

# KAINET

## WHITEPAPER

# NOTE OF THANKS/FOREWORD

At this point we would like to thank once again all those who have always stood by our side and now finally can be a part of something big.

The long wait has now come to an end with the release of KAINET. During the last months we have had deep discussions regarding the development of formerly KAI INU and now we have made a decision to give it a face.

Also, we would like to thank the community and the admins who never doubt us. We would also like to dedicate our thanks to the HODLers, without them, we would not have been able to maintain our market volume.

DEVs of KAI NET

# 1. WHAT IS \$KAINET?

KAINET is a new DeFi ecosystem of utility tools and a first of its kind play-to-earn RPG game, all powered by the KAINET token. Backed by an established team of developers, crypto experts and most importantly a growing community, KAINET is revolutionizing the metaverse.

## NOW FOR SOME FACTS:

- KAINET was relaunched, there was a token swap
- The ownership is not renounced, we have full control of the contract
- Liquidity and team tokens are locked
- Auto Liquidity Provider, Marketing Fee and Rewards mechanism, this feature will be removed soon.

## 1.1 THE EXECUTIVES

CEO

## 1.2 HOW AND WHERE CAN I BUY \$KAINET?

\$KAINET tokens can be purchased through the following exchanges:

- Bibox
- Pancakeswap
- Tokpie

In order to buy \$KAINET tokens, you must have a wallet.

## 1.3 WHY SHOULD I BUY \$KAINET?

As a HODLer, you can expect rewards to be transferred to your wallet address when someone else buys or sells tokens. This way you earn passive income. The payouts are 2% for each transaction, which are transmitted to you by the Pancakeswap router.

KAINET is a long term project with a big vision. Our project is supported by various developers who have experience in blockchain technology for many years. Furthermore, the project offers a technology for everyone through the different utilities that will be explained in this whitepaper.

The \$KAINET token was brought to life in Germany. Accordingly, the buyers of the token benefit from quality, a la „Made in Germany“.

Clearly, our token is a long-term investment. To get an overview of the future of the project, read chapter two.

## 1.4 WHAT TO DO BEFORE BUYING \$KAINET?

When buying tokens, it is important that you always double check the contract address. Also check you are in the BSC (Binance Smart Chain) Network

Contract Address: **0x723b6795be37ad8a0376acfb50034fa21912b439**

To keep an eye on the price development, you can use the following links:

- <https://poocoin.app/tokens/0x723b6795be37ad8a0376acfb50034fa21912b439>

- <https://www.kainet.world/vision>

## 1.5 WHY THE BSC NETWORK?

In September 2020, the Binance Smart Chain was launched. It is considered the successor to the Binance Chain. With the BSC, Binance has created a chain that is optimized for both fast trading and the execution of Dapps. With the help of the Ethereum Virtual Machine (EVM), the BSC even offers full compatibility with Ethereum, so that Dapps written for Ethereum can largely run on the BSC without any changes and also run faster.

Another important advantage are the fees (gas fees) incurred when buying & selling assets.

In the game Land Of Kai players are often asked to perform and confirm transactions, the less gas charges on the BSC will make the gaming experience even better and keep the costs low.

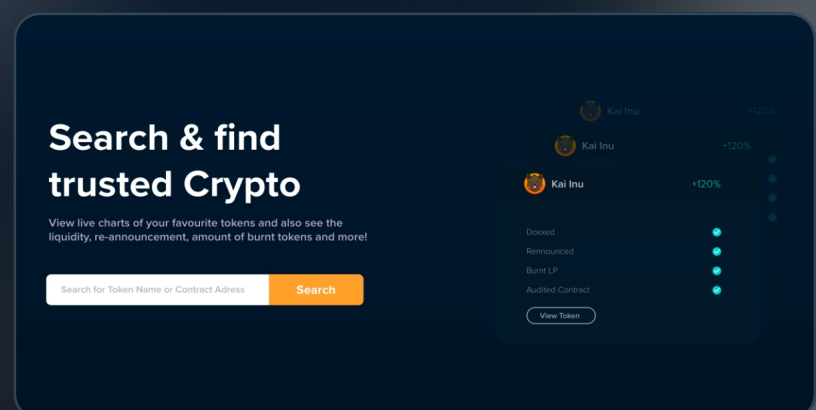

## 2. VISION & FUTURE

Cryptocurrencies are on everyone's lips these days. We have long thought about how and where to start such a cryptocurrency. All developers involved in this project know each other personally and are accordingly good friends. We have been dealing with cryptocurrencies since 2017 and are therefore well informed.

We decided to relaunch \$KAINET to remove the INU addition. With the help of \$KAINET we have developed an unprecedented play to earn game that is based on the wishes and expectations of the players.

Furthermore, Kai Vision and Wally offer investors the possibility to keep an eye on their portfolios, track transactions and securely invest in new projects.

## 2.1 USE CASE OF \$KAINET

Our intention is to develop a play to earn game. Currently, we already have a wallet that allows you to track your assets on our website. Another important thing is Kai Vision, for Q4. It helps you to avoid certain risk factors when investing in other tokens. With Vision you will be able to track all new tokens and check their numbers and stats out.

## 2.2 FUTURE PROSPECTS

Our goal is to increase market capitalization. Through targeted marketing we want to grow the community and gain more awareness. Currently, we have been already listed on Coingecko, CMC and Blockfolio under the name of \$KAIINU. We will update those links with the new name \$KAINET in the near future. The utilities we provide will of course be in constant process of ongoing development to provide every holder and holder to be relief in playing and research.

Furthermore, our team is in discussion with different exchanges to simplify trading for new members.

Additionally, we are looking for charity partners who would cooperate with our project.

Our biggest goal is to be partnered with the top-tier crypto services and exchanges, utilizing them to bring mass-adoption of \$KAINET. With the help of the community and its ambassadors, reaching a high market capitalization should not be a problem. We strongly believe that our project will succeed in the longterm run.

## 2.3 LAND OF KAI (PLAY.KAINET.WORLD)

Land of Kai is an open world 3D game. In the game you have the option to buy certain NFT objects and pay for them with the in-game currency. These objects are needed for farming. Once Play2Earn is available, you will need KAINET to be able to play the game.

There will be the possibility to complete quests, start raids with different players and PvP. Also, players will be able to decorate their own rooms by using the purchased NFT objects. Compatibility with Opensea will be provided, so you'll be able to buy and sell certain objects through this platform as well.

In addition, there will be the possibility to sell or trade your NFT objects in the game by using the in game market.

Land Of Kai is currently available on our website [play.kainet.world](https://play.kainet.world). Our Game head development team is also currently working on the desktop version which will offer better gameplay experience, graphics and more in game features. Furthermore, we want our game to be published on Steam next year.

## 2.4 PLAY TO EARN

In Land Of Kai you will be able to earn an additional tokens or NFT objects by completing different quests. Players will have the option to sell these earnings on the market or upgrade their NFT pets. More details about the Play2Earn style and the NFT pets will be published in the next version of this whitepaper.

## 2.5 KAI WALLY

Wally is the first app in the KAI ecosystem. You can use it to track your entire portfolio of tokens and NFTs across networks including Ethereum, Binance Smart Chain, Polygon/Matic and Fantom. Wally can track multiple wallets at once, including real time and historical pricing.

## 2.6 KAI VISION

The crypto universe is incredibly data rich and can be overwhelming to navigate, even for expert users. KAI Vision aggregates data from multiple sources and provides useful insights that help users make smarter investments. Compare tokens based on volume, time since ATH/ATL, community size and activity and more!

# 3. CONTRACT

Our Smart contract is structured in such a way that two percent rewards are collected for each purchase. These are then distributed among the holders. When the tokens get sold, two percent are used for marketing and three percent for providing liquidity. We have also the option to turn these fees off.

## 3.1 AUDIT

The contract will be audited soon. The previous contract of \$KAINET has been audited by Tchrte. You can download the file in the link below.

<https://kaiinu.s3.amazonaws.com/Kai+Inu+Full+Smart+Contract+Security+Audit.pdf>

## 3.2 TOKENOMICS

Each transaction is subject to a seven percent fee.

- 3% goes into liquidity to be able to guarantee trading. The higher the liquidity, the more stable the price. This leads to a lower price impact.
- 2% is returned to the HODLers. This leads to them benefiting and reconsidering the sale of their coins.
- 2% goes into the marketing wallet to enable listings, buybacks and the acquisition of influencers. The goal is also to support aid organizations with the help of the wallet.

Depending on whether the staking or the release of the game occurs, we will turn off the fees for buying and selling. This step will contribute to the transformation into an altcoin.

## 4. MARKETING STRATEGY

To differentiate ourselves from other cryptocurrencies, we use a radical marketing strategy.

We publish countless posts and traffic via the social media channels mentioned in section four to attract as many new users as possible.

Furthermore, the admins as well as the DEV team are available daily in the chat to answer the questions of the new users. .

### 5.1 HOW IS MARKETING FINANCED?

Our marketing is mainly financed with the help of the marketing shares generated by the purchase and sale of assets.

The wallet address is used exclusively for the payment of marketing activities. Possible marketing activities include the acquisition of influencers, the financing of daily buybacks or the payment of possible listings.

### 5.2 SOCIAL MEDIA MARKETING

Our efforts serve to increase brand awareness and generate leads. Furthermore, marketing serves to maintain customer relationships. Marketing activities enable us to better differentiate ourselves from the competition and expand our reach. Every day we are looking for ambassadors who want to promote \$KAINET. If you have a significant number of followers, we now offer you the opportunity to promote us. Every day we are looking for ambassadors who want to promote \$KAINET. If you have a significant number of followers, we now offer you the opportunity to promote us.

## 5. SUMMARY

If you miss certain points in the whitepaper, please contact us with your criticism. This will help us to optimize the whitepaper again and again. That's it from us for now. Be active in the community and spread the word.

## 6. SOCIALS

It is important for us that the community is well informed about news as well as news. In this section we will introduce our social media channels and explain how they work.
