

SPACE TOKEN

Space Token (SPACE) Whitepaper

Version 0.4.1 - 17th February 2022

Space Token (SPACE) is an innovative Cross-chain Token that maximizes profit with DeFi Yield Generation and Crypto Earning Systems. Space Token has been created with a progressive, automatic burn mechanism to create a bridge between our product and our goals.

Abstract

1- Decentralized Finance Context

Decentralized Finance (DeFi) refers to an ecosystem of financial applications that are built on top of a blockchain. Its common goal is to develop and operate in a decentralized way, without intermediaries.

According to DeFi Pulse the amount of money invested in DeFi projects soared from about \$950 million in the latter part of May 2020 to more than \$9.5 billion by the first week of September of the same year and have already been deployed (locked-in) across a variety of DeFi applications that offer decentralized exchange, staking, liquidity mining, lending and borrowing, monetary banking (e.g. the issuance of stablecoins), tokenization, or other financial instruments such as derivatives and prediction markets. In that sense, DeFi is about creating a network of financial services that seamlessly function without the need for intermediaries that could hold an unfair and inefficient controlling stake in the operation of the system

However, cryptocurrency and decentralized finance are new concepts that can be confusing and risky for customers to get involved with. Proposed tools are complex and young, which hinders access to mainstream adoption. Early 2021, we cannot yet call this financial architecture “openfinance” - when new users have to pass through difficult loops to participate — hence, the need for simplified interfaces that democratize DeFi and make it accessible to a larger audience.

2- Crypto Faucets Context

A crypto faucet is an app or a website that distributes small amounts of cryptocurrencies as a reward for completing easy tasks. However, in the case of crypto faucets, tiny amounts of free or earned cryptocurrency are sent to a user's wallet. In order to get free crypto, users need to complete tasks as simple as viewing ads, watching product videos, completing quizzes and surveys, clicking links, or completing a captcha.

Though cryptocurrencies have had great last years, they are yet not completely mainstream and are still new to many people around the world. The idea behind crypto faucets is to give free cryptocurrencies to people so they would take the time to learn about digital assets and hopefully invest in them.

3- Next Gen Crypto Faucets

Usually, users need to register on a crypto faucet by entering their details along with their wallet address. After solving a task on the website, the reward earned goes to a **micro wallet**: a wallet similar to traditional wallets, but one which is capable of collecting small amounts of crypto assets by using an off-chain mechanism. This way permits to avoid blockchain network fees as it uses API endpoints to execute micro-transactions.

Micro Wallets are useful to collect micro-amounts of High Fee Coins like Bitcoin or Ethereum but their interest decreases when it comes to collecting other coins with low fees, as the fee is lower, the minimum required to withdraw from crypto faucets can be lower too.

That is why Some Crypto Faucet has chosen to integrate an internal wallet to permits users to withdraw their crypto directly to the blockchain. **It is the case of Final Autoclaim.**

4- Binance Smart Chain: A Bridge Between DeFi and Crypto Faucets

Due to its fully functional network with high scalability, quite low transaction fees, and 3-second block times, **Binance Smart Chain (BSC) has become a leader among Ethereum rivals.**

Binance Smart Chain is the second blockchain launched by the cryptocurrency exchange Binance. The First Binance Blockchain (Binance Chain) lacks most of Ethereum's functionality and flexibility, while the Binance Smart Chain is compatible with the Ethereum Virtual Machine (EVM) and supports smart contracts.

As a result, developers can launch their Ethereum DApps on the Binance Smart Chain with minimal configuration, allowing many crypto projects to migrate quickly to the latter chain to avoid ETH's high transaction fees.

Binance Smart Chain has seen immense popularity since the beginning of 2021, thanks in part to congestion issues and high transaction fees on the Ethereum network. All of this has caused many developers and investors to seek alternatives such as BSC.

In February 2021, the BSC community made the network even more attractive to new users as a low-cost and stable alternative, doing so by reducing its gas fees from 15 Gwei to 10 Gwei. This is to counteract the sharp increase in the price of the Binance Coin (BNB), which exceeded \$300 in February 2021.

This is why Binance Smart Chain is actually a nice way:

- **For Crypto Faucets Users** : to learn about Dapp mechanisms and to get access to DeFi opportunities without paying high fee.
- **For Crypto Faucets Owners** : to take a step towards decentralization by integrating DeFi features to their website.

Space Token (SPACE) is the very first token who permits users to learn about DeFi while receiving Bonuses on a crypto faucet like **Final Autoclaim**.

4- Towards a cross-chain environment

The smart chain binance is a good way to introduce people to the deFi, but the costs remain relatively high, especially when it comes to making micro payments, this is the case of crypto-faucets as well as all the semi-centralized Micro-Earning crypto services.

If we want to be totally free of centralized systems (mySQL, RESTful API ect) in the world of micropayment, we need a blockchain capable of performing transactions almost instantly and with lower costs.

Futhermore, a Cross-Chain Environment for a micro-earning service can bring a lot of simplicity to the user, especially when the service offers many crypto tokens to earn, it can avoid having to enter many addresses to withdraw his funds. For example, instead of having to enter the addresses of the native DOGE, BTC and ETH networks, the user will just have to enter his Binance Smart Chain (or Tron, Ethereum, Polygon..) address and will be able to make all his withdrawals on it.

Thanks to our partnership with Multichain.org (One of the leader of Cross-chain Bridges), Space Token was recently deployed on the Polygon PoS Network, this network permits fast transactions with almost no fee (below \$0.01 per transactions). Liquidity was deposited on Quickswap, the Polygon Decentralized Exchange with more than \$750M TVL.

Space Token will be available on different blockchains in the future, to allow third parties to find the best technology for their business and to improve crypto faucets users experience by permitting the transfer of all cryptocurrencies to one or two public address(es).

Use Cases

1- SPACE as official Final Autoclaim's Utility Token.

Final Autoclaim is a famous crypto earning website which allows users to earn up to 50 different cryptocurrencies. With upon 500.000 members, Final Autoclaim offers many different ways to earn cryptocurrencies, including surveys completion, staking, app-installations and video-watching.

Many of SPACE use-cases will be implemented to Final Autoclaim in the future.

Final Autoclaim's link : <https://autofaucet.dutchycorp.space>

Available SPACE Features on Final Autoclaim

- Autoclaim reward bonus (from 2% to a 100%) for each Space Token on-chain Holders
- Staking reward bonus (from 0.5% to 20%) for each Space Token on-chain Holders
- Roll Game reward bonus (from 2% to 100%) for SPACE-BNB LP tokens Holders
- Offers and Surveys reward bonus (from 0.5 to 20%) for SPACE-BNB LP tokens Holders
- Up to 108% APR with Space Token On-Chain Staking Pool
- Up to 48% APR with Space Token Off-Chain Staking Pool
- Discounts for Banners advertisers buying campaigns with SPACE
- Discounts for Silver, Gold and Platinum Memberships bought with SPACE
- Space Token Payment API for External Third Party Websites.
- SPACE distributions to Daily and Weekly XP Contest Winners
- Users can complete Daily Social Tasks and get paid in SPACE

Features Roadmap for Final Autoclaim

- Exclusive SPACE roll game faucet
- Discounts for Pay-To-Click advertisers buying campaigns with SPACE
- SPACE distributions to Daily and Weekly Contest Winners
- SPACE utilized to paid Blockchain withdrawals fee
- SPACE utilized on Items and Referrals Marketplaces

2- SPACE Liquidity Mining

As a liquidity provider, you will receive Space Tokens from the exchange contract that you can then later use to withdraw your funds from the liquidity pool. As long as you have cryptocurrencies in the liquidity pool, you'll receive part of the fee paid by traders when they trade coins.

The fee is added to the liquidity pool and distributed proportionally to all current liquidity providers.

As Liquidity Pools make trading on Decentralized Exchange (DEX) possible, anyone can become a liquidity provider as long as they can supply an equal amount of both BNB/BUSD and SPACE to an exchange contract on PancakeSwap or an equal amount of MATIC and SPACE on Quickswap.

[Add Liquidity on Pancakeswap \(Binance Smart Chain\):](#)

Tokenomics

Initial Supply

Dev & Marketing Wallet
Team & Funders Wallet
Community Airdrop
Liquidity
Final Autoclaim Wallet

350.000.000 SPACE

35.000.000 SPACE
35.000.000 SPACE
52.000.000 SPACE
105.000.000 SPACE
105.000.000 SPACE

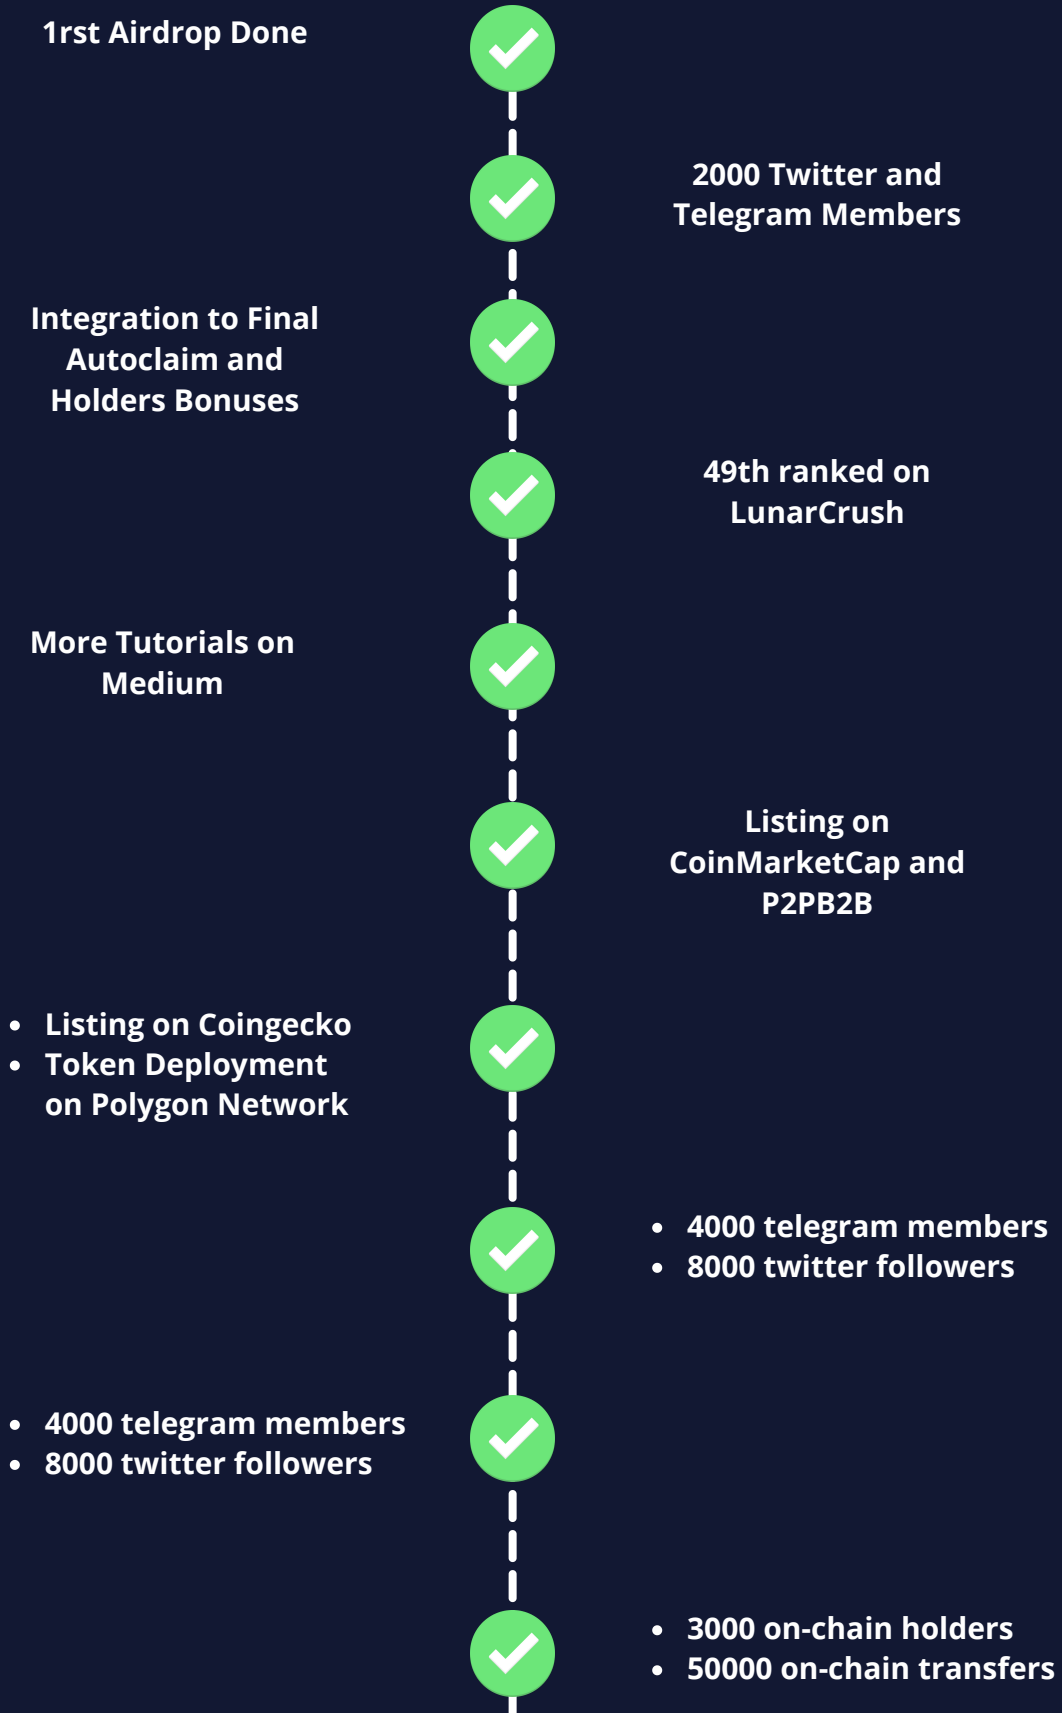

Reward & Burning Emission

People who hold their Space Token on the Binance Smart can take advantage of some on-chain benefits:

- **4%** of each on-chain transaction is given to Space Token holders
- **1%** is burned in order to make this token deflationary
- **1%** is sent to a charity wallet for later distribution to a community-nominated Organization which supports space exploration, human spaceflight and robotic spaceflight.

2021 Milestones

Roadmap

1- Short Term Roadmap (February to April 2022)

MicroPayment API (10 Beta Testers Faucets)

API integration on Vie Script and Lightning Script

Listing on Moonstake.io Wallet

New Staking Pools to Earn SPACE

8000 Twitter Followers

SPACE distributions to Daily and Weekly XP Contest Winners

Influencer outreach effort

2- Long Term Roadmap

April 2021

Token and Website Launch

May 2021

Integration to Final Autoclaim
& Airdrop Distributions

June 2021

- SPACE Staking & Holder Bonuses on Final Autoclaim
- Listing on P2PB2B

Summer 2021

- Contract Audits and Bots Development
- Beta API for crypto faucets
- Staking Pools Launches
- Listing on CoinMarketCap

End 2021

- Cross-Chain Contracts Deployments
- Liquidity Added on Quickswap
- Listing on Coingecko

January 2022

- Public API for third party websites and crypto faucets

February 2022

- Listing on Moonstake.io

April-May 2022

- Token Launch on Avalanche C-Chain and Fantom
- NFT Marketplace (beta)

End 2022

- Space Swap and DAO
