I Disclaimer

This document is a technical whitepaper setting out the current and possible future developments of the utility token (BTAF) which is affiliated with Bitcoin Trend & Forecast Pty Ltd (BitcoinTAF). This document is for information purposes only and is not a statement of future intent. Unless expressly specified otherwise, the products and innovations set out in this document are currently under development and are not currently in deployment. BitcoinTAF makes no warranties or representations as to the successful development or implementation of such technologies and innovations, or achievement of any other activities noted in this document, and disclaims any warranties implied by law or otherwise, to the extent permitted by law. No person is entitled to rely on the contents of this document, oral statements, or any inferences drawn from it, including in relation to any interactions with the utility token, BTAF, or the company, BitcoinTAF mentioned in this document. BitcoinTAF disclaims all liability for any loss or damage of whatsoever kind (whether foreseeable or not) that may arise from any person acting on any information and opinions relating to BitcoinTAF, or the BTAF Platform contained in this document or any information which is made available in connection with any further inquiries, notwithstanding any negligence, default, or lack of care.

The information contained in this document is derived from data obtained from sources believed by BitcoinTAF and its directors, consultants, and/or employees to be reliable and is given in good faith, but no warranties or guarantees, or representations are made by BitcoinTAF with regard to the accuracy, completeness or suitability of the information presented. Nothing in this document should be relied upon, and shall not confer any rights or remedies upon, you or any of your employees, creditors, holders of securities or other equity holders, or any other person. Any opinions expressed reflect the current judgment of the authors of this document and do not necessarily represent the opinion of BitcoinTAF. The opinions reflected herein may change without notice and the opinions do not necessarily correspond to the opinions of BitcoinTAF.

BitcoinTAF represents that it does not have an obligation to amend, modify or update this document or to otherwise notify a reader or recipient thereof in the event that any matter stated herein, or any opinion, projection, forecast, or estimate set forth in this document, changes or subsequently becomes inaccurate. BitcoinTAF, its directors, personnel, contractors, and representatives do not have any responsibility or liability to any person or recipient (whether by reason of negligence, negligent misstatement, or otherwise) arising from any statement, opinion, or information, expressed or

implied, arising out of, contained in or derived from or omission from this document. Neither BitcoinTAF nor its advisors have independently verified any of the information, including the forecasts, prospects, and projections detailed in this document. Each recipient is to rely solely on its own knowledge, investigation, judgment, and assessment of the matters which are the subject of this document and any information which is made available in connection with any further inquiries and to satisfy itself as to the accuracy and completeness of such matters.

In consideration of BitcoinTAF providing this White Paper to the recipient; the recipient acknowledges that the contents of this White Paper are confidential to BitcoinTAF and the recipient agrees not to disclose, distribute, or communicate verbally, directly, or indirectly, or otherwise publish the contents of this White Paper except with prior written consent of BitcoinTAF. For the purposes of this acknowledgment, “recipient” includes, without limitation, any principal, employee, or agent of the recipient. This White Paper, and any offers made within it, is solely for Participants. This White Paper provides a summary of the main features of BitcoinTAF. It contains general information only and has been prepared without considering any participant’s objectives, personal or financial situation, or needs. It does not provide any financial insight, direction, or advice and does not promise to be more than a utility token.

BitcoinTAF shall not have any liability to the recipient or any person resulting from the reliance upon this White Paper in determining whether to make an application to obtain BTAF tokens. BitcoinTAF makes no representation of the underlying value of the BTAF on offer. Prospective participants must make their own assessment about whether the value of the BTAF being offered represents fair market value as this is a utility token.

Value Risks

BTAF tokens may change in value based on several factors that are outside our control. There is no guarantee or expectation that the BTAF will increase in value, provide a return, or have sufficient adoption and liquidity on exchanges. Owning these tokens does not constitute a share of equity or ownership in BitcoinTAF. Regulatory circumstances may require that token mechanics be changed or altered. BitcoinTAF does not guarantee and is not representing in any way that the BTAF tokens have any rights, uses, purpose, attributes, functionalities, or features. BitcoinTAF reserves the right to refuse or cancel BTAF token purchase requests at any time at its sole discretion.

Not a Security

It is important to note that any BTAF tokens issued by BitcoinTAF are not intended to be securities, and this document is not a prospectus, offering document, or solicitation for investment in a share or equity offering. BTAF tokens issued on our BitcoinTAF Platform as referenced in this document do not confer any type of ownership or debt within BitcoinTAF or its Platform. BTAF tokens currently trading or issued in the future are non-refundable. BitcoinTAF will not guarantee any value, market, or commitments to the value of such BTAF tokens.

2 Glossary of Terms

1. Bitcoin Trend & Forecast Pty Ltd. (“BitcoinTAF”) – refers to the company registered in Australia. ABN 87629632613
2. BTAF – refers to the utility token created for use on the BitcoinTAF Platform.
3. DeFi – Decentralized finance (DeFi) is an emerging technology that challenges the current centralized banking system. Defi eliminates the fees that banks and other financial companies charge for using their services and promotes the use of peer-to-peer, or P2P, transactions.
4. NFT –Non-fungible tokens (NFTs) are cryptographic assets on a blockchain with unique identification codes and metadata that distinguish them from each other.
5. BitcoinTAF Platform – This is the technology platform developed by BitcoinTAF on which the BTAF is able to be utilised.

Introduction

Since 2016 Bitcoin Trend & Forecast (“BitcoinTAF”) has been one of the most trusted sources for thousands of traders who look to us to provide training, technical trend data, and fundamental research reports at every skill level. Whether you are a novice in need of some technical training or an accomplished trader looking to add that extra edge to your knowledge and skills to read charts or new ways to interpret technical analysis, BitcoinTAF has a product designed to help you achieve your goals by increased knowledge making more informed trading decisions, producing a more confident mindset and learning how to develop strategic goals on different trading styles.

Throughout the five years of growth and an ever-evolving crypto- currency world of many forms of digital assets ranging from innovative to DeFi to gaming, Non-fungible Tokens (NFTs), and the Metaverse, one thing has been steady and that is growth in new projects and platforms. BitcoinTAF has been a front leader in developing trend reports, along with timely related training and education courses to assist the new beginner to experienced traders in global regions on many different topics around digital goods and platforms. Thus, our BitcoinTAF Platform was established to create such a vast and diverse array of products to help educate and train people to understand these new areas emerging. We desired to help create a bridge that helped the decentralized platform interact with our educational products that were also decentralized. We needed our BitcoinTAF Platform to be powered by our own token and launched the BTAF token.

After establishing our global footprint for years, and developing a vast range of global long-term followers, BitcoinTAF was positioned with perfect timing to introduce its very own cryptocurrency utility token, BTAF. BitcoinTAF will supply a safe and secure platform for token holders to use tokens to access products; creating savings by utilizing faster transactions from many global payment systems and assisting to provide savings by reducing costs on transactions fees by using the BTAF tokens instead of fiat or other credit payment systems.

2.1 What problems are we solving?

BitcoinTAF's Platform continues to expand adding new products every year that fill gaps in the marketplace surrounding the evolving cryptocurrency markets and digital goods. BTAF tokens aim to offer a viable option to the current fiat payment systems, which are becoming very difficult for many people to use due to credit histories, and the inability to purchase digital goods due to too many restrictive financial rules and regulations, which also vary from country to country.

Cryptocurrency markets face constant difficulties for many reasons such as fiat banking concerns as world economies are changing with governmental mandates, identity theft from banking cards, restrictions on capping capital use per day, and not being able to access capital funding to purchase within the digital goods marketplace with ease. The BTAF token aims to use the BTAF tokens within its own BTAF Platform making purchasing of training and educational materials with greater efficiency and transparency as well as reducing delays and higher transaction fees.

The BTAF token endeavours to provide more opportunities for cryptocurrency holders, traders, and users to be able to access products without the uncertainty of financial fiat delay and denial issues. Its decentralized approach ensures quicker, cheaper transactions, greater efficiency, and increased transparency. Based on the Binance Smart Chain, BTAF is also positioned for the future with endless possibilities in the Defi, Metaverse, and NFT age to connect with projects that desire alternative funding options and want to use the utility BTAF token on their platforms.

2.2 Why the World needs BTAF?

BitcoinTAF's goal is to create a global platform that allows the tokens to be used to purchase digital products easily. BitcoinTAF is a globally-established, active company, which aims to teach the use of digital currencies to a much broader global audience and provide a much smoother way of receiving from cryptocurrencies by accessing BTAF, our utility token, with a future vision to fully fund our platform and beyond, in the crypto space.

BTAF token will not only simplify crypto and digital transactions, but also help peoples' desires that they can pay for, interact, and use their fiat in a global infrastructure that is more accessible, more user-focused, more resilient, and

less compartmentalized. We are living in a world of centralized, non-interoperable, and closed networks, which need to be unified in a global ecosystem which is our long-term mission.

All that is needed to move the crypto revolution into the mainstream is a model that unifies all aspects of digital transactions, leveraging the power of blockchain technology to make it useful to the global digital currency community as well as ordinary businesses and the public.

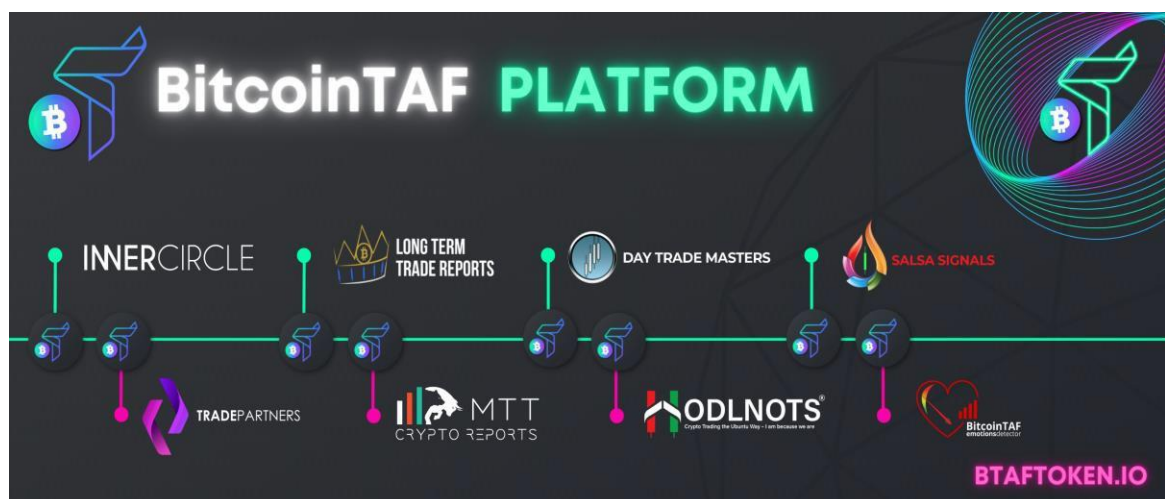

2.3 Our Solutions for DeFi

Developed to offer a full-feature package for tokenization on the blockchain, BitcoinTAF is one of the only companies able to offer a full spectrum of services from tactical technical execution to high-level theoretical modelling.

The goal of BTAF token is to help to provide opportunities for purchasing products with a decentralized utility token on our Defi training and educational products.

2.4 Platform Applications

The BitcoinTAF Platform supports a growing number of applications. To further enhance the use case for BTAF token you can use the BTAF tokens as the Economic Activity Token within BitcoinTAF to pay for goods and services within the BitcoinTAF Platform. Reference: BitcoinTAF.com

2.5 Knowledge Sharing and Information Quality Control

The cryptocurrency market holds a lot of potential and is now being much more regulated, standardized, and having best practices for the efficient analysis of crypto products from a fundamental analysis point of view. New users who lack the technical or financial background in blockchain or cryptocurrencies find it difficult to enter the market. The lack of financial knowledge and fundamental analysis knowledge on crypto products makes users particularly vulnerable to the volatility of these markets. BitcoinTAF solves this problem with up-to-date training and educational products that teach and train in these developing markets and how to manage these market conditions.

To this effect, BitcoinTAF will develop several digital media resources to cover news on blockchain technology, crypto products, and emerging fintech trends. Our team will deliver the most accurate and up-to-date news from both the decentralized and centralized worlds in various formats and forms, promoting the formation of a community of like-minded crypto enthusiasts within the BitcoinTAF Platform.

Our editorial content will be delivering in-depth analytics, insightful opinion pieces, comprehensive cryptocurrency charts, and regular reports on the social transformation that digital currencies bring. BitcoinTAF knowledge sharing and information and quality control features are meant for users who lack the time and resources to educate themselves on how to trade trends and difficult market conditions in cryptocurrency platforms without giving financial advice.

The common element of all social media features of BTAF tokens would be the creation and nurture of an online community that can freely share, exchange, post, and get rewarded for participation. Rewarding members for their efforts in generating and adding content we can now use BTAF. The social media element of BTAF tokens will help us to position the platform as a living, breathing, and growing social economy – a community where users can carry out all day-to-day activities, such as shopping, transacting, trading, communicating and sharing their voice. It will create a new kind of attention economy.

The BitcoinTAF feature will see us introduce a host of new products to our BTAF token community with LIVE AMAs across our Social Channels. These

products are designed to help users achieve more informed trading knowledge levels, mindset, and strategic goals. Part of the features we will release include:

INNER CIRCLE AND TRADE PARTNERS
LONG-TERM TRADE REPORTS
MEDIUM-TERM TRADE REPORTS
DAY TRADE MASTERS COURSE and SIGNALS
HODLNOTS COURSE and COMMUNITY
SALSA SIGNALS
EMOTIONS DETECTOR

2.6 Technical Overview and Underlying Technology

BitcoinTAF' business system is designed from the ground up to both utilize and work on top existing blockchain solutions. Our system utilizes the blockchain in order for transaction ledgers and other components to remain recorded and immutable within the blockchain whereas specific code resides outside of it. Such structure permits BTAF token users with their generated data to be easily put through data segmentation and analysis.

The potential scope of BitcoinTAF's platform is based according to the number of our potential users, representing tens of thousands of deals and offers, hundreds of thousands of businesses, and millions of consumers. This level of load currently can be handled by a proprietary blockchain.

To implement a provably fair distribution model, BTAF expands on the Binance Smart Chain (BSC) to build its own platform with ample functionality and improved security. We recognize that cryptocurrency adoption must utilize multiple blockchains to take off. BitcoinTAF recognized the need for interoperability and can use inter-blockchain exchanges to transfer between multiple cryptocurrencies and fiat currencies.

We have chosen BSC for its scalability, functionality, and security capabilities. It can take the proposed load of trillions of hashes. Binance Smart Chain is compatible with Ethereum's EVM, which lets developers easily migrate over popular Ethereum dApps (Decentralised Applications) and solutions via loosely modified forks. As the list of companies and applications supporting BSC keeps on growing, we are creating one of the most prominent interoperability solutions in the sector.

The user-friendly BSC is built for extensive scaling. It provides fast, low-cost transactions, ideal for cryptocurrency product purchases. BSC's architecture enhances scalability and efficiency, allowing it to deliver the performance needed to support applications without sharing or compromising its decentralization.

BSC was designed to become the most inclusive blockchain that allows anyone and everyone to participate. A large part of the BSC ecosystem consists of infrastructure and tooling projects, bridges allowing cross-chain interoperability, APIs for seamless data sharing and processing, and security analyzing the network and providing risk assessments and disclaimers.

2.7 BTAF

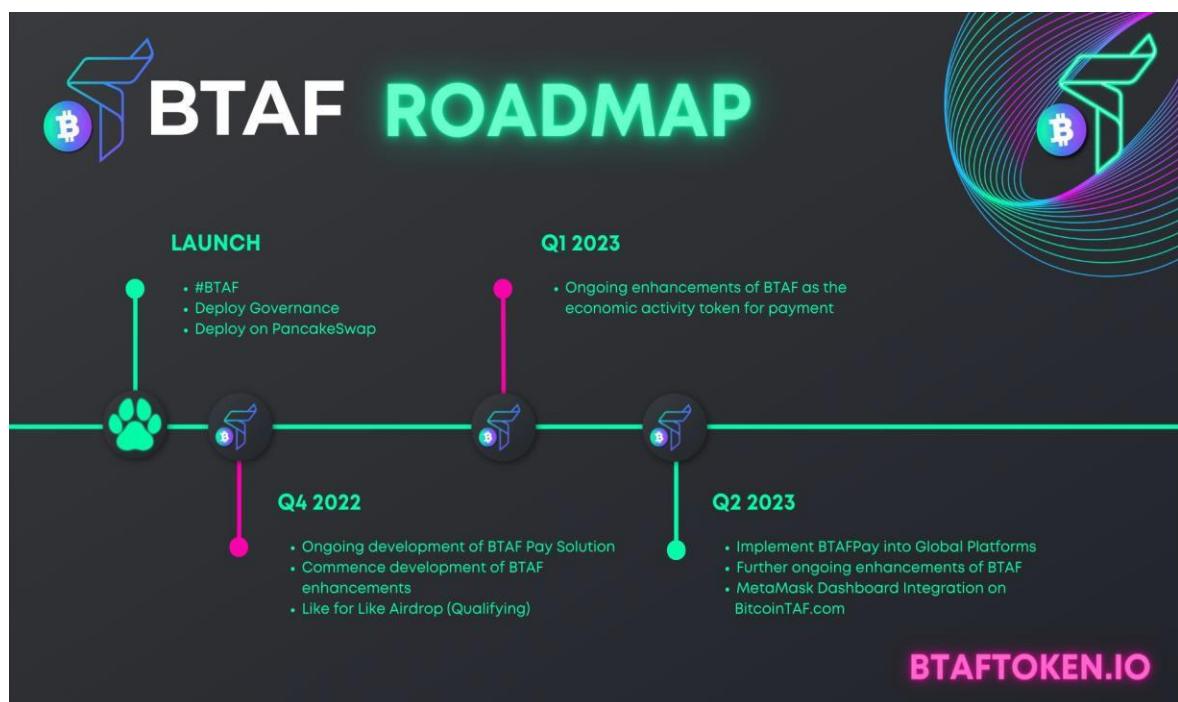

BTAF are utility tokens created for BitcoinTAF and the corresponding BTAF Platform. BTAF will be utilized in the platform not only use as an alternative payment option but will be used in earning rewards for customer marketing and development efforts. BTAF will also be used as the economic activity token for transactions associated with the platform BitcoinTAF.com.

As the user base of BitcoinTAF expands, the use case for BTAF will grow and the interest of the crypto community in it will increase as the product base expands. In addition to allowing users to trade cryptocurrencies with some of the lowest fees, it will also be used as a reward under our referral program. Users will be incentivized to popularize the platform and refer others as they will earn BTAF through all the users referred and on the ones that they referred.

2.8 Governance

The current governance structure consists of two Directors who work together with a highly skilled and dedicated team that partners to manage the daily and future operations of the business in accordance with the rules and regulations in Australia.

2.9 Roadmap

2.10 Tokenomics

BitcoinTAF is built on a strong foundation of ethics, service to the community, and the fundamental belief that everyone, regardless of their personal status should have equal opportunity to gain knowledge from the technology and innovations that cryptocurrency brings to humanity. BTAF is well positioned to take advantage of potential future growth opportunities with the crypto market, but more importantly, will anticipate the opportunities to bring its BTAF token holders.

2.1 | BitcoinTAF's Operating Team

BitcoinTAF is a company platform offering diverse training courses and educational products and requires a strong operating team, just as diverse, to build and teach it. And that's what BitcoinTAF affirms to have, with experts and consultants from a wide range of fields, including software development, marketing, media, quality assurance, life coach training, financial, risk management, business management certifications, along with security and legal sectors. Our core team consists of experienced cryptocurrency consulting, quantitative, and trading system development engineers and professionals to ensure that we can implement the entire suite of services that we envision for the BitcoinTAF Platform.

BitcoinTAF's strong team is uniquely suited to create a global platform for the use of its BTAF, fiat, crypto, and utility token assets. Rather than starting from scratch, the BitcoinTAF platform will build on the well-established foundation of its existing business interests and already working exchange models, seamlessly integrating traditional services with proven blockchain platforms and the emerging digital economy.

We will achieve this backed by the successful track record and proven expertise of a team of software architects and developers, system administrators, cryptocurrency experts, designers, marketers, quality assurance professionals, project managers, copywriters, and other specialists who will contribute actively to the development of every aspect of BTAF. This team is recognized on the BitcoinTAF website with further details and experience.

BTAF is not only built on sound technology it is also supported by a team of extraordinary people with more than ample experience in everything from design to client support all the way to traditional banking and trading architecture. Our goal is to unify the fiat and crypto environments into one secure, transparent, and global ecosystem that is available to the masses.
