's wallet through Easy Card;
- Ability to use the Easy Card rather than going to the bank or using the credit card;
- Support of the financial transactions of the company;
- Free deposit of fees via Easy Card ;
- Exclusive purchase of cryptocurrency in cash;
- Deposit completes in the split-second;
- No conversion costs shall ever be incurred if fiats were spent while not being in the range of international currencies.;
- The highest possible level of security.

## Products

We are proud to offer a platform with a simple and easy-to-use environment where everyone can enjoy the world of digital currencies.

our products in launch time including:

- Instant buy & sell
- Spot (Limit order, market order, stop limit, stop market)
- convert
- P2P
- Easy card
- Brokers
- OTC Trade
- Companies account support
- Centralized exchange
- Referral system
- and more...

## Multiple Cryptocurrencies & fiat support

Easy Exchange pro supports the following coins and fiats when starting:

Peer to peer trading pairs	<b>+110</b>
Crypto to fiat	<b>+60</b>
Crypto to crypto	<b>+50</b>
Fiat currencies	<b>USD, EUR, TRY, RUB, AED</b>

In the early phase as part of our plan, the trading pair and various highly negotiable BEP20 & ERC20 tokens and more coins & Fiats that they have credibility and liquidity will be added.

## Multilingual

We will support English, Chinese, Arabic, Turkish, Russian, Ukrainian, and Vietnamese languages for all our clients. In the part of our roadmap will be added each year to 6 languages up till reach 30 languages.

## Device coverage

We will cover our clients for in 24/7 support:

Web-based trading client

Android native client

iOS native client

REST API

## Cutting-Edge security

- GABUR Tokens security protocols are being created on multi factors biometric
- authentication model, ensuring no single point of attack available to hackers
- Each access to the system is authorized, authenticated, and logged
- Every user has role-based access to the system through an automated onboarding platform
- Continues autonomous monitoring of logs and active countermeasures to block access of suspect users based on KYC/AML integrations
- Regulated digital services

## Income

Easy exchange pro income mainly comes from the fees of users, and we keep the low fee rate.

Income sources include: Exchange fees, Withdrawal fees, Listing fees

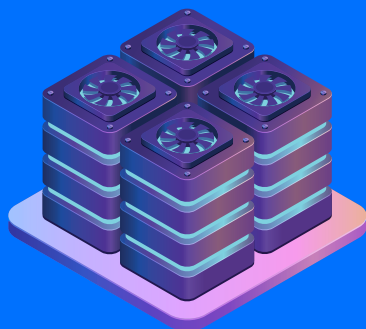

## Marketing Strategy

- Reinforcing of the Easy exchange pro platform in markets.
- Targeting social networks and digital media channels to advertise Easy Exchange pro services worldwide along with GABUR tokens;
- Creating a referral system with the multilingual robot feature in several countries;
- Creating an expert team at the service of the companies;
- Promoting and forming strategic alliances for the distribution and use of the Easy Card;
- Focusing on the leaders of the industrial sector and relying on the users' testimonies to modify and develop the platform accordingly;
- Becoming One of the Top 10 worldwide cryptocurrency exchange platforms according to our roadmap.

# EASY CARD

Easy Pro Main Server

Easy Pro Code Server

Brokers

Brokers

## Easy Card

Easy Card is a cryptocurrency purchase system based on cryptographic technology allowing cardholders to login to the Easy Exchange Pro platform and deposit their GABUR tokens directly into their wallet in a couple of seconds.

- Easy Card with values of \$10, \$20, \$50, \$100, and \$200 will be issued to personal clients.
- Easy Card with Values of \$5,000, \$10,000, \$50,000, and \$100,000 will be issued to company clients.

## Purpose of issuance

The Easy Card forms a connecting bridge between cryptocurrencies and users lacking access to international payment systems. The key to succeeding in the financial world is to implement innovative ideas designed to interact with the world. Therefore, Easy Card has been developed to play an influential role in solving this important matter.

## How to use the Easy Card?

You can meet with your nearest brokers in person or connect with them online and buy the desired amount of Easy card(s) in cash. Once you settle the purchase amount with the broker, you will receive the Easy card code(s). If you are a new user, register in the Easy Exchange platform in less than a minute process. User shall enter their code(s) on the platform to have their tokens deposited into their wallets. Piece of cake!

Now you can keep your GABUR Tokens or select the converter option and convert them into another cryptocurrency or fiat currency in no more than 7 seconds.

No fees will be charged for the deposit of GABUR Tokens into your account whatsoever.

For instance, making a purchase of an Easy Card with the value of \$100 means that exactly \$100 GABUR tokens will be deposited in your account.

## Gabur Token

- Utility Token name: GABUR
- Symbol: GBR
- GABUR Tokens Total Supply: 550M

- 15 % Advertisement & Branding
- 20 % Operation & management
- 10 % Easy card system upgrade and promotion
- 25 % Development of platform to add new options and innovative features
- 15 % Will be kept in reserve to cope with any unpredictable situation in future

## Buy-Back & Burn GABUR Tokens

Buy-back and Burn Tokens represent the mechanisms adopted by the Easy Exchange pro developers to increase the demand for GABUR Tokens as well as its added value, which will return profits for the holders.

Easy Exchange Pro commits to the buy-back mechanism, and the amount of GABUR Tokens burnt shall be calculated based on the overall quarterly trading volume. The GABUR Tokens retrieved through the buy-back mechanism will be destroyed immediately. We will start burning GABUR tokens 12 months following the end of the public sale date. Burnt tokens must be made available to the public on the explorer blockchain. We shall resume burning tokens up until 165 million are destroyed, leaving the remaining amount of 385M GABUR Tokens.

## What is the added value of Gabor Token?

- Development of Easy Exchange pro according to our roadmap commitment
- Creating innovative ideas on the development of Easy Card, which shall enable it to become a significant feature to be used in transactions
- GABUR Tokens are not subject to an increase
- Innovative development aiming to make digital assets more practical
- Burning GABUR Tokens quarterly
- The lock-up period for tokens,
- Ability to welcome users looking for a stable and secure way to settle payments in more than 60 countries
- Having an experienced team in both, the field of cryptocurrencies and the financial field, with extensive international financial connections
- We will add new and unique products according to our roadmap

## Risk

Our team is fully aware of the risks involved in setting up and managing a digital exchange. Many crypto exchanges have failed due to poor security procedures, but we will work hard with full skill and responsibility to keep users' property safe. We always equip and update our platform with the highest technology.

## Competition

The ultra-progress in the world of digital currencies would lead to a highly competitive environment. Surely you agree that an experienced and responsible team with innovative ideas can succeed in intense competition and meet the needs of the users. We are confident that despite such circumstances, our users will accompany us and instead we will always strive to provide the best service.

## Our Road Map

### In 2022
