SGTTOKEN **WHAT IS SGT?**

SGT is a utility token traded on the Binance Smart Chain network. It has smart contract built on SGT BSC (BEP-20) network. BNB trading pairs are traded on the Pancake Swap exchange. SGT Token was created inspired by the Squid Game series. As investors hold their tokens, they will be able to receive ETH rewards and earn cryptocurrency by playing games. More await for SGT holders.

SGTOKEN HISTORY

The team was created on September 9, 2021. Inspired by the Squid Game series, a system was designed to benefit cryptocurrency investors. Thus, SGT took its first steps. Then, the infrastructure of the SGT token began to be created. The fair launch date is set for October 21, 2021. There was strong marketing for the launch. A successful fair launch was held with the participation of approximately 2,000 people. With the high demand and the arrival of large investments, a large marketing plan was initiated in a short time. The most effective part of this marketing was done through social media. SGT was listed on CoinMarketCap on October 24, 2021. It reached 15,000 investors in the first week. The community has adopted SGT. Our investors are behind and supporting the project. The team continues to work despite the volatile factors in the cryptocurrency market

Why ETH Rewards?

We distribute ETH rewards of 7% of each transaction to our investors. With ETH rewards, our investors earn passive income. There are several reasons why we prefer ETH. Compared to other tokens, its volatility is lower. The 2nd largest cryptocurrency. Promising cryptocurrency. We want our investors to receive minimum loss and maximum profit. ETH rewards are very important because of the idea of protecting the investor and providing passive income.

Why marketing and development fee?

Marketing and development are the 2 biggest factors for a token to move forward. Strong funding is required to support marketing efforts in various fields. This fund is provided from the taxes deducted from the purchase and sale transactions. This fund is also used to support and develop the SGT Game and token infrastructure. In this way, the SGT team does not sell tokens and cause drops. This is purely for the benefit of the investor.

Why is it added to the liquidity pool?

The reason for transferring some of the tax cuts to the liquidity pool is to prevent large decreases. The bigger the pool, the more solid the project. Pools with big money are safer. Our liquidity pool is locked. Having the liquidity in a locked state increases the security of your money. The higher your percentage in the token, the more share you have in the pool. The more you have in your pool, the bigger your share will be.

SGT TOKEN NEW GENERATION ST P2E AME

Inspired by the main idea of the Squid Game series, the new generation SGT "Play to Earn" gives you a chance to earn cryptocurrency by playing games. SGT P2E multiplayer is played. Instant matching is provided. They must hold a certain amount of SGT Tokens to be able to connect to the game. To start the game, players spend a certain amount of SGT Tokens. The SGT tokens spent by all players are collected and locked in a prize pool. The total prize pool is automatically transferred instantly to the winner of the game. Players can play their games in 3 different groups with low, medium and high fees. On some event days, games with big prizes will be played. These big prizes will be liquidated by SGT Team. Our game will be developed day by day.
