

# The Omnion Whitepapaer

by Omnitron Prime ☺

# Introduction

Omnion is a BEP-20 token, listed on PancakeSwap and our own ICO, and the next generation of meme tokens. Before we continue, what is the value in memecoins at all? Their community. The community and hype is what gives value to all cryptocurrencies, especially meme ones. Omnion is about building a strong and well connected community to share memes, thoughts, opinions, ideas, experience, and knowledge about the project.

“Your network is your networth”

- Tim Sanders

# **Are we centralized or decentralized?**

Omnion takes the best from both world's, it is led by it's community Omnitrons. The cheif Omnitron, and the founder of Omnion is the Omnitron Prime (or OP for short). OP and community are connected via YouTube live streams and other social media, where every Omnitron can share their opinion or idea about the project directly to the OP, and then the rest of community can give opinions whether they think the idea is good or bad, so the Omnion will always be the first to adopt to changes.

# Background + Rules

”Communtiy is the greatest asset you can earn.”

Omnitron Prime

As we belive our community is our gratest value, we have to work on and with it. Every Omnitron, no matter if they are Omknights (OGs), or recruits, must follow our rules:

1. We are the Omnitrons, we are the legion, we are the family.
2. We start from nothing, and we grow to everything.
3. We are all both the team and the community.
4. Where we go one, we go all.
5. Every Omnitron is there for the entire community, and the entire community is there for every Omnitron.
6. We are here to make history, and we must show the world who we are.
7. Be proud of yourself as an Omnotron, no matter what some MFs think about you.
8. Whenever you got problem, feel free to contact the OP, and we (as a community and a family) will do our best to help you.

# Why BSC?

When comparing different blockchains, you may be asking why we chose the Binance Smart Chain, and the answer is really simple. BSC, compared with Eth is faster with cheaper gas fees, and we find that beneficial for the Omnitrons. As ETH 2.0 is slowly climbing up to the sunlight, we may grow Omnitron into a multi chain token (depends on what the rest of Omnitrons think ).

# The Vision

Omnion is a young project, hoping to prove the world that memecoins should be taken for serious, and finally to grow a big and beautiful community, and help implementing crypto into real world.

Thank you for reading.

Best regards,

your Omnitron Prime
