The Ecological Development

Let us understand the status quo of the ecological development of the DeFi, Metaverse and NFT.

DEFI METAVERSE NFT GAMEFI

Decentralized Exchanges (DEX) in 2021

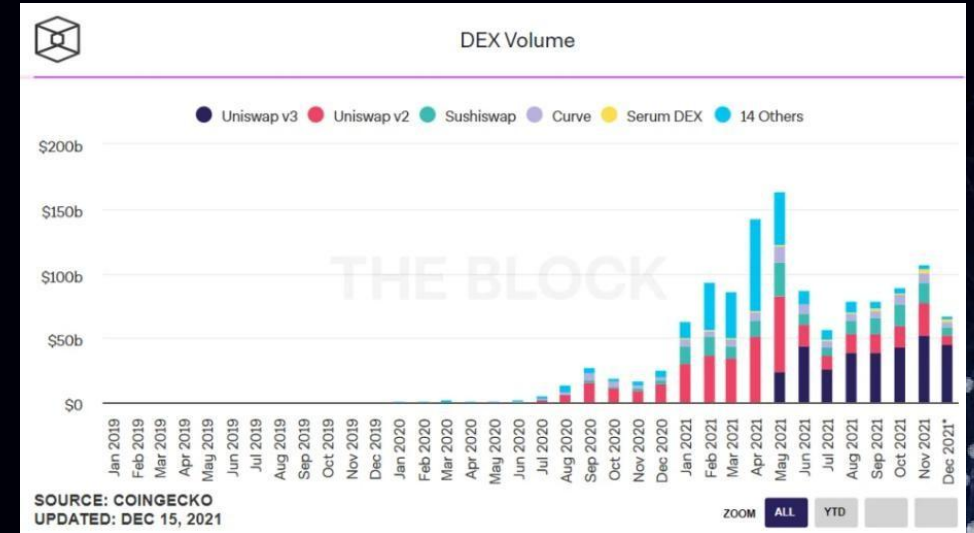

Trading volume exceeds

\$1,000,000,000,000

According to The Block Research, decentralized exchanges (DEXs) report that DEX trading volume will exceed \$1 trillion in 2021. According to data as of December 23, 2021, this figure represents a significant increase of 858% compared to DEX trading volume in 2020. In 2020, DEXs facilitated just over \$115 billion in transaction volume.

In the first quarter of 2022, it has exceeded 300 billion US dollars.

Among them, DAO ecological tokens such as Metaverse (METAVERSE), NFT and Decentralized Finance (DEFI), and Chain Games (GAMEFI) occupy an important share.

ABOUT DAO

With the fire of concepts such as blockchain and metaverse, another derived term, DAO, has also attracted widespread attention.

What is the DAO?

DAO-Decentralized Autonomous Organization, from the conceptual disassembly, it can be seen that it contains two important characteristics, namely decentralization and autonomy, while the existing DAO currently relies on the blockchain to achieve a decentralized operation and decision-making system. The advantages of this type of system have

also ensured the openness of the network. Autonomy, that is, automatic operation that does not require human intervention, can be further understood as the specific operation activities in the organization are generated by pre-written code. After the organization activities trigger a certain condition, the smart contract will automatically start the execution, and the organization will govern itself.

DAO is considered by many to be one of the most promising directions in the future social organization structure.

2020 belongs to DeFi, 2021 belongs to NFT, and 2022 will be the year of DAO. Whether it is DAO infrastructure or decentralized applications based on DAO organizations, we believe that DAO will have a lot of room for improvement. To this day, DAOs have been used in a variety of scenarios.

Looking back on the ecological development of DAO in 2021, its applications have covered various fields such as development tools, services, social networking, media, creation, collection, etc., attracting the attention and investment of global capital and people of insight. It can be found that DAO is at the intersection of major popular sectors such as NFT, GameFi, and DeFi.

DAO is born with financial attributes and investment preferences. Its flat organizational structure makes venture capital no longer the "power" of a few people, and also allows "collective intelligence" to be maximized. DAO relies on the social capital and network of all members, may have an advantage over its traditional investor counterparts.

Moreover, the structure of DAO gives it more advantages in flexibility and speed, it can raise a large amount of funds in a short period of time without the constraints of traditional VCs, and it can also launch new ones for a popular NFT at any time. DAOs.

Venture capital is investing in DAO, and the form of these venture capital itself is gradually transforming into DAO.

DAO is inherently a global listed company, which makes DAO token a potential asset class.

At the same time, token holders have the right to participate in project governance, and the economic benefits of the token are also firmly bound to the DAO organization.

Under the incentive of the token economy, DAO can realize self-operation, self-governance, and self-evolution according to pre-set rules, without being controlled by centralized institutions, thereby reducing human errors caused by centralized decision-making, or to investors. Manipulation of funds.

About The LaEeb

What is the LaEeb?

Qatar World Cup 2022

The FIFA World Cup - Qatar 2022 is the twenty-second World Cup, the first in history to be held in Qatar and a Middle Eastern country, and the second in Asia. In addition, the Qatar World Cup is the first football World Cup to be held in winter in the northern hemisphere and by a country that has never entered the World Cup.

2022 FIFA World Cup Qatar mascot La'eeb officially unveiled.

Qatar and FIFA have officially unveiled La'eeb, the official mascot for this year's FIFA World Cup in Qatar.

La'eeb is an Arabic word for a highly skilled player. La'eeb is youthful, it comes from the "mascot universe" and is full of energy at the same time. La'eeb encourages everyone to believe in themselves and "go now." It will bring the joy of football to everyone.

The adventurous, fun and fantastic La'eeb was unveiled during the draw for the 2022 FIFA World Cup Qatar 2022 final stage in Doha on 2 April 2022.

La'eeb will be known for its youthful spirit; wherever it goes, it will deliver joy and confidence. La'eeb comes from an alternate universe where the mascots of major tournaments live together. There, inspiration and creativity are the foundations of character building in all minds. La'eeb will be in every corner of the world – welcoming the world, inspiring young fans and cheering the game during the World Cup, which runs from November 21 to December 18.

LaEeb DAO

LaEeb is a metaverse autonomous community of freedom-loving fans from all over the world who yearn for peace, freedom, fairness and justice. Here, inspiration and creativity are the foundations of character building in all minds. With youthful energy and an unstoppable spirit, LaEeb transcends time and place, allowing it to be with fans around the world, no matter where they are. It will excite fans ahead of the 2022 FIFA World Cup in Qatar, an autonomous platform that unites cultures around the world. LaEeb will develop a community ecological consensus to every corner of the world - welcome the world and inspire all freedom-loving young people.

1. Add To Liquidity: 1%

Exchange LaEeb on the PancakeSwap exchange, 1% of which are automatically transferred to add liquidity. Guarantee sufficient liquidity to provide transactions.

The specific method is: the contract converts 50% of LaEeb into USDT in SWAP, and combines it with the remaining 50% of LaEeb into LP to inject liquidity.

LP

2. DOGE Reward: 3%

Exchange LaEeb on the PancakeSwap exchange, 2% of which are automatically transferred to the LP reward.

All users who have added liquidity (LP) can get LP rewards according to the number of LP.

The LaEeb community and the DOGE community have reached an ecological cooperation to empower each other. LP rewards will be converted to DOGE. Accumulation to 3000DOGE triggers the contract to reward DOGE to all users who add LP.

BUY

3. Repurchase and Destruction: 1%

Exchange LaEeb on the PancakeSwap exchange, 1% of which are automatically transferred to the Repurchase and Destruction.

Guarantee active purchasing power, increase the price of LaEeb, stabilize ecological development, and create a virtuous circle of ecology.

The Specific Method

The accumulation of 4BNB will automatically trigger the contract to repurchase LaEeb with BNB, and then immediately destroy LaEeb to the black hole address :

0x9CD7bc7D83F31224d8CD9d8dbc9Bd453Cd64A81e

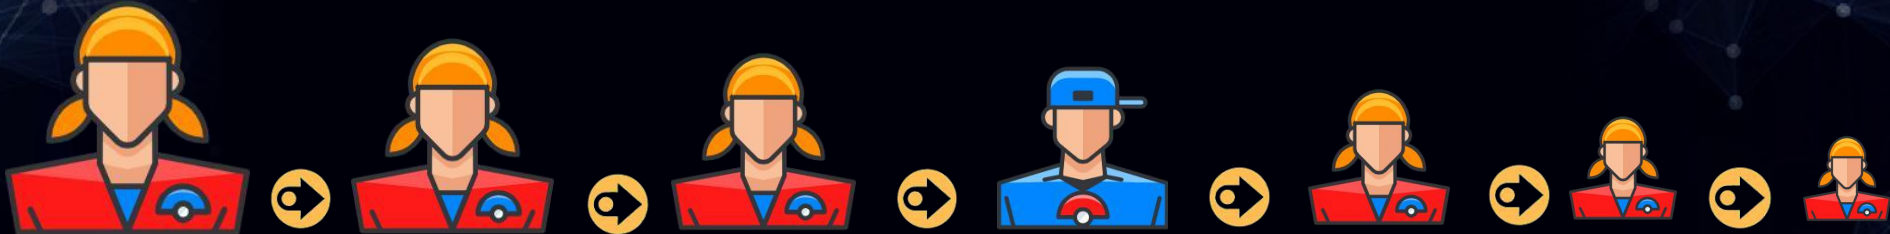

4. Marketing Promotion: 1%

1% of every transaction goes to marketing and promotion. We all know that no good project is complete without marketing and promotion, and LaEeb knows this and therefore has a marketing mechanism.

And it has already started to deploy a great marketing plan
