

# MARSX

# WHITEPAPER

Version 1.0 - October 2021

ENGLISH

Welcome to **MARSX**, a community-driven platform that promotes \$MX as the official token used for space transportations.

*“You want to wake up in the morning and think the future is going to be great — and that’s what being a spacefaring civilization is all about. It is about believing in the future and thinking that the future will be better than the past. And I can’t think of anything more exciting than going out there and being among the stars.” — Elon Musk*

New threats to our world, such as mass extinctions, natural calamities and so on, are becoming more and more worrying. Anyone is afraid for the future of our species and we want to keep humanity alive.

One of the possible solutions is the Mars colonization, which has considered as an inevitable passage for humanity future.

That is why the colonization of Mars has received a very big interest from public space agencies and private corporations. Elon Musk has accepted this challenge and is investing many resources in SpaceX project.

SpaceX has a clear mission: build a Martian colony of over 80,000 people.

*“I’d like to see that we’re expanding the frontier and moving things forward. Space is the final frontier and we have to make progress”*

Thanks to Elon Musk’s vision, this will be possible very soon. To achieving it, Elon Musk is focusing on a particular goal: Space transportations...and this is where MarsX come into play!

Elon Musk and his company plan to build spaceships to transport the first colonists to Mars. To make the trip more attractive for its crewmembers, Musk promises that it will be “really fun” with zero-G games, movies, cabins, games, a restaurant.

With MarsX we will do our part! We are pretty sure Mars economy will run on crypto and this involves also the travels to Mars.

*Artemis*

*September 30<sup>th</sup> 2021*

# HOW IT STARTED

With this vision in mind, Artemis launched MARSX (\$MX) in September 2021.

After that a passionate community of dreamers, MarXians, soon started shaping up into a crypto space enthusiasts community.

Our motto is #HEREWECOME

# THE MARSX ECOSYSTEM

A DApp where MX holders can benefit of special APY on their holdings (V1 release).

It will be continuously integrated with new features for helping out the users with the tracking of their crypto assets (V2 and V3 releases).

Our new Ecosystem governance tokens, which will be launched by the end of 2021 Q4, will allow holders to participate in MarsX's growth and strategy decisions through SpaceDao.

ProjectX

SpaceDAO

MarsXNFT

SpaceStudy

With the help of very skilled artists we will develop our NFT collection. All the earnings will be used for the growth of the project (buy back, marketing, airdrop).

A new web portal where our passionate community of Space lovers will learn more about Mars colonization and the newest Space related initiatives. We will allow advertising and all the earnings will be reinvested for the future of MarsX.

# OUR TOKENOMICS

\$MX is an ERC20 token that was launched on the Ethereum network on 30th September 2021.

Our supply corresponds to the semi-major axis length of Mars: 227,936,637 \$MX minted once, and never mintable again by smart contract restriction.

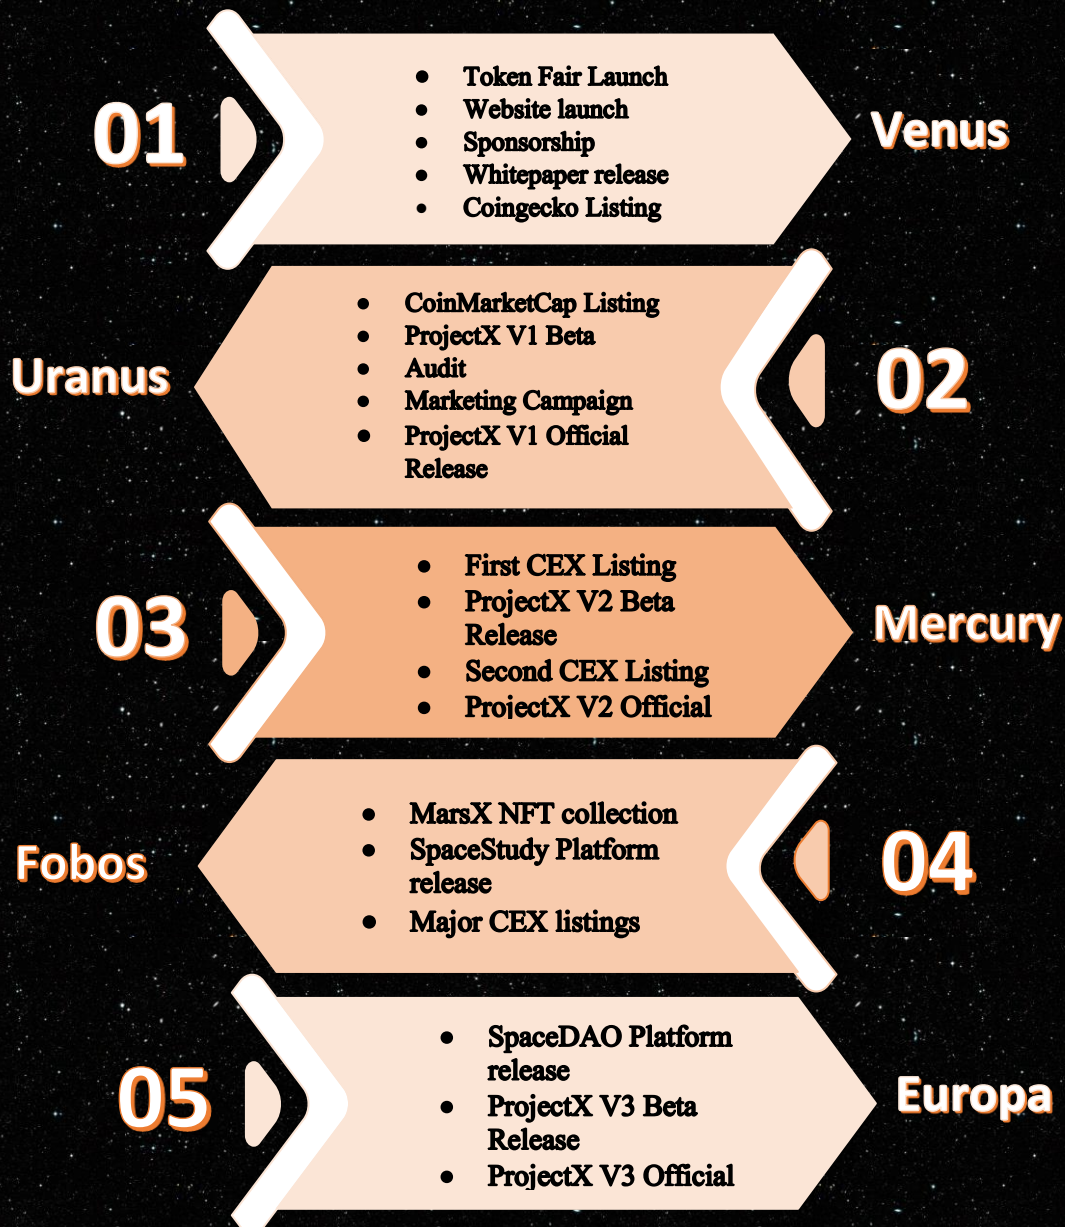

\$MX tokenomics is very clean, no weird redistribution or additional fees on buying or selling. Everyone will always be free to buy and sell their MX without paying unnecessary additional fees.

# OUR ROADMAP

MarsX is not just a visionary project, but a crypto community which is backed up by Senior Blockchain developers. We have a clear mission in mind: create something extraordinary.

Our roadmap will be continuously enriched with new milestones and ideas.
