

INTRODUCTION

Our journey is an answer to the series of events happening around the world lately namely *Inflation *Market crashes * Protests *Invasions * Deforestation * Hunger * Climate changes just to name a few ., What would happen if a cryptocurrency project was meant to be a symbol of freedom, resistance while also being an investment ?

While the word Defi includes decentralized , it is in reference to economic status as opposed to its internal hierarchy . The founder Yuri just as Satoshi the founder of the bitcoin wishes to be anonymous and said this for our beginning " We are an experiment in a decentralized community building to resist and have our freedom with our heads up not between our legs"

While none of us expected it, this is a start to a new revolution . Projects built on the foundation of community building and involvement are the untamed wilderness of the future .

As we move further away from the rigid financial structures and traditional mindset and also accepting that we cannot make a change , we discover more and more that our voices count, our choices count and most importantly we a free beings to discover new ways to solve issues and relate more to one another

In a world ruled by commodification of time , community-run projects are more than just a pace of time , more than just a change of pace , they are a way to make a radical change, a bold statement likewise .

When success depends on shared strength of the individuals who make up a community, we are prompted to shift our prespectives to align with those around us . The JURAT eco-system is our way of recognizing and tearing down this long-established paradigm

A community is held together by hundreds if not thousands of interconnected moments . By studying new individuals drawn to our project, we realize that true strength does not come from one of us alone , it come from when we work together in harmony

With these thoughts in the mind of the creator ., JURAT was born

WHY DECENTRALIZATION ?

We are standing at a crucial moment in history and innovation .

Until now , centralization has been the norm and prerequisite for all our official structures . Educational, Political, Financial systems also somewhat the Government body . Crafted in ways that does not fairly and equally distribute power and resources to those functioning withing them. There have been times in our history where this sort of internal structure played an important role, bit in an age with the information of the world available at the click of a button, it is time to rethink .

2022 opened our eyes to how little control the average individual has in the face of these overarching , generational structures and has to be forced to be just a statistic and with no consideration of fairness or consequence.

Cryptocurrency itself comes from the idea of redefining wealth and how it can be acquired, which goes against traditional processes by its very nature. And yet, most, if not all, cryptocurrencies function within enforceable rules. It is easy to see when we look back at cases like the SEC/s win over the kin Ecosystem (a centralized authority)

OUR BACKGROUND

It is important to note that Yuri approached the creation of our community from a very unique perspective .

"We believe through the collective power of decentralization that we can build something stronger than what a centralized team could ever create .

A community-run token is nothing without the united individuals who give it purpose"

From the very day of the invasion of Ukraine by Russia on 24-02-2022, the idea of JURAT was born and ever since has been drawing the attention of individuals who stand for the same values as that which made it possible in the first place

Whether you are a new recruit or an old guard, If you fly under the JURAT banner you must embrace our founding principles

*** We started from zero, It is the spirit of our project to create something out of nothing**

*** We were not founded from an existing community.**

*** We stand with FREEDOM, PEACE , and TOGETHERNESS**

THANK YOU. you are the real JURAT ARMY . and we salute you.

WHY BINANCE SMART CHAIN ?

When comparing different blockchains, you might wonder why Binance smart chain was chosen. The answer , like the rest of the our project, is straightforward and with purpose .

Our founder Yuri, embarked on the JURAT journey with a predisposition towards the BNB in the first place. It is already secure and well established, and it truly allows us to stay decentralized .

His top priority was to ensure that his project was free to change and evolve with zero outside regulations impacting it. and BNB was the way to achieve that goal . Our army is able to hold their own tokens in a wallet and collect payments from around the world , all while remaining independent of moderating forces .

Our founder also chose to send more than 50% of the total supply to Windred Tylers wallet because in his words , " We sent over 50% of the total supply to Tyler. There is no greatness without a vulnerable point and as long as WT doesn't rug us, then JURAT will grow and survive "

These aspects of the Binance smart chain are what made it the perfect foundation for Jurat, a truly decentralized cryptocurrency which every individual can buy, sell , trade and hold .

As the Binance smart chain network grows , bringing faster and cheaper transactions with it, JURAT is poised to become the most popular coin in the future with the idea of introducing it to become a means of exchange online and for purchases .

THE VISION FOR THE JURAT TOKEN

We are dedicated to building the best decentralized community on the planet. To provide a safe place for people who share the same values and respect the idea of having a free world .

We are dedicated to ensure longevity of JURAT and its community.

In Yuri's words " Jurat coin will be used to make purchases in the future not just a coin to hold in the wallets., I want to to be in the hands of every single person who shares the idea of freedom and will make sure this dream is realized "

TOKENOMICS

Total supply of JURAT : 1,000,000,000 (one billion)

Burned tokens : 0 (zero)

Jurat coin is limited to the listed supply above and not a single addition will be made in the future ., this is to retain and increase value as more people join the community .

Team : 3,000,000 (three million jurat). the team allocation is granted to the founders, and persons involved in the project.

Circulating supply : 1,000,000,000 (one billion)

CONCLUSION

The Jurat community started with the seed of an Idea. What could happen with no centralized team, no funding , and no direct leadership? Could decentralization actually work out? Could we be able to follow the perfect storm of digital currencies, like BTC or ETH , except perpetuate something that is fully commodity based ?

Now while we do stay around and make it our mission to "defend the idea" and protect the community from external forces and scammers , the volunteer team has done a good work and built the future of meme-coin finance through this project.

Note this is just the beginning of a new dawn, a new era where people can stand firmly on what they believe , be free to express themselves and we as a community will support each other and defend each other and respect each other.

This project will be kept alive by the individuals who share the dream and values together even after years gone by

Again we would love to say a BIG THANK YOU to each and every one of you , without your support and participation , none of this would be possible

Its time to take a stand !!
