# ADAPT - IMPROVISE - OVERCOME

ETHEREUM & BSC TOKEN CONTRACT:

0xAE36155a55F04a696b8362777620027882B31dB5

TOKENOMICS

LIQUIDITY & BURN
1%

DEVELOPMENT
3.5%

GAME & EARN
3.5%

Our tokenomics are taxes applied on tokens being bought & sold. To ensure the continuous growth of our ecosystem, 3.5% of every trade will be contributed to the development of utilities & marketing, 1% of every trade will be contributed towards the liquidity pool to help provide price stability and defense against chart manipulation.

As part of our long term ambitions, 3.5% of our tokenomics will also be contributed to both our Passive Income Modules & for injecting rewards into our game - this will allow investors to generate a passive income through gaming.

CIRCULATING SUPPLY

Total Maximum Supply of Kishimoto tokens:
100,000,000,000 (100 Billion).
Ethereum & Binance Smart Chain

Tokens Removed From Circulation (Burned):
50,000,000,000 (50 Billion)
Ethereum & Binance Smart Chain

Total Circulating Supply: 50,000,000,000
(c. 50 Billion Tokens as of 30/09/22)
Ethereum & Binance Smart Chain

Circulating Supply is the amount of tokens from
the total supply that are available to buy, sell or
trade in the market.

Circulating Supply = Market Cap/Price
BRIDGING MADE EASY

POWERED BY CATOSHI

We have implemented the ability to bridge Kishimoto tokens across different networks into our Ecosystem. Holders are currently able to bridge between Ethereum & Binance Smart Chain networks.

The purpose of implementing a bridge into our ecosystem allows holders the ability to utilize arbitrage price action across both networks, including our current staking pools located on Unicrypt - these offer two separate pools supporting each chain offering higher and lower APR % returns. By utilizing our bridge, stakers can take advantage of the higher rewarded staking pools and then bridge back at the end of the term if so desired.

As part of our extensive roadmap we will be launching our native token Kishimoto on the Polygon network. This will also be incorporated as our third chain utilizing our bridge. The main purpose of utilizing Polygon will be as the supporting network for Ascension - our Open World Role Playing Game. This will allow for minimal transaction fees when harvesting in-game rewards. The in-game items collected during play will be Polygon NFTs tradable with other players as well as on OpenSea and other supporting platforms.

LIQUIDITY LOCK

We locked our liquidity on both the Ethereum and Binance Smart Chain networks for three months. Our liquidity lock will increase in thresholds based on market capital increasing. We understand the importance of safety in this space and to provide reassurance to our community, we made the decision to lock our liquidity for this period of time.

Ethereum Lock:

ROADMAP ORIGINS

CHAPTER ONE ✓

- TOKEN LAUNCH 18TH OCTOBER 2021
- V1 CONTRACT AUDIT BY TECH RATE
- GENESIS NFT COLLECTION
- XT EXCHANGE LISTING
- HOTBIT EXCHANGE LISTING
- BKEX EXCHANGE LISTING
- LBANK EXCHANGE LISTING
- KISHIMOTO STAKING
- CHARITABLE DONATIONS
- SAITAMA 1 MILLION DOLLAR STAKING
- SAITAMASK LISTING
- NEW YORK BILLBOARD

CHAPTER TWO ✓

- CROSS CHAIN BRIDGE
- V1 KISHIMOTO BSC LAUNCH
- BSC FARMING
- DUBAI CRYPTO EXPO
- BETA NFT MARKETPLACE
- STAKING FOR SHARITY TOKEN
- STAKING FOR SERENITY TOKEN
- STAKING FOR DREAM TOKEN
- STAKING FOR LYST TOKEN
- STAKING FOR PARA TOKEN
- STAKING FOR MEDI TOKEN
- GENESIS NFT STAKING

CHAPTER THREE

- V2 LAUNCH - 30TH SEPTEMBER 2022
- V2 CONTRACT AUDIT BY TECH RATE
- PROJECT REBRANDING
- V2 LIQUIDITY LOCKED
- KISHIMOTO.IO WEBSITE PUBLISHED
- NEMESIS NFT COLLECTION
- RADIOSHACK LISTING
- UNICRYPT ETH & BSC STAKING POOLS
- SAITAMA CONNECT MIAMI EVENT
- SAITAPRO LISTING
- ETHEREUM & BSC BRIDGE RELEASE
- 50% TOKEN BURN ON ETH & BSC

CHAPTER FOUR

- ASCENSION OPEN WORLD GAME
- VIRTUAL REALITY NFT MARKETPLACE
- POLYGON BRIDGE
- KISHIMOTO POLYGON LAUNCH
- ASCENSION POLYGON GAME NFTS
- STAKING MODULES FOR PROJECTS
- NEMESIS NFT STAKING
- NEMESIS KISHIMOTO BUYBACKS
- LIQUIDITY LOCK EXTENSION
- 50% BURN ON POLYGON SUPPLY

CHAPTER FIVE

- ASCENSION EXPANSION 2.0
- GENESIS STAR NFT GAME PERKS
- KISHIMOTO MERCHANDISE RELEASE
- STAKING MODULES EXPANSION
- NEMESIS NFTS LINKED TO ASCENSION
- NFT MARKETPLACE EXPANSION 2.0

CHAPTER SIX

- VIRTUAL PRIVATE NETWORK DAPP
- GENESIS $200,000 GIVEAWAY
- COMMUNITY NFT RELEASE INCENTIVE
- ASCENSION EXPANSION 3.0
- NFT MARKERTPLACE EXPANSION 3.0

OUR ECOSYSTEM

The Kishimoto ecosystem is built on the foundations of our utilities. Introducing the four elements powering our future:

Virtual Reality 3D NFT Marketplace, Play to Earn Open World Gaming, Virtual Private Network and Passive Income Modules. These are the elements that connect our ecosystem through its evolution.

Our vision is clear, transparent and forever evolving. Adapt, Improvise & Overcome.

VIRTUAL REALITY 3D NFT MARKERTPLACE

INTRODUCING BETA VERSION

Introduced into our ecosystem in March 2022, our 3D NFT Marketplace welcomes a vibrant 3D surrounding showcasing the Kishimoto NFT collections. Buying & selling NFTs and many more surprise elements will soon be included. The 3D NFT Marketplace will be a one-off metaverse for NFT artists to explore and showcase their collections.

INTRODUCING VIRTUAL REALITY

We are currently upgrading our marketplace from our BETA version and implementing Virtual Reality into our very own Metaverse, thereby allowing users to gain a sense of freedom and adventure whilst exploring our expansion. We will be presenting a brand new design and presentation of our marketplace in due course.

ASCENSION RPG

INTRODUCING OPEN WORLD GAMING

Integrating gaming into our ecosystem with the help of highly skilled game developers is at the forefront of our roadmap. Our play-to-earn game will be introduced into the Kishimoto ecosystem in Q4 of 2022. Our play-to-earn game has been in development since December 2021 and will incorporate the Kishimoto NFT collections.

Only Genesis Kishi Ninja NFT holders will have exclusive first access to the game

WHAT TO EXPECT?

Introducing an Open World Role Playing Game (RPG) with Player vs Player (PvP) and Player vs Everyone (PvE) aspects to benefit both styles of play. This will give users the ability to gain new skills and attributes as they progress on their journey. The development of the game will be forever expanding. Our new supporting tokenomics will ensure the expansions are implemented in future updates. Items you obtain during your time in Ascension will become Polygon NFTs for OpenSea trading with other players.

VIRTUAL PRIVATE NETWORK

WHAT IS A VIRTUAL PRIVATE NETWORK?

Virtual Private Network services establish secure and encrypted connections to provide greater privacy and security than a secure Wi-Fi hotspot or regular internet connection.

WHY USE A VIRTUAL PRIVATE NETWORK?

When you are using a Virtual Private Network, not even your internet service provider (ISP) can see what you are doing. Use a VPN to stay protected at home or on the road, especially when you are using public Wi-Fi hotspots.

WHY USE OUR VIRTUAL PRIVATE NETWORK?

You will be able to purchase your subscription in a unique way that doesn't require any personal information. This provides greater security while you stay anonymous, protecting your privacy even further. This unique process unlocks complete anonymity to the desired users. Our VPN application will be available on PC, Mac, iOS and Android

PASSIVE INCOME MODULES

UNICRYPT STAKING ETH & BSC
KISHIMOTO FOR KISHIMOTO

The foundations of Kishimoto started with staking. Our ecosystem will grant opportunity to both Ethereum & Binance Smart Chain investors eager to make their investment work for them.

We have introduced staking Kishimoto for Kishimoto on Unicrypt. The purpose of our staking module is to provide investors the ability to maximise their current holdings for the passive income modules that lay ahead for alternative projects.

The current staking module allows you to either lock your tokens for a boost in rewards or alternatively remain unlocked without a boost. This particular module will last for three months giving you the ability to accumulate more Kishimoto tokens on both supporting chains (Ethereum & Binance Smart Chain).

Once this module concludes we will open further options of staking for reputable projects we have vetted personally as explained in this section.

PASSIVE INCOME MODULES

DIVERSIFY WITH KISHIMOTO

Part of our ambitions are allowing consumers to diversify their portfolios utilizing Kishimoto Tokens. Our team have always been great supporters of providing our investors with the opportunity to maximize their portfolios with other vetted projects that have extensive long term ambitions within crypto.

The process of staking will consist of locking your tokens into our passive income modules for a selected duration of time. Once the pool has expired you will retrieve your tokens along with your generated rewards over the threshold you agreed to enter.

The chronicles of Kishimoto's staking will provide our investors with colossal opportunities to diversify as part of our new journey, and we are passionate to continue these milestones that our team has already achieved.

CHRONICLES OF KISHIMOTO STAKING

Our development team have always been passionate about giving back to our community. The staking modules were a primary focus from the moment they were integrated into our ecosystem in November 2021.

The idea of diversification spanned from success within the team through their own journeys in crypto. Our chronicles began with a ten day staking event giving our investors opportunity to accumulate Kishimoto tokens by staking their Kishimoto tokens.

Briefly after the expiration of the ten day staking event, we introduced a sixty-day pool granting exclusive rewards to our community in our $1,000,000 Saitama staking event.

Once the Saitama staking event concluded our team introduced passive income modules for our former governance token Katsumi in February 2022. 90% of the entire supply of Katsumi tokens was reserved exclusively for staking rewards which were only obtained by by staking Kishimoto tokens in a flexible staking event.

To diversify even further, we created the Katsumi Emerald Pools staking event which provided multiple different modules for staking the newly earned Katsumi tokens for projects such as Sharity, Serenity, Dream, Lyst, Para and Medi Token.

GENESIS NFT COLLECTION

Our Genesis NFT Collection is recognized as the iconic chronicles of our ecosystem - 10,000 unique digital collectibles existing on the Ethereum Blockchain. Each of our Genesis NFT Collection grants exclusive early access to our highly anticipated Open World Role Playing Game - Ascension.

Minting a Kishi Ninja NFT acts as your entry to the most prestigious Blockchain Community ever built.
Adoption Fee: 0.05 ETH + Gas

GENESIS NFT COLLECTION

The Kishi Ninjas Genesis Collection was incorporated into our ecosystem in November 2021. We implemented these unique anime digital assets as part of our long term ambitions.

The foundations of the Genesis Collection were designed specifically to be implemented into our Open World Role Playing Game, granting exclusive access to those who obtain one of our NFTs to enter our game.

The Genesis Collection consists of 10,000 collectibles. We recognize these as the most desirable assets available due to their limited supply - the true chronicles of our Ecosystem.

The Kishi Ninjas Genesis Collection contains different rarity tiers. The more desirable NFTs contain ninja stars consisting of either Bronze, Silver, Gold or Platinum stars. The higher the rarity tier, the more in-game perks you will receive in the expansions that follow.

GENESIS COMMUNITY GIVEAWAY

Our ambitions are to put our community first. Our colossal giveaway has altered from benefiting an individual to benefiting a community. The previous $200,000 incentive has now been replaced by fifty winners of $4,000 each once our Genesis Kishi Ninja Collection hits the 5,000 mint milestone.

WHO IS ELIGIBLE?

Obtain one of our Kishi Ninja NFTs through minting directly from our website or purchasing from our official opensea. The Token ID for your Kishi Ninja NFT is your qualifying entry to our incentive. Multiple entries also qualify for our incentive, the more you collect the more opportunities you have of winning in our prize draw.

Our team will host an event selecting the winners at random during the event, if your Token ID is selected you win.

NEMESIS NFT COLLECTION

The Nemesis NFT Collection is another element in our forever evolving ecosystem which will also be incorporated into Ascension as part of our roadmap origins. This collection represents the strength and tenacity of our community.

The Nemesis Collection consists of 8,888 exclusive NFT collectibles that will live on the Ethereum Blockchain. Nemesis' has been incorporated to benefit the Kishimoto Ecosystem, granting exclusive staking for Kishimoto Tokens.

The mechanics of staking is implemented by utilizing funds generated from minting, to provide essential buy backs of Kishimoto tokens in thresholds when NFTs are minted, utilizing every aspect of the collection to benefit our native token by buying tokens and distributing to those staking Nemesis NFTs.

The traits are programmatically assigned but manually drawn giving each artwork a distinct identity and lending added value to the Kishimoto Community. Your Nemesis NFT is your clan membership - it unlocks exclusive perks and grants you preferential access to events that celebrate the spirited nature of our community.

Adoption Fee - 0.15 ETH + Gas
