# gafa

The Real Power of
Blockchain Technology

Utilizing the future of gaming experience and powering decentralized applications.

INTRODUCTION

The gafatoken is a project that started on the 4th quarter of 2021, the project is made of multiple aspects. First, to create a crypto token by the name Gafa token. Second, to create an API that will increase functionality for developers, so they can integrate it with their systems and make the payment process simple. Third, to develop a P2E game by the name Gafala that will work in synergy with the other aspects of the project. There are other potential long term goals that are worth to mention. The Gafaverse, is an open place that will be based on the planet mars, a virtual world that will be a hub for gamers. Furthermore, there will be a market for NFTs.

We are aspired to expand the cryptocurrency market
with real world financial assets

Smart Trading Modules

The ability to perform multiple tasks in a single module removes the need to specify and develop function-specific modules and greatly improves device integration, helping to create a more effective, simplified product.

Owned by Players

Players get true ownership of in-game assets. Utilizing the power of NFTs, assets you earn in games are owned by the player and lives forever on the blockchain.

Added-value for NFTs

Assets can be used across the whole ecosystem. With a focus on NFT interoperability, assets can be used in multiple games at the same time, creating a whole new world of fun.

RATING SYSTEM

Unlike traditional P2E games, we use a system that is based on how active a player/character is. The more you play, the more gafa tokens you will earn. Simple... and FUN!

BREEDING & TRADING CHARACTERS

Gafa token will be needed to breed characters. Characters can be used to play in-game or traded in our in-house NFT marketplace.

Free To Play, Play To Earn

Users get rewarded for their engagement and enjoyment. GAFALA is a decentralized finance and games creating an ecosystem where developers, players, and collectors come together in one world.

gafaNFT

Turn real-world assets into NFTs
Mint NFT collectibles, engage your sponsors, and create memories that truly last a lifetime.

Added-value for NFTs
Assets can be used across the whole ecosystem. With a focus on NFT interoperability, assets can be used in multiple games at the same time, creating a whole new world of fun.
GENESIS NFTS
The very first edition of NFT characters from the game. These will hold exceptional value and will be scarce.
Users get the true ownership of in-game assets and get rewarded for their engagement within the game. By utilizing the power of NTFs, assets you earn or buy in-game are owned by you and only you, they will live forever on the blockchain. Our ecosystem is created to be the meeting place for developers, players and collectors no matter where they are in the world.
GAFALA

Interior: The interior is designed to accomodate the crew comfortably and also serves as a lab for them to conduct experiments and test samples.

Cockpit: The ship is co-piloted and has two seats for the the pilots. There are also a number of information display screens.

Command Center

Feul Containers

Laboratory and plant samples

Sleeping Quarters

gafaApi

We are developing a new Application Programming Interface to be integrated with any system that you prefer to use in order to make the payment system easier, and to make your game or system interact with the blockchain.

gafaVerse

The gafaVerse is a cross platform that can be enjoyed on all devices no matter where you are. Whether it is creating content or enjoying others' creations, the gafaVerse rewards players, developers, and collectors for their engagement and enjoyment. Also, all players can share and exchange all their assets available. Its a perfect universe for players who seeks to find a visualised world of their own.
