INTRODUCTION 1/2

Trade Race Manager 2 (TRM2) is a next-gen experience made fully in 3D for gamers and traders powered by Defi and NTFS to bring you lifetime rewards that add an element of gaming to make a trading fun experience. With TRM2, you can trade cryptocurrencies in a different way, where traders may bet on themselves and compete against each other in many trading contests, known as races with the unique blockchain tokens called nonfungible tokens which represent your racing car and much more.

Trade Race Manager 2 was developed by QORPO which is a group of blockchain enthusiasts and traders. TRM2 is a successor of the original Trade Race Manager game.

It is a PvP game that brings unlimited rewards and play2earn mechanics. The core gameplay is based around collecting, use and trade of Non-fungible tokens while enjoying cryptocurrency trading.

The idea about the game a few years ago to solve the task of how to make money even during bear markets while playing the blockchain game.

Trading as a game

TRM2 connects cryptocurrency traders and promotes them to racers. Trading will not be boring anymore, it becomes entertaining. Cryptocurrency traders can get in touch and learn from each other, and also create teams of racers, using exciting UI.

The game will utilize elements of gamification to give the complex world of crypto trading a fun and relatable format; a car racing NFT game in which the performance of a coin fuels the progress of a race car. Race winners will receive IOI tokens which they can exchange for various features and abilities on the platform.

Besides winning the races you benefit from owning and managing your team or investing in racetracks. Definitely, there will be special NFT car editions with various features but do not forget the amount is limited and will appreciate in value. The basic NFT game family implemented will be:

- NFT cars
- NFT racers
- NFT winner trophies
- NFT teams

You will be able to profit from holding all of these items or use them in the game. If you decide to sell, there is a QORPO marketplace.

The focus of the QORPO is to enhance the play2earn model where anybody can earn playing the game.

INTRODUCTION 2/2

Target audience

Our primary focus will be on two types of customers:

Less experienced crypto traders who are interested in the business but cannot fully commit their time to cryptocurrency trading and technical analyses. They are users that have an internet-enabled device, are interested in new technologies, use their smartphone for at least 3 hours each day, have a positive outlook on cryptocurrencies, and are willing to learn new things, but prefer to do it in a more entertaining way.

More experienced traders who have been successfully trading cryptocurrencies for some time, and are now looking for additional sources of income. They are users that make money through crypto trading regularly, are open to new ideas, and are constantly on the lookout for new sources of income. When casual traders attempt to make sense of cryptocurrency markets, they will inevitably come up with questions such as: Who to follow? When to buy? How can I choose the best-performing coin? People tend to seek the advice of their more experienced peers.

TRM 2 was created to provide a solution for everyone who is interested in crypto trading and wants to learn the business in a safe and fun environment. TRM 2 is an interactive social crypto-trading platform that uses elements of gaming to create a relatable and easy-to-understand overview of cryptocurrencies and their market performance adding the Defi features together with non-fungible tokens.

WHAT DOES IOI PROVIDE? 1/2

Gaming adventure – trading with cars

TRM 2 will provide its users with a social crypto trading platform that integrates elements of gamification. We want traders to enjoy the trading and bring them something new, and more exciting.

TRM 2 will help its users to be connected, get verified results, and, as a bonus, earn rewards together with their friends. Nothing in life should be boring, and crypto trading shouldn't be an exception. This is why we gamified daily trading with races thanks to blockchain and NFTs.

Conventional daily trading is not for everyone due to complicated technical analyses or emotional burdens.

That's why we created a trading game with different types of races for everyone. Just pick your car, fuel it up with your best performance coins that will be used as gas, and become the winner of the race. Every day you reach new levels, receive ratings and attract new fans who can help you earn more. Eventually, you can make a team and play together.

The idea behind the NFT game is very straightforward and you can become the racer or owner. You pick the car as NFT which brings you also benefits just for racing without even winning in the form of the staking rewards.

Why should beginner traders join TRM 2?

TRM 2 offers people to become a part of a network of traders, gamers, and leaders. You can learn from more experienced crypto traders and earn money alongside them. We are not just another social trading platform; we represent a revolution in crypto trading. Once you join, you will realize that crypto trading can be fun and entertaining.

We believe that gamification is the key to widespread adoption among potential crypto traders around the world.

WHAT DOES IOI PROVIDE? 2/2

Why should experienced traders join TRM 2?

More experienced traders can become racers and participate in trading contests that are known as races. Racers compete against each other by making smart trades and raising their return on investment (ROI). Do not forget that you race with a car as NFT which has a limited supply and there are also some rare editions.

Besides fun trading, we definitely want to keep the players on the platform. The crypto market is growing extremely fast and we can not be behind.

The platform offers plenty of other useful features that will keep users on the platform, such as:

- DeFi features
- Liquidity pool rewards
- Staking
- QORPO Marketplace
- DeFi games
- Noncustodial wallet access for ETH and IOI via metamask
- QORPO wallet
- CeFi functionality

Most complete ecosystem of products that operate smoothly between each other with zero fees.

MARKET SIZE & SPECIFICS 1/2

Global trends such as the long-term increase of mobile phone penetration, internet penetration, and the proliferation of blockchain technologies will provide ideal conditions for TRM 2's growth and scalability.

During 2020, the net volume of all cryptocurrencies being traded within a 24-hour window reaches a value of over \$ 55 billion USD. Cryptocurrency trading is still dominated by Bitcoin, but altcoins constantly emerge to chip away the lead and diversify the cryptocurrency market. As of April 2021, there are more than 6600 cryptocurrencies listed on 414 exchanges and the number is constantly growing. The number of exchanges is also growing due to growing interest in cryptocurrency trading, both in the number of participating individuals and volume traded.

There is also a huge trend of the DEX (decentralized exchanges) volume growing with more than 60 Billion USD in March 2021, especially on the Uniswap platform where the traders do not need to do KYC and have the cryptocurrency in their wallets. Hence this decreases the hacking risks since there is no third party involved, but a smart contract. See the chart below:

Monthly DEX Volume

The gaming market

The rising popularity of crypto portfolio applications such as Delta and Blockfolio points to a large market of smartphone-based customers. These are of particular interest to companies targeting the younger generations, as Generation Z (born after 2000) and Millennials (born between 1985 – 1999), who spend an average of 4 hours and 38 minutes on internet-connected smartphones every single day.

Distrust of large banks and fear of recession have made cryptocurrencies a popular investment among the younger generation. A 2019 poll published by eToro found that 40% of millennials (i.e. young people born in the period 1980–1994) preferred cryptocurrencies as a safe haven investment. This is also a positive sign from a macro point of view.

The global online gaming market is a fast-growing industry that is expected to reach a total value of USD 87.75 billion by 2024. It is a highly profitable and scalable business that will keep growing rapidly at an expected compound annual growth rate (CAGR) of 9.8% in the upcoming 5 years.

MARKET SIZE & SPECIFICS 2/2

Online gaming can be accessed by anyone with an internet connected device. Each day, about 1 million new internet users come online. Further increasing the number of potential online gamers, yet there are still 3.2 billion people who lack internet access, allowing this growth trend to continue well into the future. However, the online gaming industry faces many unanswered issues. The online gaming market also has a bright future ahead and is expected to reach a total value of USD 180 billion by 2021 as indicated in the chart.

It is not just revenue that makes the gaming market an huge opportunity, but with a total of 2,6 Billion players forecasting, in 2021 every third person will become a gamer.

Trust and popularity in the old gaming model where only big influencers earn money is decreasing. The fairness, transparency, and much more opportunities are the signature features of blockchain technology, it may provide an excellent solution to the challenges of online gaming and with the NFTs it is like trading on leverage.

Blockchain itself is a large and rapidly growing industry. Forecasts suggest that the value of the global blockchain technology market will grow to over \$60.7 billion by 2024. The popularization of the internet led to an exponential increase in the size of the global gaming market by creating an entirely new sector; online gaming. Blockchain may prove to be a similar technological catalyst for the global gaming industry.

CURRENT MARKET 1/4

Online gaming and cryptocurrency trading

Gaming and cryptocurrencies have a significant overlap in their audiences. A 2019 Rutgers University study on gamers (defined as gaming at least once a month) found that more than half of the 897 respondents had traded cryptocurrencies in the past year. Cryptocurrency day trading offers a high risk/high reward form of investment that coincides with entertainment and games. The study claimed that “cryptocurrency trading is similar to gaming but anonymous, unregulated and available 24/7”.

NFT market trends

There is a new word that will become part of many people's lexicons the same way cryptocurrency recently has. Its NFT: Non-Fungible Token. NFTs are digital blockchain-linked assets that, unlike cryptocurrencies, are completely unique and not interchangeable with any other asset. Examples range from plots of virtual land in multi-user platforms, to programmable art, to ownership records for physical assets.

Because they are unique and impossible to replicate, they can bridge the gap between the virtual and the physical economies, offering a huge market of valuable digital goods that can be scaled, collected, and traded. A recent report by NonFungible.com, an NFT market analyst firm said that: "The non-fungible token (NFT) market tripled in 2020, with the total value of transactions increasing by 299% year on year to more than \$250m.

The report, which uses proprietary technology to track activity in the NFT market, found that the total value of all NFT transactions (which includes sales and all other transactions such as "breeding", "minting" and renting) increased from \$62,862,687 in 2019 to \$250,846,205 in 2020.

In addition, NonFungible.com also found that market activity has increased significantly: the total number of active wallets transacting NFTs (including buying, selling, holding or using them in a blockchain application) skyrocketed, growing 97%, from 112,731 in 2019 to 222,179 in 2020. Similarly, the number of buyers and sellers rose from 44,644 to 74,529 (+66%), and 25,264 to 31,504 (+24%), respectively. The number of active wallets accelerated throughout 2020, suggesting even stronger growth ahead in 2021: Q4's total growth was twice Q3's, and three times that of Q2."

CURRENT MARKET 2/4

Opportunity

The establishment of blockchain as a standard commercial technology will remove even more barriers to markets in developing countries. Services that will accept cryptocurrencies as a form of payment will be more inclusive as they can offer their services to the global unbanked segment (1.7 billion people). Of these 1.7 billion adults, two-thirds own a mobile phone that can be used to access the TRM 2 platform.

Global drivers such as increased internet penetration, mobile and PC ownership, and the increased adoption of cryptocurrencies point towards greater demand for all digital gaming platforms that overcomes current customer issues such as lack of trust and requirements for personal information.

Blockchain technology can also tap into new market segments, most notably the global segment of 1.1 billion smartphone users who remain unbanked, as well as various regional markets with restrictive legislation. Games based on smart contracts would offer an automated, secure and transparent, entertaining platform. The increasing focus on investment in new web 3.0 technologies such as blockchain, the improving societal perception of online gaming, and the emergence of new audiences via the internet will continue to improve the already excellent market conditions ideal for a platform such as TRM 2.

The growth of the global online gaming and gaming market will be accelerated by a global increase in per capita income, adoption of new technologies, growing interest in alternative means of income and the rise of cryptocurrency payment systems.

CURRENT MARKET 3/4

Current issues

User experience on the gaming side of Blockchain is too complicated for casual players. Not everyone is familiar with blockchain, NFTs and cryptocurrencies. Also, the high fees that companies charge even before joining the game and later on during the game are very deterrent.

QORPO is trying to create a platform that supports blockchain in a non-distractive way so the casual user won't notice. We charge players only after they decide to take full advantage of the game and enjoy its full potential with NFTs.

High scalable blockchain platform

The QORPO which is behind the Trade Race Manager 2 development, is certainly aware of all these market opportunities.

All of the above mentioned is a reason why the TRM 2 platform is aiming to become a high scalable blockchain platform powered by Polygon as a Layer 2 Ethereum network solution.

We have chosen this platform mainly because of the scalability and speed of transactions. Ethereum is the second-largest blockchain platform. However, it has well-known scalability constraints as the congestion crisis continues to cause slow and expensive transactions due to the DeFi growth.

Polygon (Matic) Network is a leading Layer 2 scaling solution for Ethereum, which can eliminate the current network issues. As a team, we are experienced in the blockchain field and we are aware of the three elements triangle which is usually hard to fulfill.

CURRENT MARKET 4/4

We think that Polygon is one of the best solutions on the market that can follow these elements nowadays. Decentralized apps are making huge progress but the current blockchain ecosystem is not prepared to scale as per demand. But Polygon as a Layer 2 sidechain for the Ethereum network, it is a perfect match.

The issues of slow block confirmations and high gas fees need to be solved before we target mass adoption. Polygon brings massive scale to Ethereum using an adjusted version of Plasma with Proof of Stake based side chains. As mentioned above, Polygon chain operators are themselves Stakers and Delegates in Proof of Stake systems

The Trade Race Manager 2 game will also operate as a Validator node on the Polygon network , maintaining the security and efficiency of the network for over 100+ DApps. Security is a significant feature required and Polygon uses an account-based variant of More Viable Plasma to guarantee the security of assets on the main-chain and it ensures also the security of generic transactions by a decentralized network of Proof of Stake validators.

Interoperability

You have probably heard the expression “Killer app” in the connection with Ethereum many times. We are sure and strongly believe that the “Ethereum Killer App” is the wrong attitude and the only way is to adjust and be interoperable.

That is why we have also chosen Polygon that is built on Ethereum and moreover has an asset interoperability trait hence assets on different side chains across various blockchain will be made interoperable in the near future. Once this happens, you can expect TRM 2 to support numerous prominent blockchains and the tokens that exist on those networks. This will be in perfect match with our mission to converge blockchain and gaming, trading.

Community

As you know, there are many technically perfect projects with sufficient human and financial resources, but there is one key point that is missing and that is a community. Every project needs to solve a problem and needs people to use it since, without community and people, it is almost useless.

This is a very important reason, for which we use Polygon Network, because the community working and using the Ethereum network is huge. Polygon provides increased scope for collaboration, development tools and future use cases.

Token Metrics

Tokenomics is the science of the token economy which can also be compared to a monetary policy in the micro economy scale, enabled by the blockchain network. Any company can now set up a list of internal rules using their own token in a decentralized manner to manage the company, also by the users or customers of their products.

It enables incentives to be directly coded into distributed systems. Hence token metrics literally takes the monetary role of central banks on different scales, applying the token metrics as specific token rules. This notion basically consists of the three main areas followed by token creation, distribution or whole management, and removal or burning.

We need to emphasize that token metrics are the key indicator in the crypto industry, and one of the decision points for future investors, opening them to bigger possibilities not recognized in the financial world, up to now. It is also a matter of transparency and without clear token rules, your otherwise perfect business ideas can become obsolete.

Our goal is the adoption of blockchain technology by leveraging the potential of the token economy, through utility and value creation for network participants, such as gamers and traders who are well equipped to understand virtual economies.

Types of Token Metrics

- Utility – paying for services inside the blockchain ecosystem
- Deflationary model – reducing the growth of supply (Bitcoin)
- Dual model – utility and deflationary (inflationary)

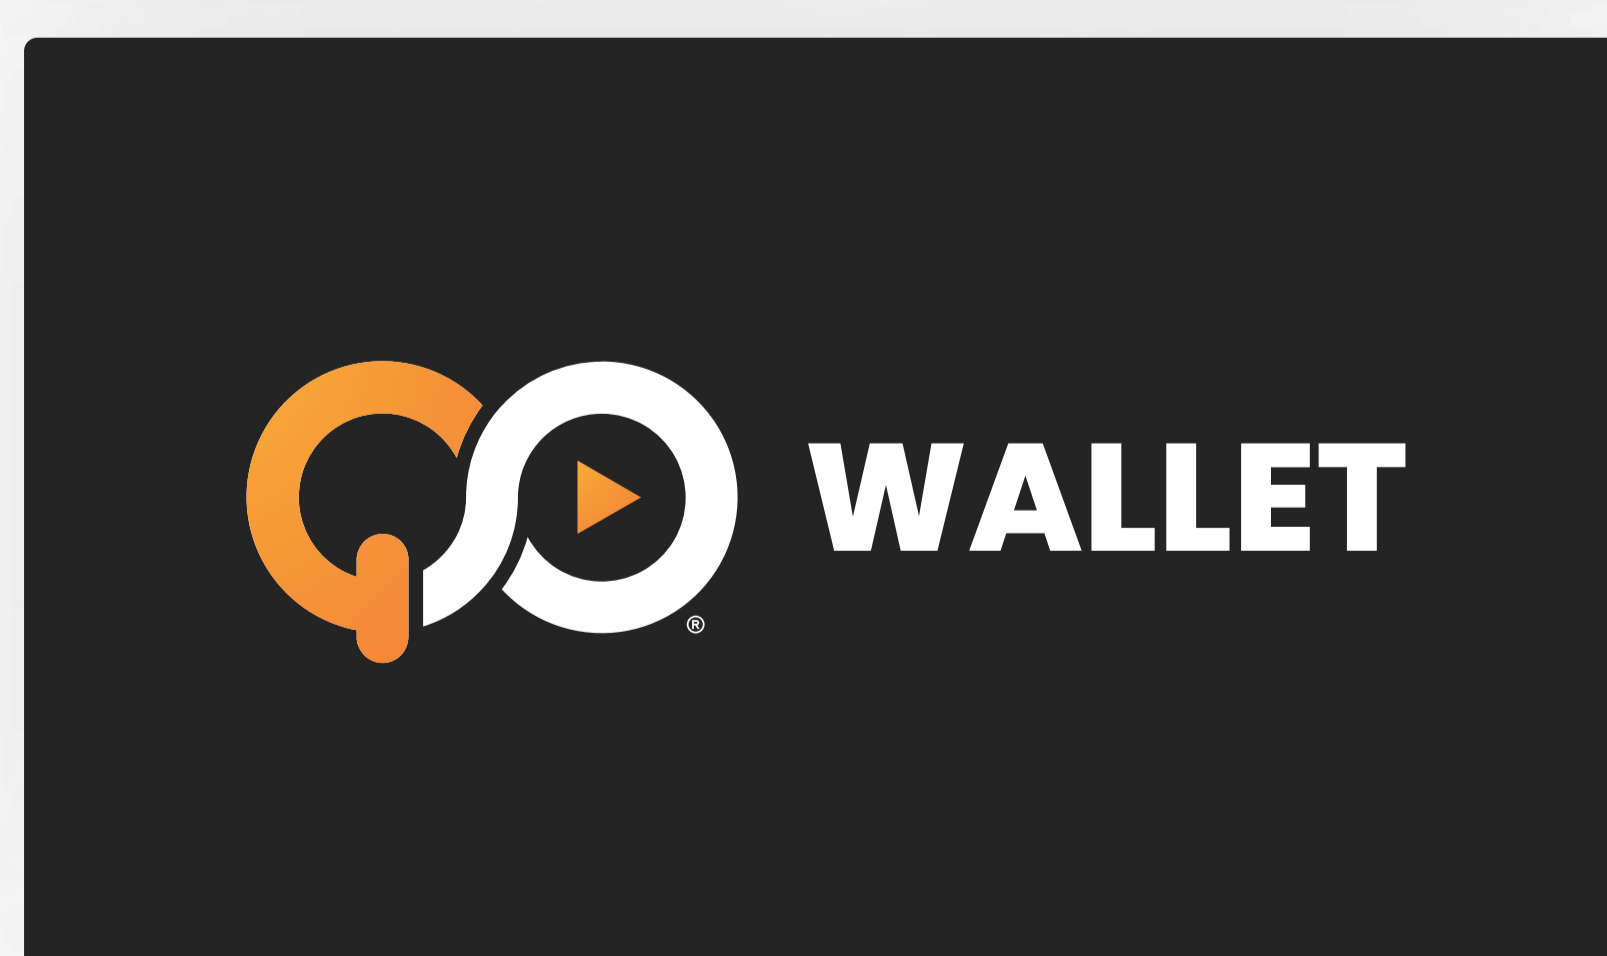

IOI ECOSYSTEM 2/3

IOI Token

The token is needed in order to power the token metrics and the whole ecosystem.

We at QORPO have our own token running on the Polygon blockchain with the main features as follows:

- Deflationary multi-utility gaming token
- NFT purchases
- Utilising Polygon blockchain with very low fees and scalability
- No network congestion
- Holding the token to unlock the other trading strategies up to 36 % p.a.
- Featured with DeFi and burning functions up 3x of the new monthly supply
- Reward pool share and governance rights

IOI ECOSYSTEM 3/3

The deflationary multi-utility feature of the token is the key property we want to maintain. This is the long-term game in general and the team's priority is the stable value of the token with the appreciation trend.

There is no interest for any pump and dump short-term games, and to enhance this function, we added the deflationary feature decreasing the supply, and offsetting it as adding more utility for players to increase the demand.

You can observe the final burning calculation with the total token supply plan further in this whitepaper. Polygon is one of the most progressive layer two Ethereum blockchain solutions on the market nowadays. There are many projects joining Polygon every day.

The goal is to cover the market and meet the player needs as wide as possible. That's why we chose Matic also to use different gaming platforms as a cross gaming base for our NFT items.

The priority of the TRM 2 platform is to bring joy while playing the games and really bring some fun into the otherwise maybe boring and stressful trading. We understand this and will definitely focus here.

But we would like to bring and create something huge and exceptional for the crypto community. Would you imagine enjoying playing and getting rewards under the hood of one platform? This is exactly our idea, which we're going to bring you thanks to our partnerships.

TOKEN UTILITY

TRM 2 Benefits

- Play various TRM 2 races
- Purchase more cars as NFTs – to increase the winning chance
- Holding 1 000 IOI entitles you to become a **manager** in TRM game
- Playing 1 000 IOI entitles you to become an **owner** in TRM game
- Generate more rewards with our **Affiliate program**
- Attend special events, such as tournaments, with huge prizepools

Qorpo Wallet Benefits

- The more you HOLD, the more you EARN! ***You decide about your rewards.***
- Staking now exclusively in IOI Wallet
- **Stake 100–999 \$IOI for 15–90 Days** – for Tier 1 NFT Rewards
- **Stake 1,000–4,999 \$IOI for 15–90 Days** – for Tier 2 NFT Rewards
- **Stake 5,000–9,999 \$IOI for 15–90 Days** – for Tier 3 NFT Rewards
- **Stake 10,000+ \$IOI for 15–90 Days** – for Tier 4 NFT Rewards

TRM 2 RACES 1/4

IOI Token

The blockchain game Trade Race Manager 2 changes people's lives. The majority of the players earn enough \$IOI to have a stable monthly income. Players earn real money just by playing! In this ultimate guide, we will go through the whole gameplay and learn how you can get started with Trade Race Manager 2.

Overview of Trade Race Manager Gameplay

In Trade Race Manager, players can choose from 3 types of races to compete against other players. In the unique gameplay containing elements of trading and crypto, you can show off your skills to other players.

Trade Race Manager 2 is running on a Polygon blockchain and each Car and Racer is an NFT (non-fungible token). You don't need to have prior knowledge of blockchain and NFTs. You can learn about this technology by playing the game.

Investment is not necessary and you can start earning right away in free "Non-NFT" races. To join an NFT race you will need to have enough fuel on your account. This fuel refills every day for each car you own. When you use all of it you can buy more in the game. If you win a race you will be rewarded in the form of "IOI" which is a cryptocurrency token that can be used to trade, buy NFTs, or stake in the QORPO Wallet to get rewards.

TRM 2 RACES 2/4

Trade Race Manager 2 Races

In TRM 2 we came up with a brand new racing experience fully in 3D with astonishing visuals. You can only join each type of race if you have the corresponding vehicle ready in your garage and enough fuel.

In the future, we are going to add a new Nitro feature. During the race. You can guess if your chosen cryptocurrency raises on a price or lowers. If you guess this right you can use nitro to improve your car performance.

How to win in Portfolio Races and earn money

Let's talk about the different race types that you can participate in.

- **Free Race** — Happens every 3 minutes, every winner earns the same, it doesn't matter if you own an NFT or not.
- **Portfolio Races** — Happens every 5 minutes, rewards depend on NFT level. Better NFT = Higher rewards.
- **Tournaments** — Tournaments are the biggest events and also only for NFT owners. There are 4 tournaments a day. Winners get 64 IOI split between them for each tournament. You can join the tournaments either with cars or boats

Qualification rounds

- In the first 10 rounds, you earn points for scoring in the top 10 in the races. The point system works just like in F1 qualifications.

Elimination rounds

- If you end up in the top 10 after all ten rounds, then you move to the elimination rounds. One player is eliminated in each of the 9 rounds until there is only the last racer standing.

Tips and tricks

- When you pick your cryptocurrencies distribute the fuel so one of the coins is at 90% and the other two at 5%, In this way you will "increase" your bet on a single coin that you think is the most volatile at the moment.

TRM 2 RACES 3/4

Tournament tips:

- If you feel confident in your trading skills, then you can try to change the fuel between qualifications, BUT we highly advise you to keep the fuel that you picked before the race and believe that the combinations that you picked are going to bring you to the elimination rounds.
- In the first round of elimination rounds, pick 90% Tether and the last 10% as you wish. This way your change will be at 0% and most probably somebody is going to go to the negative percentages which will take you to the next round where you should fuel by the trends that you've seen in the first round.

Fuel up your token:

- A new way of advertising your token for thousands of everyday users in the form of banners and fuel. In TRM 2 there will be the possibility to add your token to in-game fuel selection if the minimum criteria are met.

TRM 2 RACES 4/4

Trade Race Manager 2 earnings

Let’s talk about earnings. We already explained that Tournament prize pools are 64 IOI and 4 of these tournaments play out every day.

In Free Races you can earn as much as 0,12 IOI every 3 minutes.

5-minute races bring the most value to players and they are the go-to event for most of the players, every ten minutes you can earn ridiculous amounts for IOI. Look at this reward table where you can see all of the rewards for different classes of NFTs in the race.

POSITION	NON-NFT	COMMON	COMMON RARE	SUPER	SUPER RARE	EPIC	EPIC RARE	LEGENDARY	LEGENDARY RARE
1st	0,1 \$IOI	1 \$IOI	1,5 \$IOI	2 \$IOI	3 \$IOI	4 \$IOI	6 \$IOI	8 \$IOI	12 \$IOI
2nd	0,1 \$IOI	0,5 \$IOI	0,75 \$IOI	1 \$IOI	1,5 \$IOI	2 \$IOI	3 \$IOI	4 \$IOI	6 \$IOI
3rd	0,1 \$IOI	0,3 \$IOI	0,45 \$IOI	0,6 \$IOI	0,9 \$IOI	1,2 \$IOI	1,8 \$IOI	2,4 \$IOI	3,6 \$IOI
4th	0,1 \$IOI	0,2 \$IOI	0,3 \$IOI	0,4 \$IOI	0,5 \$IOI	0,6 \$IOI	0,7 \$IOI	0,8 \$IOI	0,9 \$IOI
5th	0,1 \$IOI	0,2 \$IOI	0,3 \$IOI	0,4 \$IOI	0,5 \$IOI	0,6 \$IOI	0,7 \$IOI	0,8 \$IOI	0,9 \$IOI
6th	0,1 \$IOI	0,2 \$IOI	0,3 \$IOI	0,4 \$IOI	0,5 \$IOI	0,6 \$IOI	0,7 \$IOI	0,8 \$IOI	0,9 \$IOI
7th	0,1 \$IOI	0,2 \$IOI	0,3 \$IOI	0,4 \$IOI	0,5 \$IOI	0,6 \$IOI	0,7 \$IOI	0,8 \$IOI	0,9 \$IOI
8th	0,1 \$IOI	0,2 \$IOI	0,3 \$IOI	0,4 \$IOI	0,5 \$IOI	0,6 \$IOI	0,7 \$IOI	0,8 \$IOI	0,9 \$IOI
9th	0,1 \$IOI	0,2 \$IOI	0,3 \$IOI	0,4 \$IOI	0,5 \$IOI	0,6 \$IOI	0,7 \$IOI	0,8 \$IOI	0,9 \$IOI
10th	0,1 \$IOI	0,2 \$IOI	0,3 \$IOI	0,4 \$IOI	0,5 \$IOI	0,6 \$IOI	0,7 \$IOI	0,8 \$IOI	0,9 \$IOI

The ranking system will be based on the highest rewarded player on the platform. The more IOI you make the higher is your rank on the leaderboard.

RACE PASS

Racepass

It is a subscription program that offers players multiple rewards for completing certain tasks every week for one month including rewards from the racepass leaderboard at the end of the month.

Each week there will be different tasks for you to complete, for example:

1st week – join 100 portfolio races

Duration – one week

Reward – special racepass skin (common rarity)

2nd week – finish 15 races at top 10 places

Duration – one week

Reward – random NFT (common rarity)

3rd week – finish 5 tournaments at top 3 places

Duration – one week

Reward – racer skin (super rarity)

4th week – Win 1 tournament and 3 NFT races

Duration – one week

Reward – special racepass NFT + reward depending on your leaderboard position

Racepass Leaderboard rewards:

1. NFT car + IOI + 1 spin + racepass for next month
2. NFT racer + 1 spin + racepass for next month
3. 1 spin + racepass for next month
4. place – 10. place gets 1 spin

Wheelspin

For ending up in the top 10 places of racepass leaderboard player receives 1 spin on the wheel. The Player will get any reward that the arrow on the wheel ends on.

NFTS 1/3

How to deposit IOI to buy NFTs?

Before we talk about things involving investments, let's talk about how you can deposit IOI tokens into Trade Race Manager 2.

There are many exchanges where you can buy IOI, both centralized and decentralized.

We made a tutorial on How-to buy IOI token on KuCoin.

- **Here are the other exchanges:**

- [Huobi](#) IOI/BTC - IOI/USDT
- [Gate.io](#) IOI/USDT
- [UniSwap](#) IOI/USDT
- [PancakeSwap](#) IOI/BUSD
- [QuickSwap](#) IOI/USDC

Let's look at the core component of the game. Non-fungible tokens. You can gain a big advantage in the game but also operate with the NFTs as you wish. This way we made sure that when people invest, they will soon get back their investment + make a profit with us.

There are two types of different of NFTs. Cars and Avatars + special influencer bundle which includes both Car and an Avatar.

| Cars

- In a single race, you can use up to five cars. The advantage here is that you maximize your chances of winning by betting on different coins, or if you feel confident you can make the same bet and score with all of your cars on the top places.
- The strategy here is to place similar bets on the coins you believe in at the moment and play with the combinations until you find the right one.
- You also gain way more rewards with more cars and earn back your investment much quicker than with only one car.

| Avatars

- Outside of the race track, you can use these avatars to earn bigger rewards from your referrals. We will talk more about how the affiliate program works later.
- As a Non-NFT Avatar, you receive **3% of every purchase**.
- For 100 IOI you can buy a Common Avatar which brings **10% of every purchase**.
- Epic Avatars cost 1000 IOI and bring **15% of every purchase**.
- Legendary Avatars cost 10 000 IOI and bring **20% of every purchase**.

You can also earn these avatars by staking in QORPO Wallet which we will talk later about.

NFTS 3/3

Race tracks

- Each track will be split into multiple parts. Racers can invest in the track and stake on a part of it. There is no limitation to how many parts a player can stake on.
- Earn from every 30 minute race
- 1000 shares per track
- 500 staked IOI per one share
- Up to 24% APY

TEAM OWNERSHIP 1/2

Why is it good to be in a team?

Teams are a vital element of the TRM 2 community. Let's talk about some benefits that you can gain with your new team. Joining a team is free and each player has to be in one.

- Fuel Strategies from your manager — Managers are professional traders who look at the charts at all times and give team members strategies to fuel their cars on a particular day. These strategies are visible when you are choosing fuel.
- On top of that, teams have their private chats where they share tips on the game and also interact with each other and build real connections.

TEAM OWNERSHIP 2/2

How to earn money by becoming a manager or owner.

Now that we already know about teams, let's talk about how you can create your own, or manage an existing team. Every team is an NFT on its own and the value increases with every new member.

| Become a manager

- Anyone holding 1,000 IOI can apply for a manager role in the team
- As a manager, you can moderate the team chat and create push notifications
- Your job is to make trading strategies for your team, communicate with teammates and become a vital part of your community. The manager earns 10% out of the undivided race prize pool if anyone from his team wins

| Become an owner

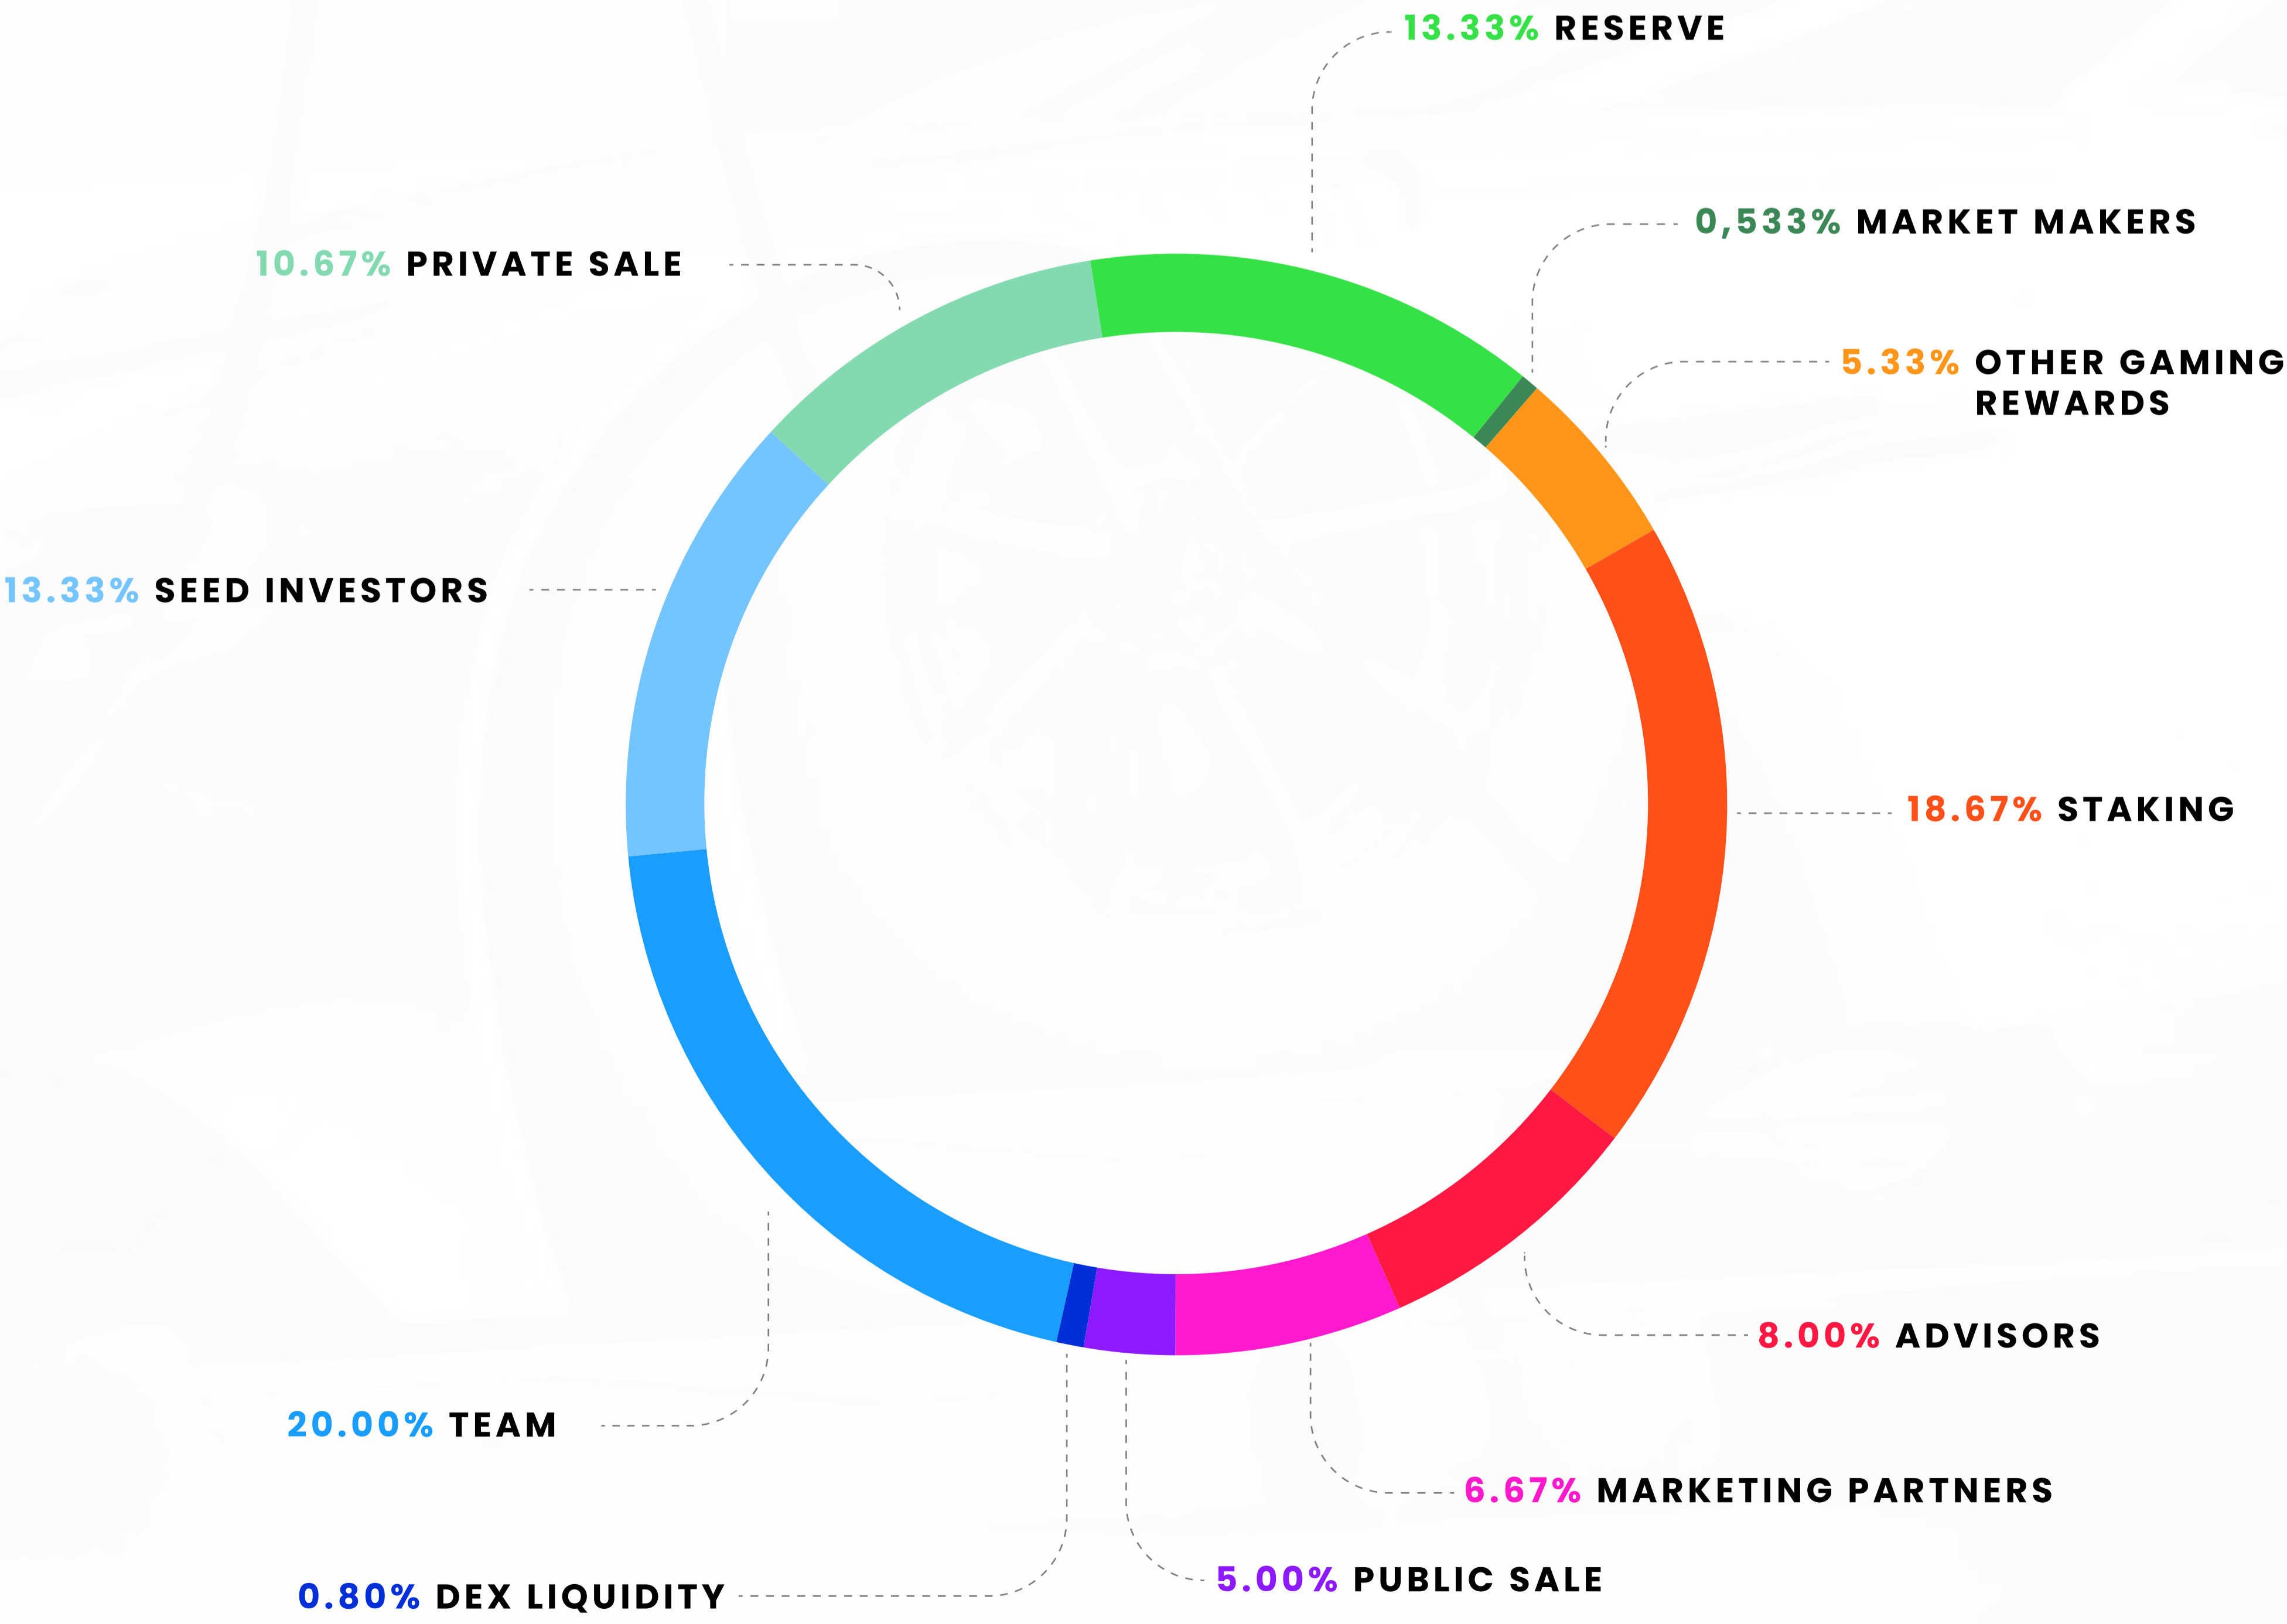

- Anyone can create a Team for 1,000 IOI
- Build your racing team from scratch, pick the name, badge, and everything included
- As an owner, you have the power to choose your managers or replace them
- Same as a manager you are able to moderate the team chat and create push notifications
- The owner earns 20% of his teammates winnings from undivided prize pool

ROADMAP ^{1/2}

• 2021 Q4

- Finishing works on the Alpha version of TRM2
- Launch of the Closed Alpha Test for our NET holders
- Advancement of new exclusive fastest cars and special custom visuals
- Making progress on tournaments, competitions, and winnings
- Development of the Beta version of TRM2, polishing the game based on the feedback from the Alpha test
- Final changes of the most unique NFTs, characters and tournaments
- Adding and polishing of all the promised features
- Completing the most epic NFT ecosystem with new unique racers
- Launch of the Open Beta Test for all registered users
- Choosing 10 players who joined the Alpha test that will receive special TRM 2 NFT
- Creating absolutely a whole new level of play2earn game

• 2022 Q1

- Partner token in-game
- New vehicle NFTs
- Polishing and bug fixes
- NFTs races pass
- Nitro Boost
- Mobile version of TRM 2
- Affiliate screen
- Race Pass
- Owners and Managers screen with earning leaderboards

ROADMAP 2/2

• 2022 Q2

- Boats added to TRM 2
- Race tracks on the sea
- TRM BRAIN: Standalone app for all Premium racers that gives you:
 - Crypto fuel screener
 - Best performing coins/tokens
 - Top racers strategies copy feature
- New NFT vehicles

• 2022 Q3

- Advertising option for all partners, collaborators, influencers, and racers
- Show your skill, Racer recruitment to your NFT Team for maximum profits
- New NFT vehicles
- Connection to Qorpo ID App
- Polishing and bug fixes

• 2022 Q4

- Open world free roam map for TRM2 NFTs
- Polishing and bug fixes
- Minigames in the open world for your NFTs
- New NFT vehicles

VARIOUS NFT DROPS COMING SOON

STAY TUNED

LEGAL

QORPO is working with its legal partners so that it can comply with regulations from around the world and avoid any possible law breaking. QORPO has had several consultations with authorities and commission and it can receive required documents in order to achieve its goal. That is, why QORPO has established a company in Curacao that applied for an online gambling licence with a subsidiary in Cyprus. Regarding this structure, QORPO can receive a global online gambling licence. This excludes the USA, as it is prohibited by the federal law. For this purposes QORPO and all mechanisms have to be clearly specified, proved and protected against any possible fraud, hack, or any other harmful act that could cause any kind of problems for its users or QORPO. QORPO promises to behave transparently. Thanks to blockchain, all transactions are auditable at all times. QORPO will hire an external audit company that will take care of all audit duties related to the object of its business.

Legal disclaimer

PLEASE READ THIS DISCLAIMER SECTION CAREFULLY. THIS DOCUMENT IS CREATED SOLELY FOR INFORMATIONAL PURPOSES ABOUT THE QORPO PROJECT. NOTHING IN THIS WHITE PAPER CONSTITUTES, OR IS INTENDED TO BE CONSTRUED AS, AN OFFER TO ISSUE, ALLOT, SELL, OR OTHERWISE TRANSFER, OR AN INVITATION, ADVERTISEMENT, SOLICITATION, RECOMMENDATION, ADVICE, OR INDUCEMENT TO INVEST IN OR MAKE A COMMITMENT TO INVEST IN, ANY SECURITIES, OPTIONS, OTHER FINANCIAL INSTRUMENTS OR OTHER ASSETS, WHATSOEVER. THIS DOCUMENT IS NOT INTENDED TO GIVE AND DOES NOT CONTAIN ANY SORT OF PERSONAL, LEGAL OR FINANCIAL ADVICE. IT IS HIGHLY RECOMMENDED TO CONSULT YOUR OWN LEGAL AND FINANCIAL EXPERTS FOR FURTHER GUIDANCE.

1. The main goal of this White Paper – introduce the QORPO Project and tokens to the potential token-holders and users.
2. The information set forth below cannot be exhaustive and does not imply any elements of contractual relations. Its sole purpose – provide relevant and up-to-date information about the QORPO Project and the team behind the project to the potential token-holders in order to determine whether to conduct a more thorough analysis about the Project with the intention to purchase tokens.
3. Although this White Paper aims to provide the most relevant and accurate information, the information set forth in this document is only intended to provide general and preliminary information to the potential token-holders and shall not be construed as the basis of any investment decision or strategy. This document in no way constitutes professional advice.
4. Nothing in this White Paper can be considered or construed as forming part of the Prospectus of any kind. The information provided in this document has no relation to the securities offering in any jurisdiction. This document is not made in accordance with the laws or regulations of any jurisdiction since it carries the informational purpose only and is not, therefore, subject to the laws and regulations designed to protect investors.
5. IOI Token is only intended for private sale in jurisdictions where no securities regulatory regime has been imposed on tokens by authorized governmental bodies. Potential investors from the abovementioned jurisdictions may purchase IOI Tokens via private deal in accordance with the IOI Token Sale Agreement and this White Paper.
6. IOI token is not intended for sale or use in any jurisdiction where the sale or the use of digital tokens is prohibited. For persons from such jurisdictions, this White Paper is for informational purposes only. The company reserves the right to conduct a verification procedure in accordance with IOI AML/KYC Policy. For more information on the jurisdictions that are excluded or restricted from the public token sale, please refer to the IOI token Sale Agreement that can be delivered after request. The list of prohibited countries residents can be found also in Legal part of this document. Please read the IOI Token Sale Agreement carefully before purchasing any IOI tokens.
7. IOI token does not give and cannot be construed to give any financial, legal or other rights in any form apart from the rights expressly defined in the Token Sale Agreement. In case of differences in the IOI token definition in the White Paper and the Token Sale Agreement, the Token Sale Agreement definition shall prevail.

LEGAL

8. The risk of investing in tokens is high given the unstable regulatory frameworks, market volatility and fluctuations. Thus, only investors that have a sound understanding of the way crypto industry operates and those that have read the risk warning contained in the Token Sale Agreement, the latest version of which can be accessed on request, should purchase IOI tokens.

9. Some of the statements in the White Paper include forward-looking statements which reflect the Company's and/or the Directors' current views with respect to financial performance, business strategy and future plans, both with respect to the sectors and industries in which the Company operates. Statements which include the words "expects", "intends", "plans", "believes", "projects", "anticipates", "will", "targets", "aims", "may", "would", "could", "continue" and similar statements are of a future or forward-looking nature. Such forward-looking statements or information include known and unknown risks and uncertainties, which can lead to the situation when the actual events or results materially differ from the statements and estimates implied or expressed in such forward-looking statements.

10. All forward-looking statements address matters that involve risks and uncertainties. Accordingly, there are or will be important factors that could cause the Company's actual results to differ materially from those indicated in these statements. These factors include but are not limited to those described in the part containing risk warnings in the Token Sale, which should be read in conjunction with the other cautionary statements that are included in the Token Sale Agreement. Any forward-looking statements in the White Paper respect the Company's current views with respect to future events and are subject to these and other risks, uncertainties and assumptions relating to the Company's operations, results of operations and growth strategy.

11. These forward-looking statements speak only as of the date of the latest uploaded version of the White Paper in English. The Company with all rights to Qorpo undertakes no obligation publicly to update or review any forward-looking statement, whether as a result of new information, future developments or otherwise. All subsequent written and oral forward-looking statements attributable to the Company or individuals acting on behalf of the Company are expressly qualified in their entirety by this paragraph. Prospective token-holders should specifically consider the factors identified in the Token Sale Agreement which could cause actual results to differ before making an investment decision to purchase IOI Tokens.

12. This White Paper can be amended at any time to provide more detailed information or reject some changed circumstances. In such cases, the latest version of the document shall prevail over the older version. The Company does not undertake to notify of any changes. The latest version of the document can be accessed via our website www.qorpo.co.

13. Although we make every effort to ensure that the latest version of the White Paper uploaded on the website is relevant and accurate, you must not rely on the information provided in this document as an alternative to the qualified professional advice from the third party.

14. If you have any special questions about any legal, financial, taxation or other issues, you should consult an appropriately qualified professional.

15. This document in the English version is the main official source of information about the QORPO Project.

16. Information contained in this document may, from time to time, be translated into other languages or used in writing or verbally to communicate with the existing or potential clients, partners etc. In case there is a conflict or inconsistencies between the translated versions and the official document in English, the provisions contained in an official document in English shall prevail. 18. The QORPO company will not be liable to you in respect of any business losses, including without limitation loss of or damage to profits, income, revenue, use, production, anticipated savings, business, contracts, commercial opportunities or goodwill that may arise directly or indirectly from the document.
