

# Pancake Games

**Leading you to the world  
of Blockchain Game**

**The new “Play to Earn” games are here**

# What is Pancake Games

Pancake Games is a new NFT gaming platform community token that connects various NFT projects and PancakeGames holders with a variety of content.

# What is Pancake Games

**Use cases are as follows.**

## **IDO for NFT games, pre-sale**

Pancake Games will be developing an IDO platform for NFT games in the future. Not all the currencies are available for the sale, but will give priority to those games that have been highly rated by users.

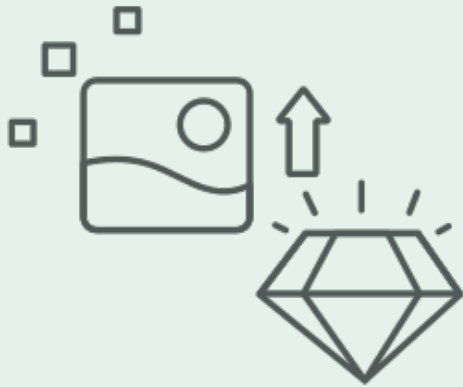

## **Cross-reviews and strategies by professional gamers, critics, and YouTubers will be open to the public**

Pancake Games allows professional gamers and critics to evaluate NFT games that they have actually played. In addition, they will publish their strategies and methods for playing NFT games. These ratings and strategies are only available to Pancake Games holders.

# What is Pancake Games

**Use cases are as follows.**

## **NFT Marketplace**

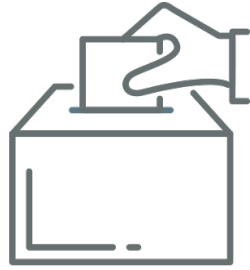

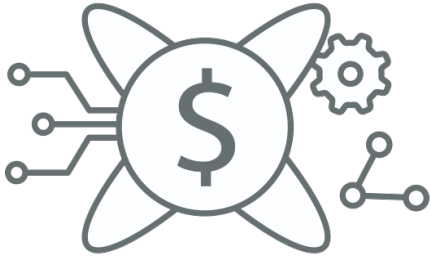

Pancake Games users will have priority in purchasing rare items (NFTs) that can be used in the game. Exclusive NFTs from other platforms will also be available in Pancake Games.

## **Will host the NFT events, game contest, and conference**

Pancake Games will be collaborating with the NFT game projects that we have partnered with to create a variety of interactive content for Pancake Games users, and we will be holding regular NFT game competitions and contests to promote and raise awareness.

# Governance token and voting

PancakeGames holders will be able to vote, request changes, and request for new NFT game IDOs. Holders of governance tokens will also be given priority to participate in IDOs and will be rewarded with NFTs that can be used in new NFT games.

**Everyday and every time, Pancake Games will be changing and evolving.**

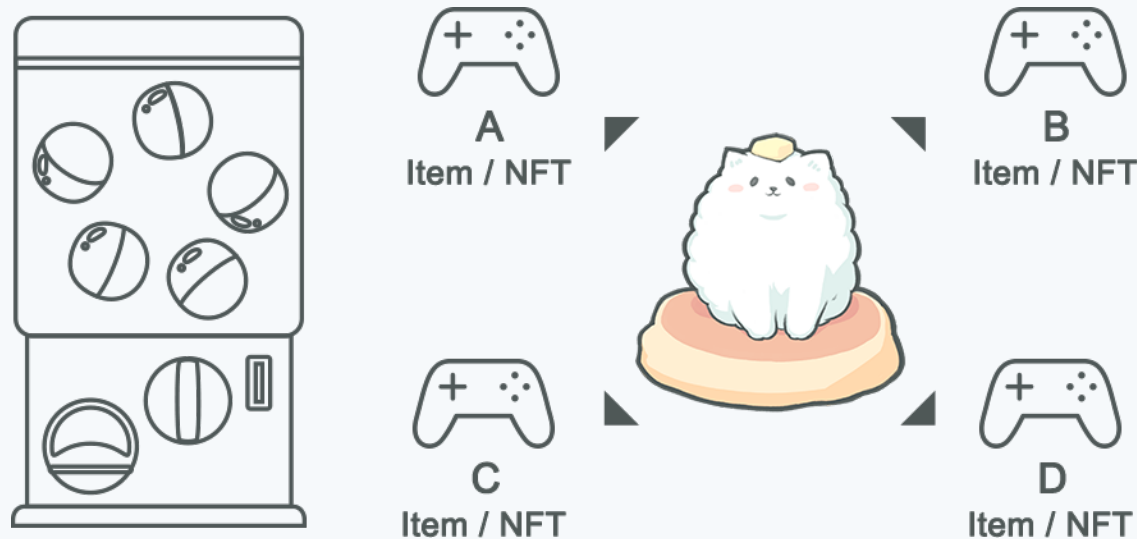

# Set the “Gacha” mechanic to win the rare NFT

“Gacha” refers to a virtual luck-based mechanic where the user pays to ‘spin’ or ‘roll’ the gacha and receives a random item.

In Pancake Games, will set this mechanic where users are able to earn the rare NFT.

We will be running a “gacha campaign” on a regular basis with our partners. This campaign will offer a high probability of obtaining rare NFTs.

# Will create the “User Ranking Board” based on the user’s usage of the platform

**NFT Airdrop  
Participation**

**Conference  
Registration**

**Limited Novelty  
Distribution**

# Pancake Games Holder Ranking

We will be introducing a "ranking function" based on usage of the platform. Depending on the users rank, they will be able to participate in events, campaigns, exclusive gachas, and exclusive conferences.

- There will be conferences that users can attend depending on their rank and will receive rare NFTs for participating.
- Can participate in airdrop depending on the rank.
- Can level up ranking according to the users' game achievement and completion.
- Able to view strategy videos and exclusive information depending on user's ranking.
- Will be able to earn daily bonus by logging in.
- Will get rewarded with novelty items.

# B-to-B Platform

Commonly, most of the projects have only provided services by BtoC, but if there is a platform that connects creators and developers, etc., it will lead to significant growth and this is what Pancake Games is aiming for.

- Funded by GCAKE
- Provide financial and development support for new game
- Introduce game creators, programmers, and sponsors
- Provide the one and only game
- Matching game creators and developers
- Pay fees by GCAKE

# Training Professional Gamers and Forming Teams

Will start a project to train the next generation gamers to be the pros by the professional gamers. Professional gamers will receive support from GCAKE partners and holders through token.

We will also select members to create a team that can win and succeed in game competitions. We will support the future of these professional gamers.

# Partnership with YouTuber, E-sports

Host and sponsor game tournaments and partner up with popular YouTubers, E-Sports teams, and celebrities as influencers. Users will earn an opportunity to actually see these influencers, play the games with them, and interact.

Special NFTs will be distributed to those who participate in the tournaments. For those who purchase specific NFTs, they will earn an opportunity to interact with YouTubers, E-Sports groups, and celebrities (currently scheduled to be held online).

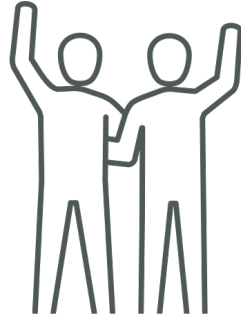

# Hosting of game tournaments and various events

Lecture by pro gamers and play directly against them  
Will release strategy videos only for the holders  
Users will have the privilege of getting to see your favorite celebrity online, get autographs, and celebrity's NFT.

Pancake Games will be the host of game tournaments and various events that will lead to the recognition of Pancake Games and engagements.

# Governance Token

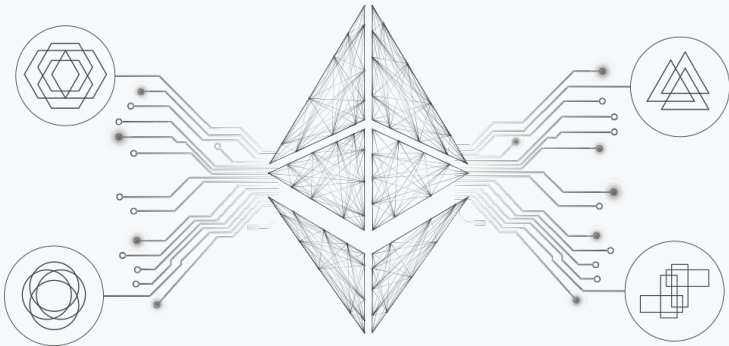

Will develop a system that will allow users to receive governance tokens for staking a certain amount of GCAKE. By holding this governance token, users are able to vote on IDOs, propose, etc. on PancakeGames.

# Deflation & Burn

Many of the recently issued tokens are made with the economic model of inflation, which will cause significant selling pressure in both the short and long term.

Crypto currencies such as BTC and ETH that have a mechanism to reduce selling pressure in the future will be more popular in the market.

There will not be any additional issuing of GCAKE, so the total supply will not increase.

In addition, with the burn mechanism at an unprecedented rate, GCAKE will be deflated in the short and long term.

# Token

**GCAKE**

Symbol

**10 trillion**

Total Supply

**ERC20**

Platform

**BEP20**

Platform

# Investors

Received equity investments from 14 companies globally, including:

**Famous Investor  
(US)**

**Venture capital  
(EUR)**

**Advertising company  
(Japan)**

**Crypto NFT capital  
(HK)**

**Game company  
(KOREA)**

**Crypto EXCHANGE**

# Roadmap

<b>September 2021</b>	<b>Token Sale</b>
<b>September 2021</b>	<b>Uniswap listing</b>
	
<b>November 2021</b>	<b>Sushiswap listing</b>
	
<b>January 2022</b>	<b>MEXC listing</b>
<b>2022, after 2Q</b>	<b>Launch of the game</b>
