

PICCOLO

THE SHIBA FROM SPACE

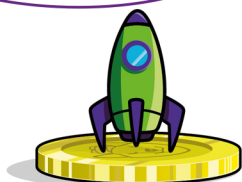

WHAT IS PICCOLO TOKEN ?

Piccolo token is an ERC-20 based token with a 100 trillion supply and aims at producing utility products that bring a difference in the blockchain landscape. A token for the masses that can be used with ease in a closely built ecosystem and is relatable to anyone new to the world of crypto investment.

WHO IS OUR TARGET ?

Piccolo is basically a Shib from space. We want Piccolo to be a household name among every person who can relate to crypto and desires to invest safely. We want to make blockchain a more accessible technology for commoners to understand. Our consumers are the same millions who believe in Shiba, and we are going to add more value to this market with a plethora of futuristic products.
