1. Introduction

Zonex Exchange is an all-inclusive platform that enables users to exchange, stake, borrow, earn, and access a vast array of services on multiple blockchains. Zonex Exchange is also our most recent development in bringing the future to life.

2. Zonex Exchange Token (ZXT)

Zonex Exchange Token (ZXT) is the platform's native utility token, powering the whole ecosystem. Zonex tokens are built on the Binance Smart Chain (BSC).

TOKEN APPLICATIONS ZXT

Zonex Exchange Token (ZXT) is essential to the functioning of the Zonex network. Zonex ecosystem, while simultaneously providing holders with earnings and long-term development rights.

FEES FOR PLATFORM SERVICE

Users of Zonex Exchange are required to make a nominal charge for each successful transaction.

3. Incentives

STAKING INCENTIVES

Users must be incentivized to act as liquidity providers and stake their digital assets in the decentralised market making pools for Zonex Exchange to work properly. As reimbursement for lost opportunities, Users can make a passive income by locking up assets and getting ZXT tokens in exchange for providing liquidity or participating in liquidity mining across the different Zonex staking alternatives and platforms.

PRODUCT DEVELOPMENT AND GROWTH

In addition, ZXT tokens will be used to create a "self-sustaining, closed-loop economy" through the collection of network fees, which, whether in Zonex or another cryptocurrency, would be re-distributed as incentives for active contributors within the ecosystem, or set aside for future product development and ecosystem expansion.

4. Governance

GOVERNANCE ZONEX

To enable decentralised community governance for the network, holders of ZXT tokens may propose and vote on governance proposals to set the features and/or parameters of the Zonex Exchange and its products. By engaging in the governance mechanism of the platform, users can spend ZXT tokens to vote on new features and modifications to various protocol settings across the Zonex crypto network. For the avoidance of doubt, the right to vote is limited to voting on features of the Zonex Exchange; the right to vote does not entitle ZXT token holders to vote on the operation and management of the Company, its affiliates, or their assets, or the disposition of such assets to token holders, and does not represent an equity interest in these entities. The agreement is not meant to be a joint venture or partnership of any kind.

5. Zonex Market

ZONEX MARKETS

Zonex Markets is a potent component of the Zonex Exchange ecosystem that aggregates real-time, detailed, and valuable market data to aid users in tracking market swings. Currently, users may quickly access credible information about more than a thousand exchanges and 3,000 distinct cryptocurrencies. Zonex Markets enables users to get knowledge and objective viewpoints on a coin or token to make smart investing and business decisions.

6. Markets Features

OUTSTANDING FEATURES OFFERED BY ZONEX EXCHANGE MARKETS

The market for cryptocurrencies is becoming increasingly complex and diverse, with thousands of initiatives. Currently, practically anyone may create and contribute liquidity to a cryptocurrency that can be traded every day on a worldwide scale. There are numerous crypto initiatives gaining traction in the crypto industry fighting for the attention of investors. A cryptocurrency tracker like Zonex Markets is an essential tool for staying current on the market.

Zonex Markets collects the majority of the various real-time and reliable important indicators of tokens, allowing users to obtain insight into the whole market by following real-time cryptocurrency data. Zonex Markets also provides valuable connections to official websites, corresponding explorer browsers, and community accounts of a project. The unambiguous contract address information ensures that you are tracking the correct tokens, even lesser-known ones, to help consumers avoid scams.

7. Market Movement

QUICKLY RECAP THE MARKET MOVEMENT

Zonex Markets is one of the most effective methods for gaining a complete understanding of the bitcoin/blockchain market. Zonex markets provide token data ranging from the most popular assets like as Bitcoin and Ethereum to exotic Altcoins with a market capitalization of \$9 million or less. For example, if you notice that a certain cryptocurrency is performing well, you may verify and compare this token with the rest of the market or even with other tokens in the same range of market capitalization, ranking, and trading volume (by filtering it). If the entire market is falling, you can rapidly attempt to determine the reasons for such a disparity.

CREATE YOUR INDIVIDUAL WATCHLIST

Data, data, and data everywhere. Today's crypto investors are inundated with information, but is it always a good thing to have so much information readily available? When "cramming" as much information as possible into their minds, many retail investors are likely to make poor decisions.

Zonex Market enables users to establish a personalised watchlist of the cryptocurrencies they possess or are monitoring. This customised watchlist can help investors sift through the noise and monitor only the items worthy of their focus. With Zonex Markets, you can simply monitor the accumulated performance of your watchlist in an one location. We encourage that consumers apply both Zonex Markets and Zonex Portfolio in conjunction with Zonex Exchange's strong asset management capabilities, which will ultimately result in improved trading and investing decisions.

8. Swap

ZONEX SWAP

A cryptocurrency market tracker's objective is to provide a rapid overview of all marketplaces and their fluctuating values. A good cryptocurrency market tracker will display all relevant data on a single page or within one or two clicks.

Zonex Markets' UX/UI design is perfect, with a simple, quick, and intuitive all-in-one interface. In addition, we give clients an attractive "dark mode" with limited visibility and low-level lighting. This will save time and reduce unnecessary stress and eye strain for users of our market tracker.

Zonex Markets also includes the Swap to allow customers to instantaneously and smoothly exchange one cryptocurrency for another on the interface within minutes. This integration will allow customers to sell at the most enticing price and not miss a good entry. Now, users may exchange tokens natively on different

blockchains in a secure, permissionless, and frictionless manner without the need for tedious processes.

Why Zonex Swap? Zonex Swap is decentralised. You may trade more than 100 BSC tokens, including ZXT, BNB, BUSD, and ETH pegged to Binance. Zonex Swap maximises the benefit, so you can be certain you're receiving the best price while swapping.

9. Launchpad

ZONEX LAUNCHPAD

The greatest potential rewards are associated with newly issued tokens, but you should always DYOR in a busy cryptocurrency market.

Here, we will concentrate on providing investors with access to newly generated assets that are secure and have excellent growth potential. To do this, we will launch only the most promising projects on our platform.

10. Staking

ZONEX STAKING

Zonex Staking is the most recent addition to the Zonex Exchange's product range and incentive for ZXT holders. It will also provide a straightforward and safe method for users to earn passive money while participating in the Zonex Ecosystem. Zonex Staking provides stable interest rates based on the stakes you make. There are three packages with varying stake periods and token amounts for users to choose from.

After the wager has concluded, users can cancel the wager and receive their profits in their wallets. Notably, bettors cannot cancel their wagers before the expiration date.

Consistently and aggressively pursuing ongoing audits to ensure that our products stay safe and dependable for all of our customers.

A straightforward and secure method for users to generate passive earnings while participating in the Zonex Ecosystem. Zonex Staking provides stable rates of interest based on your staking strategies.

11. Trading

ZONEX TRADE

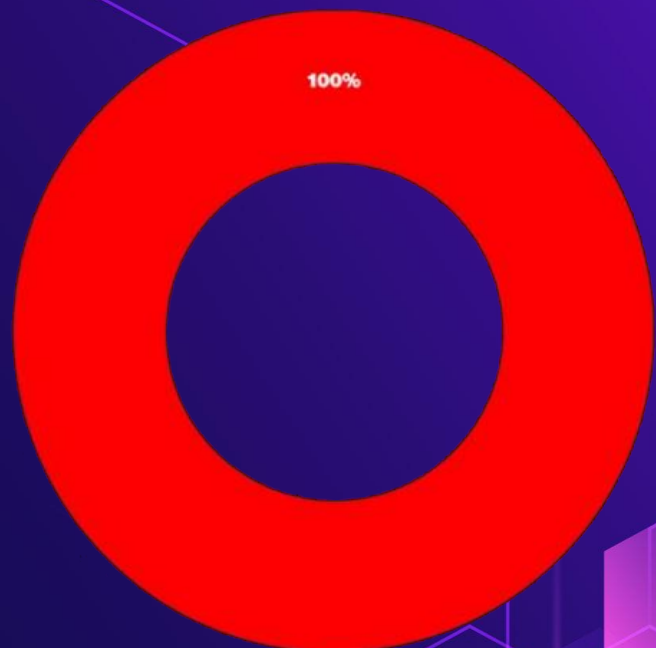

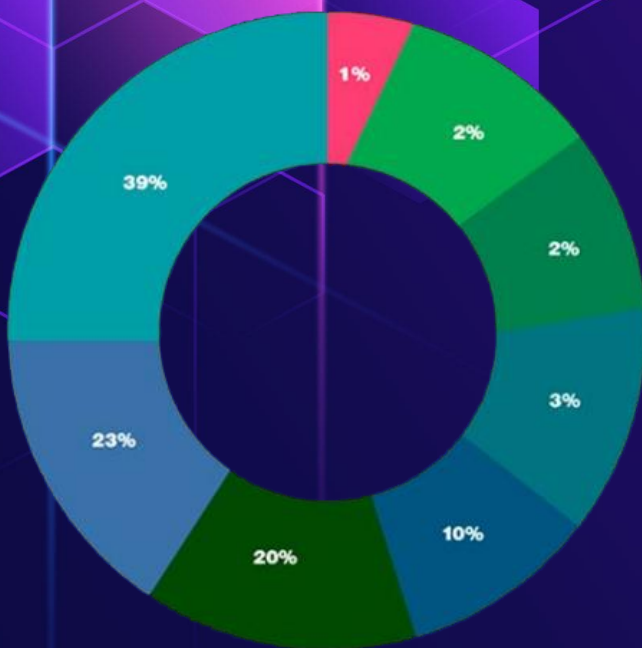

Zonex Exchange is a decentralised exchange (DEX), a Multi-chain liquidity aggregator that provides customers with a vast array of services (swap, stake, lend, borrow) via user-friendly interfaces. Zonex Exchange was created to overcome the problem faced by many, allowing users to enjoy DeFi fully and without the need for in-depth blockchain technical understanding.

12. Tokenomics

TOTAL SUPPLY : 300,000,000

NETWORK : BEP20

- AIRDROP
- TEAM VETING
- PARTNERSHIPS/GIVEAWAYS
- PRIVATE SALE
- PLATFORM AUTO STATKING
- COMPANY/REWARDS

- PRE SALE
- NO FEE (BUY AND SELL)

13. Roadmap

PHASE 1

- Team Formation
- Website Development
- Whitepaper Documentation
- Smart Contract Deployment
- Community Formation
- Marketing Plan & Execution
- Private Sale
- Audit
- KYC

PHASE 2

- Fair Launch Pinksale
- Marketing Execution
- Partnership
- Venture Capital Dealing
- Platform Update
- Networking Between CEX

PHASE 3

- ZXT Token Launch
- Pancakeswap
- Coinmarketcap/Coingecko
- Listing on Token Marketing Site
- Staking Development
- CEX TestNet Live

PHASE 4

- Major CEX Listing
- Major Audit (Certik)
- Zonex Markets Testnet Live
- CEX Mainnet Live
- Data Integration Fully Loaded
- Strategic Partnership
