INTRODUCTION TO CRYPTOCURRENCY :

Cryptocurrency refers to digital or virtual money that is secured by cryptography to Transaction control and fraud prevention. It has no physical representation and is distributed across a wide Network of connected computers virtual environment.

It operates through existing decentralized networks on blockchain technology. Transfers are secured through public or private Keys and directly connected to the user's digital wallet. In contrast to the Currency traditionally used, it is not issued by a central authority and has Minimal interference or Manipulation by the government. I also became one of The most Amazing and volatile financial asset classes in the markets, it offers Various advantages, such as portability, divisibility, anti-inflation and Transparency.
